

Contents

1 Overview of Rotating Flows	1
1.1 Applications of Rotating Flows	1
1.2 Volume Forces and Their Description	2
1.3 Differential Equations of Continuity, Momentum, and Heat Transfer	4
1.4 Differential Equation of Convective Diffusion	8
References	8
2 Mathematical Modeling of Convective Heat Transfer in Rotating-Disk Systems	11
2.1 Differential and Integral Equations	11
2.1.1 Navier–Stokes and Energy Equations in Differential Form	11
2.1.2 Differential Equations of the Boundary Layer	13
2.1.3 Integral Equations of the Boundary Layer	14
2.2 Methods of Solution	15
2.2.1 Self-similar Solution	15
2.2.2 Approximate Analytical Methods for Laminar Flow	16
2.2.3 Numerical Methods	17
2.3 Integral Methods	17
2.3.1 Momentum Boundary Layer	17
2.3.2 Thermal Boundary Layer	21
2.4 Improved Integral Method	22
2.4.1 Structure of the Method	22
2.4.2 Turbulent Flow: Velocity and Temperature Profiles	23
2.4.3 Surface Friction and Heat Transfer	24
2.5 Disk Rotation in a Fluid Rotating as a Solid Body and Simultaneous Accelerating Imposed Radial Flow	29
References	31

3 Free Rotating Disk	37
3.1 Laminar Flow	37
3.2 Transition to Turbulent Flow	40
3.3 Turbulent Flow	43
3.3.1 Parameters of the Boundary Layer	43
3.3.2 Surface Heat Transfer: Different Experiments and Solutions	46
3.3.3 Effect of Approximation of the Radial Velocity Profile	48
3.3.4 Arbitrary Distribution of the Wall Temperature	54
3.4 Generalized Analytical Solution for Laminar and Turbulent Flow	57
3.5 Finding a Wall Temperature Distribution for Arbitrary Nusselt Numbers	60
3.5.1 Solution of the Problem	60
3.5.2 The Limiting Case of the Solution	62
3.5.3 Properties of the Solution for the Temperature Difference on the Wall	62
3.5.4 Analysis of the Solution	63
3.6 Theory of Local Modelling	69
3.7 Unsteady Heat Transfer	70
3.7.1 Transient Experimental Technique	70
3.7.2 Self-similar Equations for Unsteady Convective Heat Transfer	71
3.7.3 Cooling of an Isothermal Rotating Disk	72
3.7.4 Unsteady Two-Dimensional Heat Conduction in a Non-uniformly Heated Disk	73
References	75
4 Forced External Flow Over a Rotating Disk	81
4.1 Rotating Disk in a Fluid Rotating as a Solid Body	81
4.1.1 Turbulent Flow	81
4.1.2 Laminar Flow	84
4.2 Flow Impingement onto an Orthogonal Disk	95
4.2.1 Experimental and Computational Data of Different Authors	95
4.2.2 Turbulent Flow	99
4.3 Forced Outward Flow Between Corotating Disks	114
4.3.1 Ekman Layers	114
4.3.2 Flow Structure in Forced Outward Flow Between Corotating Disks	116
4.3.3 Radial Variation of the Swirl Parameter	117

4.3.4	Local Nusselt Numbers	119
4.3.5	Effect of the Radial Distribution of the Disk Temperature	121
