|          |  |           |
|----------|--|-----------|
| <b>1</b> | <b>Accessible Parameters for Satellite MCW Radiometers and Their Relationship with Ocean–Atmosphere Interactions . . . . .</b>                   | <b>1</b>  |
| 1.1      | Methods for Surface Heat Flux Analysis Using Radiometric Measurements . . . . .  | 1         |
| 1.1.1    | Traditional Approach . . . . .   | 1         |
| 1.1.2    | Alternative Approach . . . . .   | 4         |
| 1.2      | Parameters of Heat Interchange in the SOA, Which are Directly Determined by Satellite MCW Radiometry . . . . .                                   | 7         |
| 1.2.1    | History of Satellite MCW Radiometry Development . . . . .  | 7         |
| 1.2.2    | Relationship Between Natural MCW Radiation and the Ocean Surface Temperature . . . . .   | 8         |
| 1.2.3    | Estimating the Accuracy of Ocean Surface Temperature Determinations . . . . .  | 11        |
| 1.3      | Potential of Satellite MCW Radiometric Methods for Determining Meteorological Parameters of the Near-Surface Atmosphere. . . . .                 | 13        |
| 1.3.1    | Climatic and Seasonal Scales . . . . .   | 13        |
| 1.3.2    | Synoptic Scales . . . . .  | 17        |
| 1.4      | Conclusion . . . . .   | 19        |
|          | References . . . . .   | 20        |
| <b>2</b> | <b>Modeling the SOA’S MCW and IR Radiation Characteristics and Their Relationship with Surface Heat Fluxes at Synoptic Time Scales . . . . .</b> | <b>25</b> |
| 2.1      | Modeling the SOA’s Brightness Temperature with ATLANTEX-90 Vessel Experiment Data . . . . .  | 25        |
| 2.1.1    | Description of the Initial Data . . . . .  | 25        |
| 2.1.2    | Model of the SOA’s Natural Radiation with Microwaves and Infrareads . . . . .  | 26        |

|          |   |           |
|----------|---|-----------|
| 2.2      | SOA Brightness Temperature Contrasts and Their Comparison with Heat Fluxes . . . . .  | 28        |
| 2.2.1    | Calculations of SOA Brightness Temperature at Microwaves . . . . .  | 28        |
| 2.2.2    | Relationship Between the SOA's Brightness Temperature and Heat Fluxes. . . . .  | 29        |
| 2.2.3    | Computation of the Brightness Temperature Response to the Heat Fluxes Variations. . . . .   | 33        |
| 2.3      | Analysis of the Factors Forming the Relationship Between Natural MCW Radiation and Heat Characteristics of the SOA . . . . .  | 35        |
| 2.3.1    | Parameters and Mechanisms that Form Relationships Between the Brightness Temperature and Surface Heat Fluxes . . . . .  | 35        |
| 2.3.2    | Response of the SOA Heat and MCW Radiation Characteristics on Midlatitude Cyclone Passage . . . . .   | 39        |
| 2.4      | Conclusions. . . . .  | 41        |
|          | References . . . . .  | 42        |
| <b>3</b> | <b>Search for the Direct Relationship Between Heat Fluxes and the Parameters Associated with the SOA Brightness Temperature . . . . .</b>                           | <b>43</b> |
| 3.1      | Analysis of the Relationships Between Total Water Vapor Content in the Atmosphere and Heat Fluxes (ATLANTEX-90 Experiment). . . . .                                 | 43        |
| 3.1.1    | Problem Statement . . . . .   | 43        |
| 3.1.2    | Analysis of Meteorological and Aerologic Data from the ATLANTEX-90 Experiment. . . . .  | 44        |
| 3.1.3    | Reconstruction of the Bulk Formulas . . . . .   | 46        |
| 3.2      | The Role of Near-Surface Wind in Heat Flux Determinations. . . . .  | 49        |
| 3.2.1    | Specific Objective . . . . .  | 49        |
| 3.2.2    | Results of the Analysis on the Influence of the Wind Factor. . . . .  | 49        |
| 3.3      | Relationships Between Monthly Mean Ocean–Atmosphere Temperature Differences and MCW and IR Radiation Intensity of the SOA. . . . .                                  | 51        |
| 3.3.1    | Statement of the Problem . . . . .  | 51        |
| 3.3.2    | Approximations and Limitations Used. . . . .  | 52        |
| 3.3.3    | Relationships Between the SOA's Natural Radiation and the Near-Surface Atmosphere Characteristics . . . . .   | 53        |
| 3.3.4    | Relationships Between Monthly Mean Differences of the Ocean Surface and Atmosphere Near-Surface Temperatures and the Intensity of SOA's Natural Radiation . . . . . | 55        |

