

Contents

Part I Historical Perspective

Meinhard Kuna: Physics and Engineering at the Crack Tip—A Retrospective.	3
Geralf Hütter and Lutz Zybell	

Experimental and Numerical Fracture Mechanics—An Individually Dyed History.	23
Wolfgang Brocks and Karl-Heinz Schwalbe	

Part II Applications

Fracture Mechanics Assessment of Welded Components at Static Loading.	61
Peter Hübner and Uwe Zerbst	

Application of Fracture Mechanics for the Life Prediction of Critical Rotating Parts for Aero Engines	87
M. Springmann, M. Schurig, D. Hünert, W. Rothkegel and H. Schlums	

Consideration of Fatigue Crack Growth Aspects in the Design and Assessment of Railway Axles	103
Igor Varfolomeev and Michael Luke	

Part III Fracture Testing

Assessment of Material Properties by Means of the Small Punch Test.	127
Martin Abendroth and Stefan Soltysiak	

Determination of Fracture Mechanics Parameters for Cast Iron Materials Under Static, Dynamic and Cyclic Loading	159
G. Pusch, S. Henkel, H. Biermann, P. Hübner, A. Ludwig, P. Trubitz, T. Mottitschka and L. Krüger	
On the Development of Experimental Methods for the Determination of Fracture Mechanical Parameters of Ceramics.	197
Robert Danzer, Tanja Lube and Stefan Rasche	
Transition from Flat to Slant Fracture in Ductile Materials.	215
William F. Hickey and Krishnaswamy Ravi-Chandar	
 Part IV Smart Materials	
Interaction of Cracks and Domain Structures in Thin Ferroelectric Films	239
D. Schrade, R. Müller and D. Gross	
Modeling Approaches to Predict Damage Evolution and Life Time of Brittle Ferroelectrics	257
Andreas Ricoeur, Stephan Lange and Roman Gellmann	
Numerical Analysis of Interface Cracks in Layered Piezoelectric Solids	283
Michael Wünsche, Chuanzeng Zhang, Jan Sladek and Vladimir Sladek	
 Part V Analytical Mechanics	
Crack-Tip Fields of a Crack Impinging upon the Yielding/Debonding Slippage in Anisotropic Body	303
Qun Li, Junling Hou, Guangyan Liu and Hong Zuo	
On Conservation Laws and Reciprocity in Configurational Mechanics.	319
R. Kienzler and S. Boettcher	
 Part VI Local Approach to Fracture	
A Model for Predicting Fracture Toughness and Scatter in Thermally Embrittled Steels.	337
A. Pineau and A. Andrieu	

Micromechanical-Based Models for Describing Damage of Ferritic Steels	353
Michael Seidenfuss and Thomas Linse	
Recent Trends in the Development of Gurson’s Model	417
Jacek Jackiewicz	

Recent Trends in Fracture and Damage Mechanics

Hütter, G.; Zymbell, L. (Eds.)

2016, IX, 442 p., Hardcover

ISBN: 978-3-319-21466-5
