

Contents

1	Introduction	1
1.1	A Pedagogical Introduction to Algebraic Quantum Field Theory on Curved Spacetimes	1
1.2	Outline of the Cosmological Applications	7
1.2.1	The Cosmological Expansion in QFT on Curved Spacetimes	7
1.2.2	A Birds-Eye View of Perturbations in Inflation	9
	References	11
2	Algebraic Quantum Field Theory on Curved Spacetimes	13
2.1	Globally Hyperbolic Spacetimes and Related Geometric Notions	13
2.2	Linear Classical Fields on Curved Spacetimes	18
2.2.1	Models Without Gauge Symmetry	18
2.2.2	Models with Gauge Symmetry	27
2.3	Linear Quantum Fields on Curved Spacetimes	33
2.4	Hadamard States	38
2.5	Locality and General Covariance	50
2.6	The Quantum Stress-Energy Tensor and the Semiclassical Einstein Equation	54
2.6.1	Local and Covariant Wick Polynomials	55
2.6.2	The Semiclassical Einstein Equation and Wald's Axioms	61
2.6.3	A Conserved Quantum Stress-Energy Tensor	66
2.7	Further Reading	70
	References	70

3	Cosmological Applications	77
3.1	A Brief Introduction to Cosmology	77
3.2	The Cosmological Expansion in QFT on Curved Spacetimes	81
3.2.1	The Renormalisation Freedom of the Quantum Stress-Energy Tensor in the Context of Cosmology	82
3.2.2	States of Interest in Cosmological Spacetimes	84
3.2.3	Setup and (Computational) Strategy for Approximately Solving the Semiclassical Einstein Equation	88
3.2.4	Computation of the Energy Density	92
3.2.5	Deviations from the Standard Model and Their Phenomenological Consequences: εJ_{00} and Dark Radiation	98
3.3	A Birds-Eye View of Perturbations in Inflation	105
3.3.1	The Linearised Einstein-Klein-Gordon System on General Curved Spacetimes	106
3.3.2	The Standard Approach to Perturbations in Inflation and Comparison of Approaches	113
	References	118
	Index	121

Cosmological Applications of Algebraic Quantum Field
Theory in Curved Spacetimes

Hack, Th.-P.

2016, VIII, 123 p. 4 illus., Softcover

ISBN: 978-3-319-21893-9
