

# Contents

<b>Abbreviations</b> . . . . .	xi
<b>Prologue: Lipidology—The Science of Lipids</b> . . . . .	xiii
<b>Part I The Overlooked Molecules</b>	
<b>1 Life from Molecules</b> . . . . .	3
1.1 The Three Kingdoms of Life . . . . .	3
1.2 The Molecules of Life . . . . .	4
1.3 A Brief Historical Overview of Membrane Theory . . . . .	6
1.4 Membranes in Cellular Systems . . . . .	9
1.5 The Post-genomic Era . . . . .	12
1.6 A Call for Physics. . . . .	15
<b>2 Head and Tail</b> . . . . .	19
2.1 Fat Family: Fats and Fatty Acids . . . . .	19
2.2 The Polar Lipids—Both Head and Tail . . . . .	22
2.3 Cholesterol—A Lipid of Its Own . . . . .	28
2.4 Strange Lipids . . . . .	28
2.5 Lipid Composition of Membranes . . . . .	30
<b>3 Oil and Water</b> . . . . .	31
3.1 Water—The Biological Solvent. . . . .	31
3.2 The Hydrophobic Effect. . . . .	32
3.3 Mediating Oil and Water . . . . .	33
3.4 Self-assembly and the Lipid Aggregate Family . . . . .	35
3.5 Thermodynamics of Lipid Self-assembly . . . . .	38
3.6 Plucking Lipids . . . . .	41

<b>4</b>	<b>Lipids Speak the Language of Curvature</b> . . . . .	45
4.1	How Large Is a Lipid Molecule? . . . . .	45
4.2	Lipid Molecules Have Shape . . . . .	47
4.3	Lipid Structures with Curvature . . . . .	50
4.4	Microorganisms' Sense for Curvature . . . . .	52
<b>5</b>	<b>A Matter of Softness</b> . . . . .	55
5.1	Soft Matter. . . . .	55
5.2	Soft Interfaces . . . . .	55
5.3	Forces Between Soft Interfaces . . . . .	60
5.4	Lipid Membranes are Really Soft . . . . .	61
<b>6</b>	<b>Soft Shells Shape Up</b> . . . . .	65
6.1	Bending Interfaces . . . . .	65
6.2	Spontaneous Curvature . . . . .	67
6.3	Shaping Membranes . . . . .	69
6.4	Red Blood Cells Shape Up . . . . .	72
<b>7</b>	<b>Biological Membranes—Models and Fashion</b> . . . . .	75
7.1	What Is a Model? . . . . .	75
7.2	Brief History of Membrane Models . . . . .	77
7.3	Do We Need a New Membrane Model? . . . . .	79
7.4	Theoretical and Experimental Model Systems . . . . .	81
 <b>Part II Lipids Make Sense</b>		
<b>8</b>	<b>Lipids in Bilayers—A Stress-Full and Busy Life</b> . . . . .	85
8.1	Trans-Bilayer Structure . . . . .	85
8.2	The Lateral Pressure Profile . . . . .	87
8.3	How Thick are Membranes? . . . . .	89
8.4	Lively Lipids on the Move . . . . .	90
<b>9</b>	<b>The More We Are Together</b> . . . . .	95
9.1	Phase Transitions Between Order and Disorder . . . . .	95
9.2	Lipids Have Phase Transitions . . . . .	98
9.3	Mixing Different Lipids . . . . .	102
9.4	Cholesterol Brings Lipids to Order . . . . .	106
<b>10</b>	<b>Lipids in Flatland</b> . . . . .	111
10.1	Gases, Liquids, and Solids in Two Dimensions . . . . .	111
10.2	Langmuir and Langmuir-Blodgett Films . . . . .	113
10.3	Pattern Formation in Lipid Monolayers . . . . .	116
10.4	Lipids Make the Lung Work . . . . .	119

<b>11 Social Lipids</b>	125
11.1 Lateral Membrane Structure	125
11.2 Imaging Lipid Domains	128
11.3 Lateral Membrane Heterogeneity and Domains	132
11.4 Membrane Domains Carry Function	138
11.5 Active Membranes	140
<b>12 Lively Lipids Provide for Function</b>	143
12.1 Leaky and Thirsty Membranes	143
12.2 Repelling Membranes	145
12.3 Enzymes Can Sense Membrane Transitions	147
12.4 Lipid Thermometer in Lizards	149
<b>13 Proteins at Lipid Mattresses</b>	151
13.1 Coming to Terms with Lipids	151
13.2 Anchoring at Membranes	153
13.3 Spanning the Membrane	156
 <b>Part III Lipids in Action</b>	
<b>14 Cholesterol on the Scene</b>	163
14.1 Molecule of the Century	163
14.2 Evolutionary Perfection of a Small Molecule	164
14.3 Cholesterol Fit for Life	168
14.4 Cholesterol as a Killer	170
<b>15 Lipids in Charge</b>	173
15.1 Lipids and Proteins Match Up	173
15.2 Stressing Proteins to Function	179
15.3 Lipids Opening Channels	183
15.4 Lipids Mediate Fusion	185
<b>16 Being Smart—A Fishy Matter of Fat</b>	189
16.1 The Essential Fatty Acids	189
16.2 Evolution of the Human Brain	191
16.3 Lipids at the Border of Madness	193
<b>17 Liquor and Drugs—As a Matter of Fat</b>	195
17.1 Lipids Are Targets for Drugs	195
17.2 Alcohol and Anesthesia	196
17.3 Poking Holes in Membranes	198
17.4 Gramicidin—The Portable Hole	200

<b>18 Lipid Eaters</b> . . . . .	203
18.1 Enzymes that Break Down Lipids in Crowds . . . . .	203
18.2 Watching Enzymes at Work . . . . .	206
18.3 Lipids Going Rancid . . . . .	208
<b>19 Powerful and Strange Lipids at Work</b> . . . . .	211
19.1 The Impermeable Barrier—Lipids in the Skin . . . . .	211
19.2 Surviving at Deep Sea and in Hot Springs . . . . .	215
19.3 Lipids as Messengers . . . . .	218
19.4 Lipids as a Matter of Death . . . . .	219
<b>20 Survival by Lipids</b> . . . . .	223
20.1 Lipids for Smart Nano-technology . . . . .	223
20.2 Lipids Deliver Drugs . . . . .	228
20.3 Liposomes as Magic Bullets . . . . .	229
20.4 Lipids Fighting Cancer . . . . .	233
<b>Epilogue: Fat for Future</b> . . . . .	239
<b>Sources for Figures</b> . . . . .	241
<b>Bibliography</b> . . . . .	249
<b>Index</b> . . . . .	273
<b>Titles in this Series</b> . . . . .	295

LIFE - AS A MATTER OF FAT

Lipids in a Membrane Biophysics Perspective

Mouritsen, O.G.; Bagatolli, L.A.

2016, XVII, 298 p., Hardcover

ISBN: 978-3-319-22613-2
