

Contents

| | | |
|---|--|-----------|
| 1 | Introduction: The World According to Physics | 1 |
| 1.1 | The Nature of Physics | 1 |
| 1.2 | The Subject Matter of Physics | 2 |
| 1.3 | Various Branches of Physics | 3 |
| 1.4 | The Main Points of This Book: Basic Ideas Applied to Equilibrium Structures of Matter | 4 |
| | References | 7 |
| Part I Three Key-Ideas and a Short-Cut | | |
| 2 | The Atomic Idea | 11 |
| 2.1 | Introduction | 11 |
| 2.2 | The Elementary Particles of Matter | 14 |
| 2.3 | The Interactions and Their Elementary Interaction-Carrying-Particles | 15 |
| 2.4 | Feynman Diagrams | 17 |
| 2.5 | Concluding Comments | 21 |
| 2.6 | Summary of Important Concepts, Relations, and Data | 23 |
| 2.7 | Multiple-Choice Questions/Statements | 23 |
| 2.8 | Solved Problems | 24 |
| 2.9 | Unsolved Problems | 25 |
| | References | 25 |
| 3 | The Wave-Particle Duality | 27 |
| 3.1 | Concepts and Formulae | 27 |
| 3.2 | The Properties of the Structures of the World at Every Scale Are of Quantum Nature. If They Were Not, We Would Not Exist | 29 |
| 3.3 | Heisenberg's Uncertainty Principle | 31 |
| 3.4 | Pauli's Exclusion Principle | 34 |
| 3.5 | Quantum Kinetic Energy in View of Heisenberg and Pauli Principles | 35 |

| | | |
|---------------------------------|---|-----------|
| 3.6 | Schrödinger's Principle of Spectral Discreteness | 37 |
| 3.7 | Summary of Important Concepts and Formulae | 42 |
| 3.8 | Multiple-Choice Questions/Statements | 44 |
| 3.9 | Solved Problems. | 46 |
| 3.10 | Unsolved Problems. | 48 |
| | References | 49 |
| 4 | Equilibrium and Minimization of Total Energy | 51 |
| 4.1 | Concepts | 51 |
| 4.2 | Conservation of Energy and the First Law | 52 |
| 4.3 | Entropy and the Second Law | 53 |
| 4.4 | Inequality (4.7) as a Source of Thermodynamic Relations | 54 |
| 4.5 | Maximum Work, Gibbs' Free Energy, and Chemical Potential | 56 |
| 4.6 | Extensive and Intensive Thermodynamic Quantities | 57 |
| 4.7 | Summary of Important Relations | 58 |
| 4.8 | Multiple-Choice Questions/Statements | 60 |
| 4.9 | Solved Problems. | 62 |
| 4.10 | Unsolved Problems. | 64 |
| 4.11 | The Three Phases of Matter (Solid (<i>s</i>), Liquid (<i>l</i>), Gas (<i>g</i>)) . . . | 64 |
| | References | 66 |
| 5 | Dimensional Analysis: A Short-Cut to Physics Relations | 67 |
| 5.1 | Outline of the Method. | 67 |
| 5.2 | Relations Regarding Some Eigenfrequencies | 69 |
| 5.3 | Some Relations in Fluid Dynamics | 70 |
| 5.4 | Thermodynamic Relations Revisited | 72 |
| 5.5 | Waves in Extended, Discrete or Continuous, Media | 73 |
| 5.6 | Summary of Important Formulae | 75 |
| 5.7 | Multiple-Choice Questions/Statements | 76 |
| 5.8 | Solved Problems. | 77 |
| 5.9 | Unsolved Problems. | 81 |
| Part II Interactions | | |
| 6 | Photons: Messengers and Connectors | 85 |
| 6.1 | Introductory Remarks | 85 |
| 6.2 | Photons in Equilibrium | 87 |
| 6.2.1 | Determine the Thermodynamic Quantities of a Photon Gas in Equilibrium by Employing Dimensional Analysis | 87 |
| 6.2.2 | Determine the Total E/M Energy, <i>I</i> , Emitted by a Black Body of Temperature <i>T</i> Per Unit Time and Per Unit Area by Employing Dimensional Analysis | 88 |

