

# Contents

<b>Advances in Proof-Theoretic Semantics: Introduction</b> . . . . .	1
Thomas Piecha and Peter Schroeder-Heister	
<b>On the Relation Between Heyting's and Gentzen's Approaches to Meaning</b> . . . . .	5
Dag Prawitz	
<b>Kreisel's Theory of Constructions, the Kreisel-Goodman Paradox, and the Second Clause</b> . . . . .	27
Walter Dean and Hidenori Kurokawa	
<b>On the Paths of Categories</b> . . . . .	65
Kosta Došen	
<b>Some Remarks on Proof-Theoretic Semantics</b> . . . . .	79
Roy Dyckhoff	
<b>Categorical Harmony and Paradoxes in Proof-Theoretic Semantics</b> . . . .	95
Yoshihiro Maruyama	
<b>The Paradox of Knowability from an Intuitionistic Standpoint</b> . . . . .	115
Gabriele Usberti	
<b>Explicit Composition and Its Application in Proofs of Normalization</b> . . . . .	139
Jan von Plato	
<b>Towards a Proof-Theoretic Semantics of Equalities</b> . . . . .	153
Reinhard Kahle	
<b>On the Proof-Theoretic Foundations of Set Theory</b> . . . . .	161
Lars Hallnäs	
<b>A Strongly Differing Opinion on Proof-Theoretic Semantics?</b> . . . . .	173
Wilfrid Hodges	

<b>Comments on an Opinion . . . . .</b>	<b>189</b>
Kosta Došen	
<b>On Dummett's "Proof-Theoretic Justifications of Logical Laws" . . . . .</b>	<b>195</b>
Warren Goldfarb	
<b>Self-contradictory Reasoning . . . . .</b>	<b>211</b>
Jan Ekman	
<b>Completeness in Proof-Theoretic Semantics . . . . .</b>	<b>231</b>
Thomas Piecha	
<b>Open Problems in Proof-Theoretic Semantics . . . . .</b>	<b>253</b>
Peter Schroeder-Heister