|          |  |           |
|----------|--|-----------|
| 3.4      | Brightness Temperature as a Characteristic of Seasonal and Interannual Dynamics of Ocean–Atmosphere Heat Interaction . . . . .   | 57        |
| 3.4.1    | $t_s$ , $t_a$ Loops as Characteristics of Heat Exchange Between the Ocean and Atmosphere . . . . .   | 57        |
| 3.4.2    | Using Brightness Temperature Loops to Estimate Annual Heat Fluxes . . . . .  | 58        |
| 3.5      | Conclusion . . . . .   | 61        |
|          | References . . . . .   | 61        |
| <b>4</b> | <b>Influence of Vertical Heat Transfer on the Relationships Between the SOA MCW and IR Radiation Intensity and Surface Heat Fluxes: Modeling . . . . .</b>                             | <b>63</b> |
| 4.1      | Model of Heat Interaction Between the Oceanic and Atmospheric Boundary Layers . . . . .  | 63        |
| 4.2      | Parameterized Radiation Model of the SOA for Microwaves and Infrareads . . . . .   | 66        |
| 4.3      | Numerical Analysis of the Dynamics of Thermal and Electromagnetic Fluxes and Their Correlations . . . . .  | 67        |
| 4.4      | Conclusion . . . . .   | 72        |
|          | References . . . . .   | 72        |
| <b>5</b> | <b>Influence of Horizontal Heat Transfer in the Atmosphere Boundary Layer on the Relationship Between the SOA's Brightness Temperature and Surface Heat Fluxes: Modeling . . . . .</b> | <b>73</b> |
| 5.1      | Dependence of the Atmosphere Boundary Layer's Meteorological Structure on Horizontal Heat Transfer . . . . .   | 73        |
| 5.1.1    | Objectives and Approach . . . . .  | 73        |
| 5.1.2    | Heat and Moisture Transfer Model . . . . .   | 74        |
| 5.1.3    | Description of the Numerical Experiment . . . . .  | 75        |
| 5.1.4    | Results of the Computation of the ABL Vertical Meteorological Structure . . . . .  | 76        |
| 5.2      | Response of the SOA's Brightness Temperature to ABL Temperature Changes and Humidity Characteristics . . . . .   | 79        |
| 5.3      | Conclusion . . . . .   | 83        |
|          | References . . . . .   | 83        |
| <b>6</b> | <b>Experimental Studies of the Relationships Between SOA Radiation and Heat Characteristics in the Synoptic Range of Time Scales . . . . .</b>   | <b>85</b> |
| 6.1      | Laboratory Study of the Response of Natural MCW and IR Radiation from the Water Surface to Its Upper Layer Enthalpy . . . . .  | 85        |
| 6.1.1    | Matter of the Study . . . . .  | 85        |
| 6.1.2    | Description of the Experiment and Its Results . . . . .  | 86        |

|          |  |            |
|----------|--|------------|
| 6.2      | Experimental Studies of the Relationships Between the Brightness Temperature, Heat, Moisture, and Impulse Fluxes with Satellite Data and Vessel Measurements . . . . . | 88         |
| 6.2.1    | SSM/I Radiometer of the DMSP Satellites. . . . .   | 88         |
| 6.2.2    | Results of Modeling Synoptic Variations of SOA Brightness Temperatures and Their Comparison with Satellite Measurements. . . . .                                       | 90         |
| 6.2.3    | Relationships Between the SSM/I-Derived Brightness Temperatures with the Near-Surface Fluxes of Heat and Impulse. . . . .  | 93         |
| 6.2.4    | Stability of the Relationships Between Satellite and Vessel Estimates of Heat and Impulse Fluxes . . . .   | 95         |
| 6.3      | Experimental Studies of Relationships Between the Brightness Temperatures and SOA Parameters in Front Zones. . . . .   | 98         |
| 6.3.1    | Synoptic Variability of the SOA Parameters and Brightness Temperature in the Subpolar Hydrological Front . . . . .   | 98         |
| 6.3.2    | Features of Atmospheric Dynamics Observed in the SHF Region . . . . .  | 100        |
| 6.3.3    | Relationship of the Brightness Temperature and Wind Direction in the SHF . . . . .   | 102        |
| 6.4      | Conclusions. . . . .   | 107        |
