

# Contents

## Part I Technique

<b>1</b>	<b>A Brief History of Controlled Atmosphere Transmission Electron Microscopy . . . . .</b>	<b>3</b>
	Ai Leen Koh, Sang Chul Lee, and Robert Sinclair	
<b>2</b>	<b>Development of the Atomic-Resolution Environmental Transmission Electron Microscope . . . . .</b>	<b>45</b>
	Pratibha L. Gai, Edward D. Boyes, Kenta Yoshida, and Thomas W. Hansen	
<b>3</b>	<b>Gas–Electron Interaction in the ETEM . . . . .</b>	<b>63</b>
	Jakob B. Wagner and Marco Beleggia	
<b>4</b>	<b>Spectroscopy of Solids, Gases, and Liquids in the ETEM . . . . .</b>	<b>95</b>
	Peter A. Crozier and Benjamin K. Miller	
<b>5</b>	<b>Image Detectors for Environmental Transmission Electron Microscopy (ETEM) . . . . .</b>	<b>143</b>
	Ming Pan and Cory Czarnik	
<b>6</b>	<b>Closed Cell Systems for In Situ TEM with Gas Environments Ranging from 0.1 to 5 Bar . . . . .</b>	<b>165</b>
	A.K. Erdamar, S. Malladi, F.D. Tichelaar, and H.W. Zandbergen	

## Part II Applications

<b>7</b>	<b>Growth of One-Dimensional Nanomaterials in the ETEM . . . . .</b>	<b>213</b>
	Jonathan Winterstein and Renu Sharma	
<b>8</b>	<b>The Structure of Catalysts Studied Using Environmental Transmission Electron Microscopy . . . . .</b>	<b>237</b>
	Thomas W. Hansen and Jakob B. Wagner	

<b>9</b>	<b>Liquid Phase Experiments: Describing Experiments in Liquids and the Special Requirements and Considerations for Such Experiments . . . . .</b>	<b>259</b>
	Niels de Jonge	
<b>10</b>	<b>In Situ TEM Electrical Measurements . . . . .</b>	<b>281</b>
	Silvia Canepa, Sardar Bilal Alam, Duc-The Ngo, Frances M. Ross, and Kristian Mølhave	
<b>11</b>	<b>ETEM Studies of Electrodes and Electro-catalysts . . . . .</b>	<b>301</b>
	Christian Jooss, Stephanie Mildner, Marco Beleggia, Daniel Mierwaldt, and Vladimir Roddatis
