## Part I Introduction to Organic and Molecular Spintronics

<b>1</b>	<b>Introduction to Spintronics</b> . . . . .	3
1.1	Electronic Structure of Ferromagnetic Metals . . . . .	3
1.1.1	Conduction in Ferromagnetic Metals . . . . .	3
1.1.2	Spin Polarization Measurement . . . . .	5
1.2	Principle of a Basic Spintronic Device . . . . .	6
1.3	Tunnel Magnetoresistance . . . . .	8
1.3.1	Jullière's Model . . . . .	8
1.3.2	Development of Magnetic Tunnel Junctions . . . . .	9
1.3.3	Characteristics of Tunnel Magnetoresistance, Beyond Jullière's Model . . . . .	10
	References . . . . .	16
<b>2</b>	<b>Why Bring Organic and Molecular Electronics to Spintronics</b> . . . .	19
2.1	Introduction to Organic and Molecular Electronics . . . . .	19
2.2	Main Difference Between Organic and Inorganic Materials . . . .	20
2.2.1	Behaviour at the Interface . . . . .	21
2.2.2	Electronic Properties of Molecules . . . . .	22
2.3	Advantages of Organic and Molecular Materials for Spintronics . . . . .	24
	References . . . . .	26
<b>3</b>	<b>State of the Art in Organic and Molecular Spintronics</b> . . . . .	29
3.1	Introduction to Organic and Molecular Spintronics . . . . .	29
3.2	Spininterface . . . . .	32
3.2.1	A Model to Explain Spintronics Tailoring Through Molecular Spin Hybridization . . . . .	32
3.2.2	Experimental Evidence of Spin Polarization Tailoring . . . .	36
3.3	Conclusion . . . . .	39
	References . . . . .	40

## Part II Self-Assembled Monolayers for Molecular Spintronics

<b>4</b>	<b>Introduction to Self-Assembled Monolayers</b>	45
4.1	Why Self-Assembled Monolayers?	45
4.1.1	Influence of the Molecular Body	46
4.1.2	Influence of the Head and Anchoring Group	48
4.1.3	And for Spintronics?	48
4.2	How to Contact Self-Assembled Monolayers	49
4.2.1	Examples of Contacting Methods	49
4.3	Transport in Self-Assembled Monolayers	50
4.3.1	Introduction to the Main Models of Direct Tunneling	52
4.3.2	Transition Voltage Spectroscopy (TVS)	59
4.4	Application to Devices: The Alkyl-Chain Case	63
4.4.1	Where Does the Electron Go?	63
4.5	State of the Art on SAMs-Based Magnetic Tunnel Junctions for Spintronics	71
	References	76
<b>5</b>	<b>SAMs Based Device Fabrication and Characterization</b>	83
5.1	Choice of Device Geometry	83
5.2	Choice of the Bottom Electrode	85
5.3	Self-Assembled Monolayers Grafting Over LSMO	86
5.3.1	Grafting Protocol for SAMs Over LSMO	87
5.3.2	Characterization of SAMs Grafted Over LSMO	88
5.4	Fabrication of the Nanojunctions	98
5.4.1	First Step: Optical Lithography	98
5.4.2	Second Step: Nanoindentation Lithography	100
5.4.3	Third Step: Self-Assembled Monolayer Deposition	105
5.4.4	Fourth Step: Top Electrode Deposition and Sample Bonding	106
	References	108
<b>6</b>	<b>Magneto-Transport Results in SAM Based MTJs</b>	111
6.1	Experimental Set-Up	111
6.2	Inelastic Electron Tunneling Spectroscopy	113
6.3	Magneto-Transport Results on LSMO/C12P/Co Nanojunctions	115
6.3.1	Electrical Characterization of the Nano-Junctions	115
6.3.2	Tunnel Magnetoresistance	117
6.4	Magneto-Transport Results by Tuning the Molecular Thickness	124
6.4.1	Resistance Dependence on Molecular Chain Length	124
6.4.2	TMR Dependence on Molecular Chain Length	128

6.5	Conclusions . . . . .	135
	References . . . . .	135
 <b>Part III Room Temperature Spin Injection in Organic Semiconductors</b>		
<b>7</b>	<b>State of the Art in Alq<sub>3</sub>-Based Spintronic Devices . . . . .</b>	<b>139</b>
7.1	State of the Art in Alq <sub>3</sub> -Based Spintronic Devices . . . . .	139
7.1.1	First Results in Alq <sub>3</sub> -Based Organic Spin Valves . . . . .	139
7.1.2	Towards the Optimization of Alq <sub>3</sub> -Based Spintronic Devices . . . . .	141
7.2	Puzzling Results . . . . .	145
7.2.1	Magnetoresistance Sign . . . . .	145
7.2.2	Magnetoresistance Origin . . . . .	148
7.2.3	Conclusions . . . . .	148
	References . . . . .	149
<b>8</b>	<b>Magneto-Transport Results in Alq<sub>3</sub> Based OSVs . . . . .</b>	<b>153</b>
8.1	Fabrication and Characterization of Alq <sub>3</sub> Based OSVs . . . . .	154
8.1.1	Device Fabrication . . . . .	154
8.1.2	Alq <sub>3</sub> Characterization . . . . .	156
8.1.3	Preliminary Considerations on Device Resistance Statistics . . . . .	157
8.2	Efficient Room Temperature Spin Injection in Organic Semiconductors . . . . .	161
8.3	How to Detect Spin Injection in Organic Semiconductors . . . . .	162
8.4	Spin Polarization Properties of Co/Alq <sub>3</sub> /Co Organic Spin Valves . . . . .	165
8.4.1	Interfaces Influence on the MR Sign . . . . .	168
8.4.2	Magnetoresistance Inversion with Bias Voltage . . . . .	170
8.4.3	TAMR Effects in Alq <sub>3</sub> Based OSVs . . . . .	173
8.5	Conclusions . . . . .	177
	References . . . . .	177
 <b>Conclusions . . . . .</b>		<b>179</b>

Molecular Spintronics

From Organic Semiconductors to Self-Assembled  
Monolayers

Galbiati, M.

2016, XIX, 183 p., Hardcover

ISBN: 978-3-319-22610-1
