

Contents

1	Advances in Intelligent Decision-Making Technology Support. . . .	1
	Jeffrey W. Tweeddale, Gloria Phillips-Wren and Lakhmi C. Jain	
1.1	Introduction	2
1.2	Decision Support System	3
1.2.1	Data-Driven	4
1.2.2	Genetic Algorithms	4
1.2.3	Neural Networks.	5
1.2.4	Rule Based Systems	5
1.2.5	Fuzzy Logic.	5
1.2.6	Case Based Reasoning.	5
1.2.7	Machine Learning.	6
1.3	Intelligent Decision Support System	6
1.4	Contributions	8
1.5	Conclusion.	13
	References.	13
2	Asset Management Strategies: Risk and Transaction	
	Costs in Simulation.	17
	Roman Šperka	
2.1	Introduction	17
2.2	Literature Background.	18
2.3	Mathematical Model	21
2.3.1	Original Model.	21
2.3.2	Extension of Original Model	24
2.4	JADE Implementation	26
2.5	Simulation Results and Discussion	27
2.6	Conclusion.	29
	References.	29

3	Decision Support System for Energy Savings and Emissions Trading in Industrial Scenarios	31
	Maria Marques and Rui Neves-Silva	
3.1	Introduction	31
3.2	General Requirements	32
3.2.1	Requirements for Decision Support Services	33
3.3	Approach for Decision Support.	34
3.3.1	Categorization of LifeSaver Decision Support.	35
3.4	Methodology to Support Immediate Reaction	36
3.4.1	Decision Model	36
3.5	Methodology to Support Process Reconfiguration and ETS	38
3.5.1	Main Criteria for Process Reconfiguration and ETS	38
3.5.2	Decision Algorithm for Process Reconfiguration and ETS	39
3.6	Test Cases	41
3.6.1	Test Case 1: Decision Support for Immediate Reaction at Cement Production.	41
3.6.2	Test Case 2: Decision Support for Process Reconfiguration and ETS at Paint Production.	43
3.7	Discussion	45
3.8	Conclusions	46
	References.	46
4	A Parsimonious Radial Basis Function-Based Neural Network for Data Classification.	49
	Shing Chiang Tan, Chee Peng Lim and Junzo Watada	
4.1	Introduction	49
4.2	The Methodology	51
4.2.1	Radial Basis Function Network with the Dynamic Decay Adjustment Algorithm (RBFNDDA)	51
4.2.2	Fuzzy ARTMAP (FAM)	53
4.2.3	k -Harmonic Mean (k -HM) Algorithm	55
4.2.4	The Proposed RBFNDDA-FAMHM Model	56
4.3	The Experimental Study	57
4.3.1	Performance Comparison with RBFNDDA	57
4.3.2	Performance Comparison with Other Classifiers	58
4.4	Summary	59
	References.	59

5	Personalized Intelligent Mobility Platform: An Enrichment Approach Using Social Media	61
	Ruben Costa, Paulo Figueiras, Carlos Gutierrez and Luka Bradesko	
5.1	Introduction	62
5.2	Conceptual Approach	64
5.2.1	Technological Objectives	67
5.3	Related Work	67
5.4	Methodological Approach	70
5.4.1	Base Graph	70
5.4.2	Smart Graph.	72
5.4.3	Personalized Smart Graph	73
5.5	Methodology for Domain Knowledge Formalization	74
5.6	Knowledge Base Vocabulary Definition.	76
5.7	Approach for Extracting Real-Time Traffic Events from Twitter.	78
5.7.1	Preliminary Results	80
5.8	Mobile Traveling Companion.	81
5.9	Technological Architecture.	84
5.10	Conclusion.	84
	References.	86
6	Exploiting Alternative Knowledge Visualizations and Reasoning Mechanisms to Enhance Collaborative Decision Making.	89
	Spyros Christodoulou, Nikos Karacapilidis and Manolis Tzagarakis	
6.1	Introduction	89
6.2	Requirements and Challenges	91
6.3	Multi-criteria Decision Making	92
6.4	The Dicode Approach	93
6.5	Collaborative Decision Making in Dicode	94
6.5.1	Mind-Map View	95
6.5.2	The Formal Argumentation View	97
6.5.3	The Multi-criteria Decision Making View	98
6.6	Scenario of Use	102
6.7	Discussion and Conclusion.	105
	References.	106
7	Decision-Making in a Distributed and Dynamically Scalable Environments	107
	Jeffrey W. Tweedale	
7.1	Introduction	107
7.2	Background	110

