

# Contents

<b>1</b>	<b>A New Science of Heat</b>	<b>1</b>
1.1	Introduction	1
1.2	Reading: Fourier, <i>The Analytical Theory of Heat</i>	3
1.2.1	Preliminary Discourse	3
1.3	Study Questions	11
1.4	Exercises	12
1.5	Vocabulary	12
<b>2</b>	<b>Mathematics and Temperature</b>	<b>15</b>
2.1	Introduction	15
2.2	Reading: Fourier, <i>The Analytical Theory of Heat</i>	16
2.2.1	Statement of the Object of the Work	16
2.3	Study Questions	24
2.4	Exercises	25
2.5	Vocabulary	27
<b>3</b>	<b>Steam Engines and Heat Flow</b>	<b>29</b>
3.1	Introduction	29
3.2	Reading: Carnot, <i>Reflections on the Motive Power of Heat, and on Machines Fitted to Develop that Power</i>	31
3.3	Study Questions	40
3.4	Exercises	41
3.5	Vocabulary	44
<b>4</b>	<b>Carnot's Cycle</b>	<b>45</b>
4.1	Introduction	45
4.2	Reading: Carnot, <i>Reflections on the Motive Power of Heat, and on Machines Fitted to Develop that Power</i>	46
4.3	Study Questions	52
4.4	Exercises	53
4.5	Vocabulary	54

<b>5</b>	<b>Engines as Thermometers</b> .....	55
5.1	Introduction .....	55
5.2	Reading: Kelvin, <i>On an Absolute Thermometric Scale Founded on Carnot's Theory of the Motive Power of Heat, and Calculated from Regnault's Observations</i> .....	57
5.3	Study Questions .....	62
5.4	Exercises .....	63
5.5	Vocabulary .....	67
<b>6</b>	<b>The Second Law of Thermodynamics</b> .....	69
6.1	Introduction .....	69
6.2	Reading: Clausius, <i>the Mechanical Theory of Heat</i> .....	71
6.3	Study Questions .....	78
6.4	Exercises .....	79
6.5	Vocabulary .....	80
<b>7</b>	<b>Work, Heat, and Irreversibility</b> .....	81
7.1	Introduction .....	81
7.2	Reading: Clausius, <i>The Mechanical Theory of Heat</i> .....	82
7.3	Study Questions .....	90
7.4	Exercises .....	90
7.5	Vocabulary .....	91
<b>8</b>	<b>Language: Concepts and Conventions</b> .....	93
8.1	Introduction .....	93
8.2	Reading: Clausius, <i>The Mechanical Theory of Heat</i> .....	94
8.3	Study Questions .....	97
8.4	Vocabulary .....	98
<b>9</b>	<b>Energy and Entropy</b> .....	99
9.1	Introduction .....	99
9.2	Reading: Clausius, <i>The Mechanical Theory of Heat</i> .....	99
9.3	Study Questions .....	109
9.4	Exercises .....	110
9.5	Vocabulary .....	111
<b>10</b>	<b>The Kinetic Theory of Gases</b> .....	113
10.1	Introduction .....	113
10.2	Reading: Maxwell, <i>on the Molecular Theory of the Constitution of Bodies</i> .....	114
10.2.1	On the Kinetic Theory of Gases .....	117
10.2.2	Distribution of Kinetic Energy Between Two Different Sets of Molecules .....	119
10.2.3	Internal Kinetic Energy of a Molecule .....	119
10.2.4	Definition of the Velocity of a Gas .....	120

10.2.5	Theory of the Pressure of a Gas	121
10.2.6	Law of Boyle	123
10.2.7	Law of Gay-Lussac	123
10.3	Study Questions	124
10.4	Exercises	125
10.5	Vocabulary	126
<b>11</b>	<b>Molecules and Maxwell's Demon</b>	<b>127</b>
11.1	Introduction	127
11.2	Reading: Maxwell, <i>on the Molecular Theory of the Constitution of Bodies</i>	128
11.2.1	Law of Charles	128
11.2.2	Kinetic Energy of a Molecule	128
11.2.3	Specific Heat at Constant Volume	129
11.2.4	Molecular Theory of Evaporation and Condensation	132
11.2.5	Molecular Theory of Electrolysis	133
11.2.6	Molecular Theory of Radiation	134
11.2.7	Limitation of the Second Law of Thermodynamics	135
11.2.8	Nature and Origin of Molecules	137
11.3	Study Questions	138
11.4	Exercises	140
11.5	Vocabulary	142
<b>12</b>	<b>The Diffusion Equation</b>	<b>143</b>
12.1	Introduction	143
12.2	Reading: Maxwell, <i>On the Diffusion of Heat by Conduction</i>	144
12.2.1	On the Dimensions of $k$ , the Specific Thermal Conductivity	145
12.2.2	On the Determination of the Thermal Conductivity of Bodies	153
12.2.3	On the Conductivity of Fluids	155
12.2.4	Applications of the Theory	156
12.3	Study Questions	157
12.4	Exercises	158
12.5	Vocabulary	162
<b>13</b>	<b>Radiant Heat</b>	<b>163</b>
13.1	Introduction	163
13.2	Reading: Maxwell, <i>On Radiation</i>	163
13.2.1	Effect of Radiation on Thermometers	174
13.3	Study Questions	175
13.4	Exercises	176
13.5	Vocabulary	178

