Contents

1 Introduction 1
References 5

2 Visualization and Numerical Investigation of Natural Convection Flow of CO_2 in Aqueous and Oleic Systems 7
2.1 Introduction 8
2.2 Experimental Setup 11
2.3 Numerical Modeling 13
2.4 Governing Equations 14
2.5 Theory 16
2.6 Experimental Results and Interpretation 18
2.7 Numerical Results 23
2.8 Conclusions 28
References 29

3 Effect of Salinity and Pressure on the Rate of Mass Transfer in Aquifer Storage of Carbon Dioxide 33
3.1 Introduction 34
3.2 Experimental Set-up 36
3.3 Experimental Results and Discussion 38
3.4 Data Analysis 40
3.5 Conclusions 41
References 45

4 Sorption of CH_4 and CO_2 on Belgium Carboniferous Shale Using a Manometric Set-up 49
4.1 Introduction 50
4.2 Experimental Method 53
4.3 Apparatus 54
4.4 Sample Preparation and Material Used 55
4.5 Experimental Procedure 56

4.6 Data Analysis 57
4.7 Results and Discussion 57
4.8 Conclusions 63
References 63

5 Shale Gas Formations and Their Potential for Carbon Storage: Opportunities and Outlook 67
5.1 Introduction 67
5.2 Global Shale Resources 69
5.3 Current Status of Shale Gas Development 71
5.4 Types of Gas Shales 75
5.5 CH_4 Capacity, CO_2 Storage and Enhanced Gas Recovery in Shales 77
5.6 Enhanced Gas Recovery in Shales 79
5.7 Conclusions 80
References 81

6 Conclusions 87
6.1 Visualization and Numerical Investigation of Natural Convection Flow of CO_2 in Aqueous and Oleic Systems 88
6.2 Effect of Salinity and Pressure on the Rate of Mass Transfer in Aquifer Storage of Carbon Dioxide 88
6.3 Sorption of CH_4 and CO_2 on Belgium Carboniferous Shale Using a Manometric Set-up 89
6.4 Shale Gas Formations and Their Potential for Carbon Storage: Opportunities and Outlook 90

Appendix A: Varying Void Volume 93