7.3	Decision-Making Systems	113
7.4	Intelligent Decision Support System	115
7.5	Dynamic Environments	118
7.6	Conclusion.	121
	References.	121
8	Enhancing the Tactical Data Link Decision Support System	125
	Christos Sioutis	
8.1	Introduction	126
8.2	Network Monitoring and Management.	127
8.3	Modelling the TDLNM Decision Process.	130
8.4	Software Agent Design Patterns	133
8.5	Distributed Object Computing	134
8.6	Agent Architecture Framework (AAF).	136
8.7	Design of the Agent-Based Services	137
8.8	Conclusion.	138
	References.	138
9	AC³M: The Agent Coordination and Cooperation	
	Cognitive Model	141
	Angela Consoli	
9.1	Introduction	141
9.2	Background and Motivation	142
9.2.1	Intelligence, Organisational Theory and Distributed Artificial Intelligence (DAI)	143
9.2.2	Cognitive Science and Agency Theory	145
9.2.3	Coordination and Cooperation Methodologies.	146
9.2.4	Coordination Methodology of AC ³ M	146
9.2.5	Cooperation Methodology of AC ³ M	149
9.3	The Methodology of AC ³ M.	150
9.3.1	Design of AC ³ M's Multi-Agent Organisation and Environment	150
9.4	Implementation of AC ³ M	152
9.4.1	Multi-Agent Environment and Organisational Structure	153
9.4.2	Agent Model	155
9.5	The Frameworks of AC ³ M.	157
9.5.1	Stimulus/Perceptor Framework	157
9.5.2	Situational Assessment Framework	158
9.5.3	Decisional Support Framework.	158
9.6	Linking Coordination and Cooperation in AC ³ M	159
9.7	Application of AC ³ M	161
9.7.1	The Need for Enhanced Team Automation in Unmanned Vehicle Systems	161

9.7.2	Concept of Control	162
9.8	Conclusion and Future Work	165
	References.	166
10	Wind Rendering in 3D Modeling Landscape Scenes	169
	Margarita Favorskaya and Anastasia Tkacheva	
10.1	Introduction	169
10.2	Related Work	171
10.3	Tree Modeling Based on a Cloud of Laser Points and L-System.	173
10.4	Algorithms of Wind Rendering in Landscape Scenes.	177
10.4.1	Weak Wind Rendering	177
10.4.2	Rendering of Middle Speed Wind.	178
10.4.3	Storm Rendering.	179
10.5	Software Tool and Experimental Results	180
10.6	Conclusion.	181
	References.	181
11	Extending the Service Oriented Architecture to Include a Decisional Components	185
	Fatima Boumahdi and Rachid Chalal	
11.1	Introduction	185
11.2	State of the Art.	187
11.3	Discussion	188
11.4	The Decision-Making Processes in the Organizations	189
11.5	Dimensions of SOAda.	190
11.5.1	Conceptual Dimension.	190
11.5.2	Architectural Dimension	191
11.6	Case study.	192
11.7	Contribution.	196
11.8	Conclusion and Future Work	198
	References.	198
12	An Extended Dependability Case to Share Responsibility Knowledge	201
	T. Saruwatari, T. Hoshino and S. Yamamoto	
12.1	Introduction	202
12.2	Related Work	202
12.3	Dependability Case	203
12.3.1	The 'd* Framework'	203
12.4	Introduction of a Responsibility Attribute in Dependability Cases	205
12.4.1	Concept of Responsibility	205
12.4.2	Meta Model of Responsibility Attribute.	206

12.4.3	Notation	208
12.4.4	Examples.	208
12.5	Discussions	212
12.5.1	Organizational Structure and Dependability Cases.	212
12.5.2	Actor and Agent.	212
12.5.3	Notational Extensions of d* framework	213
12.5.4	Meta Model	213
12.5.5	Applicability	213
12.5.6	Limitation	214
12.6	Conclusion.	214
	References.	215
13	Designing a Hybrid Recommendation System for TV Content.	217
	Na Chang, Mhd Irvan and Takao Terano	
13.1	Introduction	217
13.2	Related Work.	218
13.3	Framework of TV Content Recommendation System.	221
13.3.1	The Content Analysis Component.	222
13.3.2	The User Analysis Component	223
13.3.3	The Preference Learning Component.	224
13.4	Important Design Issues.	225
13.4.1	Diversity	225
13.4.2	Novelty	226
13.4.3	Explanation	226
13.4.4	Group Recommendations	226
13.5	Final Remarks	227
	References.	227
14	Incompleteness and Fragmentation: Possible Formal Cues to Cognitive Processes Behind Spoken Utterances	231
	L. Hunyadi, H. Kiss and I. Szekrenyes	
14.1	A Generative Model of Human–Human Communication	232
14.1.1	The Scheme of the Generative Theoretical-Technological Model	233
14.1.2	Structural Primitives as Minimal Building Blocks	234
14.1.3	Primitives Realized as Markers.	234
14.1.4	Noisy Markers with Cognitive Bias in the Decision.	234
14.2	The Annotation of Spoken Syntax of Hungarian in the HuComTech Corpus.	235
14.2.1	Principles of Syntactic Annotation	236
14.2.2	The Taxonomy of Syntactic Annotation.	237
14.2.3	What the Syntactic Data Suggest	238

14.3	Spoken Syntax Versus the Non-verbal Modalities of Prosody	242
14.3.1	Spoken Syntax Versus Prosody	242
14.3.2	Duration	243
14.3.3	Intonation and Intensity	247
14.3.4	Establishing a More Comprehensive Relation Between Spoken Syntax and Prosody Beyond Duration	249
14.4	Spoken Syntax Versus the Non-verbal Modality of Gesturing	250
14.4.1	Gestures and Pauses	251
14.4.2	The Temporal Alignment of Gestures and Clauses	252
14.5	Conclusions	255
	References.	256
