<b>1</b>	<b>Introduction, State of the Art and Definitions . . . . .</b>	<b>1</b>
1.1	State of the Art . . . . .	3
1.2	Definitions . . . . .	8
1.2.1	Infrastructure . . . . .	8
1.2.2	Integration . . . . .	16
1.3	Delineations . . . . .	17
1.4	Overview . . . . .	22
1.4.1	Common Cross-Sector Objectives . . . . .	22
1.4.2	Communications . . . . .	24
1.4.3	Transport . . . . .	29
	References . . . . .	34
<b>2</b>	<b>Infrastructural Integration in the Nineteenth Century . . . . .</b>	<b>41</b>
2.1	Context . . . . .	41
2.2	Sectoral Development . . . . .	43
2.2.1	Railways . . . . .	43
2.2.2	Inland Navigation . . . . .	51
2.2.3	Postal Services . . . . .	54
2.2.4	Telegraphy . . . . .	59
2.2.5	Telephony . . . . .	63
2.2.6	Radio Communication . . . . .	66
2.3	Sectoral Comparison . . . . .	69
2.3.1	Structures . . . . .	69
2.3.2	Processes . . . . .	71
2.3.3	Contents . . . . .	72
	References . . . . .	75
<b>3</b>	<b>Infrastructural Integration in the Twentieth Century . . . . .</b>	<b>79</b>
3.1	Context . . . . .	79
3.2	Sectoral Development . . . . .	83
3.2.1	Railways . . . . .	83
3.2.2	Inland Navigation . . . . .	88

3.2.3	Postal Services . . . . .	93
3.2.4	Telecommunication . . . . .	96
3.2.5	Radio Communication . . . . .	100
3.3	Sectoral Comparison . . . . .	106
3.3.1	Structures . . . . .	106
3.3.2	Processes . . . . .	108
3.3.3	Contents . . . . .	109
	References . . . . .	110
<b>4</b>	<b>Relationship Between Organisational Structures, Political Processes and Agreed Standards . . . . .</b>	<b>115</b>
4.1	Structures as a Dependent Variable . . . . .	116
4.1.1	Contents as an Independent Variable . . . . .	116
4.1.2	Processes as an Independent Variable . . . . .	117
4.1.3	Structures as an Independent Variable . . . . .	118
4.2	Processes as a Dependent Variable . . . . .	119
4.2.1	Structures as an Independent Variable . . . . .	119
4.2.2	Contents as an Independent Variable . . . . .	120
4.2.3	Processes as an Independent Variable . . . . .	121
4.3	Contents as a Dependent Variable . . . . .	121
4.3.1	Processes as an Independent Variable . . . . .	121
4.3.2	Structures as an Independent Variable . . . . .	122
4.3.3	Contents as an Independent Variable . . . . .	123
4.4	Weighting of Variables . . . . .	123
<b>5</b>	<b>Political and Socio-economic Theories and International Integration of Infrastructures . . . . .</b>	<b>125</b>
5.1	Preliminary Observations . . . . .	125
5.2	Functionalist Integration Theory . . . . .	128
5.2.1	Functionalism and the Concept of Spillover . . . . .	128
5.2.2	Functional Integration in the Telecommunication Sector . . . . .	130
5.3	Standardisation Theories . . . . .	135
5.3.1	Markets for Goods and Network Goods (Structures) . . . . .	135
5.3.2	Competitive Market Standardisation and Cooperative Committee Standardisation (Processes) . . . . .	141
5.3.3	Standards and Standardisation (Contents) . . . . .	148
5.4	New Institutional Economics . . . . .	149
5.4.1	Path Dependences . . . . .	149
5.4.2	Property Rights . . . . .	176
5.5	Conclusion . . . . .	184
	References . . . . .	187
<b>6</b>	<b>Conclusion . . . . .</b>	<b>191</b>

<b>Glossary</b> . . . . .	193
<b>Literature</b> . . . . .	195
1. Infrastructures in General . . . . .	195
2. Definitions . . . . .	199
3. General Historical Framework: (a) Nineteenth Century . . . . .	200
3. General Historical Framework: (b) Twentieth Century . . . . .	201
4. Railways . . . . .	202
5. Inland Navigation . . . . .	203
6. Road Transportation . . . . .	204