<b>14</b>	<b>From Positivism to Objectivity</b> .....	181
14.1	Introduction .....	181
14.2	Reading: Planck, <i>Reversibility and Irreversibility</i> .....	182
14.3	Study Questions .....	194
14.4	Exercises .....	196
14.5	Vocabulary .....	196
<b>15</b>	<b>Entropy, Probability and Atomism</b> .....	197
15.1	Introduction .....	197
15.2	Reading: Planck, <i>The Atomic Theory of Matter</i> .....	197
15.3	Study Questions .....	208
15.4	Exercises .....	210
15.5	Vocabulary .....	212
<b>16</b>	<b>Corpuscles of Light</b> .....	213
16.1	Introduction .....	213
16.2	Reading: Einstein, <i>Concerning a Heuristic Point of View Toward the Emission and Transformation of Light</i> .....	214
16.2.1	Concerning a Difficulty with Regard to the Theory of Blackbody Radiation .....	215
16.2.2	Concerning Planck's Determination of the Fundamental Constants .....	218
16.2.3	Concerning the Entropy of Radiation .....	218
16.2.4	Asymptotic Form for the Entropy of Monochromatic Radiation at Low Radiation Density .....	220
16.2.5	Molecular-Theoretic Investigation of the Dependence of the Entropy of Gases and Dilute Solutions on the Volume ..	221
16.2.6	Interpretation of the Expression for the Volume Dependence of the Entropy of Monochromatic Radiation in Accordance with Boltzmann's Principle .....	222
16.2.7	Concerning Stoke's Rule .....	223
16.2.8	Concerning the Emission of Cathode Rays Through the Illumination of Solid Bodies .....	224
16.2.9	Concerning the Ionization of Gases by Ultraviolet Light . . .	226
16.3	Study Questions .....	227
16.4	Exercises .....	228
16.5	Vocabulary .....	229
<b>17</b>	<b>The Discovery of the Electron</b> .....	231
17.1	Introduction .....	231
17.2	Reading: Thomson, <i>The Corpuscular Theory of Matter</i> .....	232
17.2.1	Corpuscles in Vacuum Tubes .....	233
17.2.2	Deflection of the Rays by a Charged Body .....	235
17.2.3	Determination of $e/m$ .....	237
17.2.4	Corpuscles Very Widely Distributed .....	239

17.2.5 Magnitude of the Electric Charge Carried by the Corpuscle .....	239
17.3 Study Questions .....	243
17.4 Exercises .....	244
17.5 Vocabulary .....	246
<b>18 The Birth of Nuclear Physics .....</b>	<b>247</b>
18.1 Introduction .....	247
18.2 Reading: Rutherford, <i>The Mass and Velocity of the</i> <i><math>\alpha</math> Particles Expelled from Radium and Actinium</i> .....	248
18.2.1 Electric Deflexion of the $\alpha$ Rays .....	250
18.2.2 Theory of the Experiment .....	252
18.2.3 Results of Experiments .....	257
18.2.4 Does the Value of $\frac{e}{m}$ for the $\alpha$ Particle Vary in Its Passage Through Matter? .....	259
18.3 Study Questions .....	260
18.4 Exercises .....	260
18.5 Vocabulary .....	261
<b>19 Radioactivity .....</b>	<b>263</b>
19.1 Introduction .....	263
19.2 Reading: Rutherford, <i>The Mass and Velocity of the <math>\alpha</math> Particles</i> <i>Expelled from Radium and Actinium</i> .....	263
19.2.1 Value of $e/m$ for the $\alpha$ Particles from Radium A .....	264
19.2.2 Mass of the $\alpha$ Particle from Radium F .....	265
19.2.3 Mass of the $\alpha$ Particles from Actinium .....	265
19.2.4 Connexion of the $\alpha$ Particle with the Helium Atom .....	267
19.2.5 Age of Radioactive Minerals .....	270
19.2.6 Velocity and Energy of the $\alpha$ Particles Expelled from Radium Products .....	271
19.2.7 Connexion between the Velocity and Amount of Ionization Produced by the $\alpha$ Particle .....	272
19.3 Study Questions .....	273
19.4 Exercises .....	274
19.5 Vocabulary .....	277
<b>20 Atomic Fission .....</b>	<b>279</b>
20.1 Introduction .....	279
20.2 Reading: Rutherford, <i>Nuclear Constitution of Atoms</i> .....	280
20.2.1 Introduction .....	280
20.2.2 Charge on the Nucleus .....	282
20.2.3 Dimension of Nuclei .....	284
20.2.4 Long Range Particles from Nitrogen .....	285
20.2.5 Experiments with Solid Nitrogen Compounds .....	290
20.3 Study Questions .....	292