| | | |
|----------|---|------------|
| 6.2.3 | How Is the Emitted I_ω Black Body E/M Energy Per Unit Time, Per Unit Frequency, and Per Unit Area Distributed Among the Various Frequencies? | 89 |
| 6.3 | Emission of Photons by Accelerating Charges | 90 |
| 6.3.1 | Radiation by a Moving Particle of Electric Charge q | 90 |
| 6.3.2 | Radiation by a Neutral System with an Oscillating Electric Dipole Moment $p = \sum q_i r_i$ | 91 |
| 6.4 | Scattering of Photons by Charged Particles, Atoms, Molecules | 91 |
| 6.5 | Scattering of Photons by Macroscopic Particles | 94 |
| 6.6 | Total Scattering Cross-Section and Mean Free Path | 94 |
| 6.7 | Quantities Characterizing the E/M Behavior of Solids and Liquids | 96 |
| 6.8 | Calculation of the Conductivity σ and the Permittivity ε | 97 |
| 6.9 | Summary of Important Formulae | 99 |
| 6.10 | Multiple-Choice Questions/Statements | 101 |
| 6.11 | Solved Problems. | 102 |
| 6.12 | Unsolved Problems. | 103 |
| 7 | The Other Interactions | 105 |
| 7.1 | General Remarks | 105 |
| 7.2 | Strong Interactions Involving Quarks and Gluons | 106 |
| 7.3 | Weak Interactions. | 108 |
| 7.4 | Gravitational Interactions. | 110 |
| 7.4.1 | Newtonian Formulation of Gravitational Interactions | 112 |
| 7.4.2 | Gravitational Interactions According to Einstein | 113 |
| 7.4.3 | Two Model Systems Allowing Exact Solutions of the GTR | 115 |
| 7.4.4 | Universal Physical Constants and the Planck System of Units | 117 |
| 7.5 | Summary of Important Formulae | 118 |
| 7.6 | Multiple-Choice Questions/Statements. | 118 |
| 7.7 | Problems. | 119 |
| | References | 119 |

Part III Structures Held Together by Strong Interactions

| | | |
|----------|---|------------|
| 8 | From Quarks and Gluons to Hadrons. | 123 |
| 8.1 | Summary. | 123 |
| 8.2 | Baryons and Mesons. | 125 |
| 8.3 | Estimating the Rest Energy of Proton or Neutron | 129 |

| | | |
|---|---|------------|
| 8.4 | Multiple-Choice Questions/Statements | 130 |
| 8.5 | Solved Problems. | 130 |
| | References | 131 |
| 9 | From Protons and Neutrons to Nuclei. | 133 |
| 9.1 | Summary. | 133 |
| 9.2 | Calculating the Total Energy | 135 |
| 9.3 | Minimizing the Total Energy | 138 |
| 9.4 | Questions and Answers | 140 |
| 9.5 | Summary of Important Formulae and Related Comments. | 145 |
| 9.6 | Multiple-Choice Questions/Statements. | 147 |
| 9.7 | Solved Problems. | 148 |
| 9.8 | Unsolved Problems. | 150 |
| | References | 151 |
| Part IV Structures Held Together by Electromagnetic Interactions | | |
| 10 | From Nuclei and Electrons to Atoms | 155 |
| 10.1 | Summary. | 155 |
| 10.2 | Size and Relevant Energy of Atoms | 156 |
| 10.3 | Atomic Orbitals | 158 |
| 10.4 | Energy Ordering of the Atomic Orbitals ψ_{nlm} | 160 |
| 10.5 | The Structure of the Periodic Table of the Elements | 162 |
| 10.6 | Summary of Important Relations | 163 |
| 10.7 | Multiple-Choice Questions/Statements. | 164 |
| 10.8 | Solved Problems. | 165 |
| 10.9 | Unsolved Problems. | 166 |
| | References | 166 |
| 11 | From Atoms to Molecules. | 167 |
| 11.1 | Introduction | 167 |
| 11.2 | The Residual Electric Interaction Between Two Atoms | 168 |
| 11.3 | Estimates Based on Dimensional Analysis | 170 |
| 11.4 | Linear Combination of Atomic Orbitals (LCAO) | 173 |
| 11.5 | Hybridization of Atomic Orbitals | 178 |
| 11.6 | Summary of Important Relations | 182 |
| 11.7 | Multiple-Choice Questions/Statements. | 184 |
| 11.8 | Solved Problems. | 187 |
| 11.9 | Unsolved Problems. | 189 |
| | References | 189 |
| 12 | From Atoms (or Molecules) to Solids (or Liquids) | 191 |
| 12.1 | Introduction | 191 |
| 12.2 | Some Common Crystal Lattices | 192 |
| 12.3 | Types of Bonding in Condensed Matter | 193 |
| 12.4 | Dimensional Analysis Applied to Solids | 194 |

