

Contents

1	Modelling and Errors	1
1.1	Introduction	1
1.2	Simulation and Approximation	2
1.3	Error Analysis	5
1.3.1	Precision and Accuracy	5
1.3.2	Absolute and Relative Error	6
1.3.3	Significant Digits	8
1.3.4	Big O Notation	9
1.4	Summary	11
1.5	Exercises	11
2	Numerical Representation	13
2.1	Introduction	13
2.2	Decimal and Binary Numbers	14
2.2.1	Decimal Numbers	14
2.2.2	Binary Numbers	15
2.2.3	Base Conversions	18
2.3	Number Representation	18
2.3.1	Fixed-Point Representation	19
2.3.2	Floating-Point Representation	20
2.3.3	Double-Precision Floating-Point Representation	22
2.4	Limitations of Modern Computers	24
2.4.1	Underflow and Overflow	24
2.4.2	Subtractive Cancellation	25
2.4.3	Non-associativity of Addition	27
2.5	Summary	29
2.6	Exercises	29

3	Iteration	31
3.1	Introduction	31
3.2	Iteration and Convergence	31
3.3	Halting Conditions	34
3.4	Summary	37
3.5	Exercises	37
4	Linear Algebra	39
4.1	Introduction	39
4.2	PLU Decomposition	41
4.3	Cholesky Decomposition	46
4.4	Jacobi Method	50
4.5	Gauss-Seidel Method	54
4.6	Error Analysis	56
	4.6.1 Reciprocal Matrix	59
	4.6.2 Maximum Eigenvalue	62
4.7	Summary	64
4.8	Exercises	64
5	Taylor Series	67
5.1	Introduction	67
5.2	Taylor Series and n th-Order Approximation	67
5.3	Error Analysis	71
5.4	Modelling with the Taylor Series	74
5.5	Summary	74
5.6	Exercises	74
6	Interpolation, Regression, and Extrapolation	77
6.1	Introduction	77
6.2	Interpolation	78
6.3	Vandermonde Method	79
	6.3.1 Univariate Polynomials	79
	6.3.2 Univariate General Functions	81
	6.3.3 Multidimensional Polynomial	83
6.4	Lagrange Polynomials	84
6.5	Newton Polynomials	87
6.6	Interpolation Error Analysis	94
6.7	Linear Regression	96
6.8	Method of Least Squares	98
6.9	Vandermonde Method	100
	6.9.1 Vandermonde Method for Multivariate Linear Regression	103
6.10	Transformations	104
6.11	Linear Regression Error Analysis	106
6.12	Extrapolation	108
6.13	Summary	110
6.14	Exercises	111

7	Bracketing	115
7.1	Introduction	115
7.2	Binary Search Algorithm	115
7.3	Advantages and Limitations	117
7.4	Summary of the Five Tools	118
8	Root-Finding	119
8.1	Introduction	119
8.2	Bisection Method	120
8.3	False Position Method	124
8.3.1	Error Analysis	127
8.3.2	Nonlinear Functions	130
8.4	Closed and Open Methods	131
8.5	Simple Fixed-Point Iteration	131
8.6	Newton's Method	136
8.6.1	One-Dimensional Newton's Method	136
8.6.2	Multidimensional Newton's Method	140
8.7	Secant Method	144
8.8	Muller's Method	148
8.9	Engineering Applications	153
8.10	Summary	154
8.11	Exercises	155
9	Optimization	157
9.1	Introduction	157
9.2	Golden-Mean Search	159
9.3	Newton's Method	166
9.4	Quadratic Optimization	169
9.5	Gradient Descent	172
9.6	Stochastic Optimization	179
9.7	Random Brute-Force Optimization	181
9.8	Simulated Annealing	183
9.9	Engineering Applications	187
9.10	Summary	188
9.11	Exercises	189
10	Differentiation	191
10.1	Introduction	191
10.2	Centered Divided-Difference Formulae	193
10.3	Forward and Backward Divided-Difference Formulae	198
10.4	Richardson Extrapolation	199
10.5	Second Derivatives	205
10.6	Unevenly Spaced Measurements	209
10.7	Inaccurate Measurements	211
10.8	Engineering Applications	214
10.9	Summary	215
10.10	Exercises	216

11	Integration	219
11.1	Introduction	219
11.2	Trapezoid Rule	220
11.2.1	Single Segment	220
11.2.2	Composite Trapezoid Rule	223
11.3	Romberg Integration Rule	228
11.4	Simpson's Rules	232
11.4.1	Simpson's 1/3 Rules	232
11.4.2	Simpson's 3/8 Rule	236
11.5	Gaussian Quadrature	239
11.6	Engineering Applications	246
11.7	Summary	247
11.8	Exercises	248
12	Initial Value Problems	251
12.1	Introduction	251
12.2	Euler's Method	252
12.3	Heun's Method	256
12.4	Fourth-Order Runge–Kutta Method	261
12.5	Backward Euler's Method	266
12.6	Systems of IVPs	271
12.7	Higher-Order ODEs	275
12.8	Engineering Applications	278
12.9	Summary	279
12.10	Exercises	280
13	Boundary Value Problems	285
13.1	Introduction	285
13.2	Shooting Method	286
13.3	Finite Difference Method	291
13.3.1	One-Dimensional Functions	291
13.3.2	Multidimensional Functions	296
13.4	Engineering Applications	303
13.5	Summary	304
13.6	Exercises	305
	Appendix A: Code and Pseudocode	307
	Appendix B: Answers to Exercises	319
	References	329
	Index	331

Numerical Methods and Modelling for Engineering

Khoury, R.; Harder, D.W.

2016, XVII, 332 p. 131 illus., 77 illus. in color.,

Hardcover

ISBN: 978-3-319-21175-6
