

Contents

1	Introduction and Theoretical Foundations	1
1.1	The Standard Model	1
1.2	The Strong Interaction and Quantum Chromodynamics	3
	References.	6
2	Quarkonium	9
2.1	Quarkonium Spectroscopy	10
2.2	Quarkonium Production	15
2.2.1	The QCD Factorisation Method	15
2.2.2	Colour Evaporation Model	18
2.2.3	Colour Singlet Model	19
2.2.4	k_T Factorisation.	20
2.2.5	NRQCD Factorisation	21
2.2.6	Charmonium Production in b -hadron Decay	24
2.2.7	Hadron Collider Quarkonium Production Phenomenology	26
2.2.8	Quarkonium Production Measurements at the Tevatron	31
2.2.9	Quarkonium Production Measurements at the LHC.	31
	References.	35
3	The ATLAS Experiment	39
3.1	The Large Hadron Collider	39
3.2	Introduction to the ATLAS Detector	41
3.3	Inner Detector	42
3.3.1	Pixel Detector and Semiconductor Tracker	42
3.3.2	Transition Radiation Tracker (TRT).	44
3.4	Calorimeter Systems	45
3.4.1	Liquid Argon Calorimeter	45

3.4.2	Tile Calorimeter	47
3.5	Muon System	48
3.5.1	Precision Tracking Detectors	50
3.5.2	Trigger Detectors	50
3.6	Data Acquisition and Trigger System	50
3.7	Simulation	52
3.8	Operation During LHC Run I	53
	References	54
4	Analysis Techniques	57
4.1	Charged Particle (Track) Reconstruction	57
4.2	Muon Reconstruction	61
4.3	Photon Conversions	64
4.3.1	Photon Conversion Reconstruction in ATLAS	67
4.4	Unconverted Photon Reconstruction	69
4.5	Triggering of Quarkonium Decays $Q \rightarrow \mu^+ \mu^-$	69
4.6	Quarkonium Decay Reconstruction Techniques	71
4.6.1	Mass Difference Distributions	71
4.6.2	Measurement of Non-prompt Charmonium Production	73
4.6.3	Topological Particle-Vertex Matching	75
4.7	Luminosity Measurement	76
	References	77
5	Observation of the χ_b Bottomonium States	79
5.1	Introduction to the χ_b System	79
5.2	Reconstruction of $\chi_{bJ}(nP) \rightarrow \Upsilon(mS)\gamma$ Decays	81
5.2.1	Data Sample and Event Selection	81
5.2.2	Selection of $\Upsilon(mS) \rightarrow \mu^+ \mu^-$ Candidates	81
5.2.3	Selection of Photons from $\chi_{bJ}(nP) \rightarrow \Upsilon(mS)\gamma$ Decays	82
5.3	Observation of the χ_b States	84
5.4	Cross Checks	86
5.5	Fitting Procedure	88
5.6	Systematic Uncertainties	90
5.7	Results	94
5.8	Converted Photon Analysis	96
5.8.1	Photon Conversion Selection	96
5.8.2	Observation of $\chi_b(nP) \rightarrow \Upsilon(mS)\gamma$ with Photon Conversions	97
5.9	Confirmation by Other Experiments	99
5.10	Discussion	102
5.11	Conclusion	104
	References	104

6 Measurement of the Production of the χ_{c1} and χ_{c2}

Charmonium States	107
6.1 Introduction to the χ_c System.	107
6.2 Measurement Overview	110
6.3 Data and MC Simulation Samples.	110
6.4 Reconstruction of $\chi_{cJ} \rightarrow J/\psi \gamma$ Decays	111
6.4.1 Selection of $J/\psi \rightarrow \mu^+ \mu^-$ Decays	111
6.4.2 Selection of Photon Conversions	112
6.4.3 Selection of $\chi_{cJ} \rightarrow J/\psi \gamma$ Decays	113
6.5 Cross Section Measurement Procedure.	114
6.5.1 Acceptance.	115
6.5.2 Trigger Efficiency	121
6.5.3 $J/\psi \rightarrow \mu^+ \mu^-$ Reconstruction Efficiency	122
6.5.4 Converted Photon Reconstruction Efficiency.	124
6.5.5 Validation of Conversion Reconstruction Efficiency.	129
6.6 Measurement of Corrected χ_{cJ} Yields	130
6.6.1 Modelling of the χ_{cJ} Signals	131
6.6.2 Modelling of the Background	134
6.7 Bin Migration Corrections	138
6.8 Systematic Uncertainties	141
6.9 Results and Discussion	146
6.9.1 Theoretical Predictions.	146
6.9.2 Prompt Differential Cross Sections	151
6.9.3 Fraction of Prompt J/ψ Produced in χ_{cJ} Feed-Down Decays: R_{χ_c}	151
6.9.4 Prompt Cross Section Ratio: $\sigma(\chi_{c2})/\sigma(\chi_{c1})$	152
6.9.5 Non-prompt Differential Cross Sections	153
6.9.6 Non-prompt Cross Section Ratio: $\sigma(\chi_{c2})/\sigma(\chi_{c1})$	153
6.9.7 Non-prompt Fractions	154
6.9.8 Summary	154
6.10 Supporting Measurements	154
6.10.1 Measurements of J/ψ Production	155
6.10.2 Data Sample and Event Selection	155
6.10.3 Cross Section Measurement Procedure	155
6.10.4 Systematic Uncertainties.	157
6.10.5 Results and Conclusion	161
6.10.6 Measurement of $\mathcal{B}(B^\pm \rightarrow \chi_{c1} K^\pm)$	163
6.10.7 Selection of Candidate $B^\pm \rightarrow J/\psi K^\pm$ and $B^\pm \rightarrow \chi_{c1} K^\pm$ Decays.	164
6.10.8 Calculation of the Acceptance Correction \mathcal{A}_B	165
6.10.9 Measurement of $N_{\chi_{c1}}^B$ and $N_{J/\psi}^B$	166

6.10.10	Fitting Procedure.	167
6.10.11	Systematic Uncertainties.	167
6.10.12	Result and Conclusion	169
6.11	Conclusion.	170
	References.	170
7	Conclusion	173
	Appendix A: Tabulated Results	175
	Appendix B: Validation of χ_c Fitting Procedure	181
