

Contents

1	Introduction	1
1.1	Present Situation and Problem Statement	1
1.2	Research Objective and Problem Solving Approach	6
	References	8
2	Energy Flows in Factories	11
2.1	Factory Environment	11
2.1.1	Levels of Abstraction Within a Factory	12
2.1.2	Functional Structure of a Factory	13
2.1.3	Entities of a Factory	15
2.2	Energy Flows and Energy Conversion in Factories	17
2.2.1	Definition of Energy and Related Terms	17
2.2.2	Energy Types at the Factory Gate	20
2.2.3	Factory Internal Energy Conversion for End Usage	24
2.2.4	Dynamics of Energy Utilisation and Related Cost Factors	31
	References	36
3	Energy Management in Factories	39
3.1	Energy Management from Facility and Production Perspective	39
3.1.1	Energy Management from a Technical Facility Perspective	40
3.1.2	Energy Management from a Production Perspective	42
3.1.3	Integrated Energy Management	44
3.2	Energy Flow Data Acquisition and Automation	45
3.2.1	Energy Flow Data Acquisition	45
3.2.2	Factory Automation Systems	55
3.2.3	Building Automation Systems	57
3.3	Review of the State of the Art and Barriers for Integrated Solutions	59
	References	66

4	Approaches for Energy Data Acquisition and Monitoring	71
4.1	Background for Selecting and Evaluating Existing Approaches.	71
4.2	Investigation of Adjacent Fields of Research	75
4.3	Review of Energy and Data Acquisition and Monitoring Approaches	77
4.4	Discussion and Comparison of the Review	84
4.5	Derivation of Further Research Demand	87
	References	90
5	Concept for Energy Transparent Factories	95
5.1	Synthesis of Requirements into Concept Specifications	95
5.1.1	Energy Transparency	97
5.1.2	Holistic Factory View and Relevant Entities and Flows.	100
5.2	Conceptual Framework	102
5.2.1	Factors Influencing Metering Strategies	103
5.2.2	Derivation of the Conceptual Framework	105
5.3	Planning Tool for Metering Strategies.	109
5.3.1	Transparency Objectives	109
5.3.2	Factory System Modelling	120
5.3.3	Guided Decision Support	134
5.3.4	Metering Strategy Formulation	143
5.4	Toolbox for the Operation of Energy Monitoring	175
5.4.1	Integrated Energy Management	175
5.4.2	Energy Transparency Cockpit	187
	References	201
6	Application of Concept.	205
6.1	Application Case: Die Lernfabrik—A Research Lab	205
6.1.1	Energy Cockpit	208
6.1.2	EnyFlow—Energy Flows Made Transparent	211
6.1.3	Dynamic Energy Value Stream Monitor	214
6.2	Application Case: Battery Lab Factory Braunschweig	217
6.2.1	Transparency Objective	217
6.2.2	Factory System Modelling	218
6.2.3	Decision Support	219
6.2.4	Metering Strategy Formulation	220
6.2.5	Energy Transparent Z-Folding Machine	223
6.3	Application Case: Electronics Production	225
6.3.1	Transparency Objectives	225
6.3.2	Factory System Modelling	226

6.3.3	Decision Support	227
6.3.4	Metering Strategy Formulation	228
6.3.5	Energy Aware Enterprise Resource Planning	231
	References	233
7	Summary and Outlook	235
7.1	Summary	235
7.2	Concept Evaluation	239
7.3	Outlook	241
	Reference	243
	Appendix A: Extending Tables and Figures	245
	Appendix B: Excursus.	259
	Previous Publications of the Author	283

Towards Energy Transparent Factories

Posselt, G.

2016, XXXII, 284 p. 202 illus., Hardcover

ISBN: 978-3-319-20868-8