| | | |
|-------|--|-----|
| 12.5 | Resistivity According to Dimensional Analysis: An Instructive Failure | 197 |
| 12.6 | Resistivity as a Wave Phenomenon. | 198 |
| 12.7 | The Jellium Model and Metals. | 200 |
| 12.8 | The LCAO Method | 203 |
| 12.9 | LCAO and Semiconductors | 205 |
| 12.10 | Summary of Important Relations | 208 |
| 12.11 | Multiple-Choice Questions/Statements (See also Appendix D) | 210 |
| 12.12 | Solved Problems. | 216 |
| 12.13 | Unsolved Problems. | 217 |
| | References | 217 |

Part V Gravity at the Front Stage

| | | |
|-----------|---|------------|
| 13 | Planets. | 223 |
| 13.1 | Summary. | 223 |
| 13.2 | How Tall Can a Mountain Be?. | 223 |
| 13.3 | Temperature of a Planet | 225 |
| 13.4 | Winds in the Atmospheres of Planets | 226 |
| 13.5 | Pressure and Other Quantities Within a Planet | 227 |
| 13.6 | Summary of Important Relations | 228 |
| 13.7 | Multiple-Choice Questions/Statements. | 229 |
| 13.8 | Solved Problems. | 230 |
| 13.9 | Unsolved Problem | 232 |
| | References | 232 |
| 14 | Stars, Dead or Alive. | 233 |
| 14.1 | Introduction | 233 |
| 14.2 | White Dwarfs. | 235 |
| 14.3 | Neutron Stars or Pulsars (\equiv Rotating Neutron Stars) | 237 |
| 14.4 | Black Holes. | 239 |
| 14.5 | The Minimum Mass of an Active Star | 241 |
| 14.6 | The Maximum Mass of an Active Star | 243 |
| 14.7 | Summary of Important Relations | 244 |
| 14.8 | Multiple-Choice Questions/Statements. | 244 |
| 14.9 | Solved Problems. | 247 |
| 14.10 | Unsolved Problems. | 247 |
| | References | 248 |
| 15 | The Observable Universe | 249 |
| 15.1 | What Is Cosmology?. | 249 |
| 15.2 | Measuring the Temperature and Other Parameters of the Universe | 250 |
| 15.3 | Derivation of the Equations Determining the Expansion Rate. | 256 |

| | | |
|---|--|------------|
| 15.4 | Solutions of the Equation for the Expansion Rate | 259 |
| 15.5 | Formation of the Structures of the Universe | 264 |
| 15.6 | Summary of Important Relations | 266 |
| 15.7 | Multiple-Choice Questions/Statements | 267 |
| 15.8 | Solved Problem | 269 |
| 15.9 | Unsolved Problems | 269 |
| | Reference | 270 |
| Epilogue: The Anthropic Principle | | 271 |
| Appendix A: Oscillations and Waves | | 275 |
| Appendix B: Elements of Electrodynamics of Continuous Media | | 279 |
| Appendix C: Elements of Thermodynamics and Statistical Mechanics | | 287 |
| Appendix D: Semiconductors Revisited | | 297 |
| Appendix E: Useful Concepts and Definitions | | 309 |
| Appendix F: 25 Important Relations | | 311 |
| Appendix G: 21 Numbers to be Remembered | | 313 |
| Appendix H: Answers to Multi-Choice Questions/Statements | | 315 |
| Appendix I: Tables | | 317 |
| Index | | 321 |

From Quarks to the Universe

A Short Physics Course

Economou, E.N.

2016, XVIII, 326 p. 92 illus., 9 illus. in color., Hardcover

ISBN: 978-3-319-20653-0
