

Contents

1	Biochronological Scales	1
1.1	Introduction	1
1.2	Discrete Biochronological Time Scales	1
1.3	Diachronism of Datums and Interval Zones	4
1.4	Helly's Theorem.	5
1.5	Relative Abundance Zones.	6
1.6	Reproducibility, Superpositional Control and UA Zones	7
	References.	7
2	Graph Theoretical Approach	9
2.1	Representing Stratigraphic Relationships	10
2.2	Definitions	10
2.2.1	Graph	10
2.2.2	The Non Oriented Graph G	10
2.2.3	The Adjacency Matrix of G	11
2.2.4	The Oriented Graph G_s	12
2.2.5	The Biostratigraphic Graph G^*	12
2.2.6	The Complementary Graph G^c	13
2.2.7	Maximal Horizons and Residual Maximal Horizons	13
2.3	Basic Technical Terms	13
2.3.1	Chain, Circuit and Chord.	13
2.3.2	Path, Maximal Path, Cycle and Strongly Connected Graph	14
2.3.3	Subgraphs, Generated Subgraphs and Strong Components	14
2.3.4	Semi-oriented Circuit	15
2.3.5	Orientation of a Graph.	15
2.3.6	Clique, Maximal Clique and Unitary Association	17
2.3.7	Incidence Matrix and Maximal Clique Matrix.	17
2.3.8	Consecutive 1's Property	18

2.3.9	Triangular Matrix	18
2.3.10	Triangulated Graph	18
2.3.11	Forbidden Generated Subgraph	18
2.3.12	Asteroidal Triple	18
2.3.13	Interval	18
2.3.14	Intersection Graph	19
2.3.15	Interval Graph	19
	References	20
3	Interval Graphs and Stratigraphic Contradictions	21
3.1	Main Characterizations	21
3.2	Fulkerson and Gross (1965)	21
3.2.1	Discussion	21
3.3	Gilmore and Hoffman (1964)	22
3.3.1	Discussion	22
3.4	Lekkerkerker and Boland (1962)	23
3.4.1	Discussion	23
3.4.2	Technical Remark: Difference Between a Maximal Clique and a Unitary Association	24
3.5	Guex (1987)	24
3.6	Technical Remark About Composite Sections	26
	References	26
4	The UA Method and the UAGraph Program	27
4.1	Introduction	27
4.2	The Ilerdian Alveolinids from Yougoslavia	27
4.3	Graphical User Interface and Tools Provided by the UAGraph Program	28
4.3.1	Description	28
4.3.2	Input of the Data	29
4.3.3	Special Choices	31
4.4	The UA-Method	33
4.4.1	Constructing Maximal Cliques of G^*	33
4.4.2	Example	34
4.5	Stratigraphic Relationships Among the Maximal Cliques	34
4.5.1	The Three Main Kinds	34
4.5.2	Example	35
4.5.3	Searching for and Eliminating Contradictions	36
4.5.4	Technical Remark About the Optimal Preservation of the Initial Arcs of G^*	38
4.5.5	Strongly Connected Components of G_k	40
4.6	Maximal Paths of G_k	41
4.7	Reduction of G_k to a Unique Path	42

4.8	“Dead Ends” and “Islands” of G_k	43
4.9	Threshold Value for Merging the Cliques	43
4.10	Rescue of Lost Cliques Sandwiched Between Two Cliques in L	44
4.11	Calculation of Possible Range of a Lost Clique	44
4.12	Longest Maximal Path and Unitary Associations.	45
4.13	Residual Virtual Edges	46
4.14	Residual Arcs.	47
4.15	Identification of Unitary Associations and Correlations	48
	References.	49
5	Transgressive-Regressive Cycles and Benthic Foraminifera.	51
5.1	Introduction	51
5.2	Database	53
5.3	Processing the Data.	53
5.4	Geometry of Lithologic Units.	53
	References.	55
6	Problems of Datums Diachronism and Comparison Between UAgaph and the Program Conop	57