20.4 Exercises .....	293
20.5 Vocabulary .....	294
<b>21 Nuclear Structure .....</b>	<b>295</b>
21.1 Introduction .....	295
21.2 Reading: Rutherford, <i>Nuclear Constitution of Atoms</i> .....	295
21.2.1 Short Range Atoms from Oxygen and Nitrogen .....	296
21.2.2 Energy Considerations .....	299
21.2.3 Properties of the New Atom .....	301
21.2.4 Constitution of Nuclei and Isotopes .....	302
21.2.5 Structure of Carbon, Oxygen, and Nitrogen Nuclei .....	305
21.3 Study Questions .....	307
21.4 Exercises .....	308
21.5 Vocabulary .....	308
<b>22 The Discovery of the Neutron .....</b>	<b>309</b>
22.1 Introduction .....	309
22.2 Reading: Chadwick, <i>The Existence of a Neutron</i> .....	310
22.2.1 Observations of Recoil Atoms .....	312
22.2.2 The Neutron Hypothesis .....	315
22.3 Study Questions .....	318
22.4 Exercises .....	319
22.5 Vocabulary .....	319
<b>23 Neutron Scattering .....</b>	<b>321</b>
23.1 Introduction .....	321
23.2 Reading: Chadwick, <i>The Existence of a Neutron</i> .....	322
23.2.1 The Nature of the Neutron .....	322
23.2.2 The Passage of the Neutron Through Matter .....	323
23.2.3 General Remarks .....	326
23.2.4 Summary .....	328
23.3 Study Questions .....	329
23.4 Exercises .....	329
23.5 Vocabulary .....	330
<b>24 X-Ray Diffraction .....</b>	<b>331</b>
24.1 Introduction .....	331
24.2 Reading: Compton, <i>X-Rays as a Branch of Optics</i> .....	332
24.2.1 The Refraction and Reflection of X-Rays .....	333
24.2.2 The Diffraction of X-Rays .....	336
24.3 Study Questions .....	341
24.4 Exercises .....	341
24.5 Vocabulary .....	342

<b>25</b>	<b>Compton Scattering</b> .....	345
25.1	Introduction .....	345
25.2	Reading: Compton, <i>X-Rays as a Branch of Optics</i> .....	345
25.2.1	The Scattering of X-rays and Light .....	346
25.3	Study Questions .....	351
25.4	Exercises .....	352
25.5	Vocabulary .....	353
<b>26</b>	<b>Electron Scattering and Diffraction</b> .....	355
26.1	Introduction .....	355
26.2	Reading: Davisson, <i>The Diffraction of Electrons by a Crystal of Nickel</i> .....	356
26.3	Study Questions .....	362
26.4	Exercises .....	363
26.5	Vocabulary .....	364
<b>27</b>	<b>Matter Waves</b> .....	365
27.1	Introduction .....	365
27.2	Reading: Davisson, <i>The Diffraction of Electrons by a Crystal of Nickel</i> .....	366
27.3	Study Questions .....	373
27.4	Exercises .....	374
27.5	Vocabulary .....	375
<b>28</b>	<b>Bohr's Atomic Model</b> .....	377
28.1	Introduction .....	377
28.2	Reading: Bohr, <i>The Structure of the Atom</i> .....	378
28.2.1	The General Picture of the Atom .....	378
28.2.2	Atomic Stability and Electrodynamics Theory .....	381
28.2.3	The Origin of the Quantum Theory .....	382
28.2.4	The Quantum Theory of Atomic Constitution .....	384
28.2.5	The Hydrogen Spectrum .....	386
28.3	Study Questions .....	388
28.4	Exercises .....	389
28.5	Vocabulary .....	391
<b>29</b>	<b>Atomic Spectra and Quantum Numbers</b> .....	393
29.1	Introduction .....	393
29.2	Reading: Bohr, <i>The Structure of the Atom</i> .....	394
29.2.1	Relationships Between the Elements .....	394
29.2.2	Absorption and Excitation of Spectral Lines .....	398
29.2.3	The Quantum Theory of Multiply-Periodic Systems .....	399
29.2.4	The Correspondence Principle .....	401
29.3	Study Questions .....	405
29.4	Exercises .....	405
29.5	Vocabulary .....	406

<b>30</b>	<b>The Periodic Table of the Elements</b> .....	409
30.1	Introduction .....	409
30.2	Reading: Bohr, <i>The Structure of the Atom</i> .....	409
30.2.1	The Natural System of the Elements .....	410
30.2.2	X-Ray Spectra and Atomic Constitution .....	416
30.3	Study Questions .....	420
30.4	Exercises .....	420
30.5	Vocabulary .....	422
<b>31</b>	<b>Wave Mechanics</b> .....	423
31.1	Introduction .....	423
31.2	Reading: Schrödinger, <i>The Fundamental Idea of Wave Mechanics</i> ..	424
31.3	Study Questions .....	434
31.4	Exercises .....	435
31.5	Vocabulary .....	440
<b>32</b>	<b>The Quantum Paradox</b> .....	443
32.1	Introduction .....	443
32.2	Reading: Heisenberg, <i>The Copenhagen Interpretation of Quantum Theory</i> .....	445
32.3	Study Questions .....	452
32.4	Exercises .....	454
32.5	Vocabulary .....	456
	<b>Bibliography</b> .....	457
	<b>Index</b> .....	459
