Contents

1 Introduction and Literature Review 1
1.1 The Standard Model of Particle Physics 4
1.2 The Particles in the SM 5
1.3 The Interactions in the SM 7
1.3.1 The Electroweak Interaction 8
1.3.2 The Strong Interaction 12
1.4 Possible Scenarios Beyond the Standard Model 24
References 26

2 A Hadronic Collision 29
2.1 Formalism of a Hadronic Cross Section: The Factorization Theorem 30
2.2 Hard Scattering and Matrix Element 32
2.2.1 Matching Between Matrix Element and Parton Shower 33
2.3 Definition of the Underlying Event and Multiple Parton Interactions 34
2.3.1 Measurements of UE and MPI at Colliders 36
2.4 Double Parton Scattering 38
2.4.1 Theory of Double Parton Scattering 39
2.4.2 Measurements of Double Parton Scattering at Colliders 41
2.4.3 DPS in Four-Jet Channels 42
2.5 Monte Carlo Event Generators 43
2.5.1 Models of Multiple Parton Interaction 45
References 50

3 The CERN Large Hadron Collider and the Compact Muon Solenoid Experiment 53
3.1 The Large Hadron Collider 53
3.2 The Compact Muon Solenoid Detector 58
3.2.1 Definition of the Experimental Coordinate System 58
3.3 Data Taking and Luminosity in Phase I of Data Taking 59
3.4 The Tracking System. 61
3.5 The Calorimetry System 63
3.5.1 The Electromagnetic Calorimeter 64
3.5.2 The Hadronic Calorimeter 65
3.6 The Magnet 67
3.7 The Muon Detectors 67
3.8 The Trigger 68
3.8.1 Jet Triggers 69
3.9 Data Quality Monitoring 70
References. 71

4 Event Simulation 73
4.1 The Monte Carlo Method. 74
4.2 CMS Detector Simulation 76
4.2.1 Pile-Up Simulation 77
4.2.2 The Geant4 Software. 77
4.3 Monte Carlo Predictions for the Four-Jet Analyses 78
4.4 Sensitivity Studies at Generator Level 80
References. 87

5 Event Reconstruction 89
5.1 Physics Objects in CMS 89
5.1.1 Jet Reconstruction. 92
5.1.2 B-Jet Tagging. 97
5.1.3 Definition of the Jet Flavour 99
References. 100

6 Event Selection 101
6.1 Data Samples 101
6.2 Trigger 103
6.2.1 Trigger Efficiency Correction 104
6.3 Monte Carlo Generated Samples 108
6.3.1 Pile-Up Treatment. 109
6.4 Jet Selection. 110
6.4.1 The b-Jet Selection 112
6.5 Selection Summary 114

6.6 Data-MC Comparisons at Detector Level 116
6.6.1 Four-Jet (4j) Analysis 116
6.6.2 Two b- and Two Other Jet (2b2j) Analysis 119
References 121

7 Study of Detector Effects 123
7.1 Resolution Effects 123
7.2 Purity, Stability, Background and Acceptance 126
7.3 Response Matrices 132
7.4 B-Tag Performance 132
7.4.1 Discriminant Power of the *b*-Tag Algorithm 133
7.4.2 Studies of the Scale Factors 136
7.4.3 Applying the Scale Factors to Multijet Scenarios 139
References 145

8 Data Unfolding 147
8.1 The Different Unfolding Methods 149
8.1.1 Correction Factor Method 149
8.1.2 D'Agostini Unfolding Method 150
8.1.3 SVD Unfolding Method 152
8.1.4 Software Implementation 153
8.2 Cross Closure Tests 154
8.2.1 Testing Different Unfolding Methods 154
8.2.2 Testing Different Monte Carlo Samples 156
8.3 Unfolding the Data 157
8.4 Folding the Distributions Back 160
References 162

9 Systematic Uncertainties 163
9.1 Jet Energy Scale 163
9.2 Jet Energy Resolution 164
9.3 Model Dependence 165
9.4 B-Tag Scale Factors 165
9.5 Other Minor Uncertainties 166
9.6 Total Uncertainty 167
9.7 Summary of Uncertainties for Two Analyses 169
References 172

10 Cross Section Measurement of the 4j and 2b2j Channels and Comparisons with Predictions 173
10.1 Studies of the UE Simulation in Monte Carlo Samples 173
10.2 4j Selection 181

10.3 2b2j Selection. 187
10.4 Summary of the Results. 193
References. 196

11 Extraction of the DPS Contribution 199
11.1 Methods for Extraction of σ_{eff} 199
11.2 Extraction of σ_{eff} from W+dijet Measurements. 204
11.3 4j Selection 206
11.4 2b2j Selection. 208
11.5 Interpretation of the Results 211
11.6 Summary of σ_{eff} Measurements 213
References. 216

12 Summary and Conclusions 219
12.1 Outlook 220
References. 222

Appendix A: The CASTOR Calorimeter at the CMS Experiment 223

Appendix B: Higgs as a Gluon Trigger 233

Appendix C: Perturbative and Nonperturbative Corrections in Shower Event Generators 237

Appendix D: New Underlying Event Tunes 245

Appendix E: Technical Details of the Tuning Method and Additional Comparisons 263

Curriculum Vitae 275
