

Contents

1	Finite Elasticity	1
2	Strain Measures	5
3	Polar Decomposition	9
3.1	Example 1: Polar Decomposition and Strain	12
4	Strain-Energy Functions	19
5	Stress Measures	27
5.1	Example 2: Stress	30
5.2	Example 3: Stress	34
6	Tangent Moduli	37
6.1	Example 4: Tangent Moduli	41
7	Conjugate Pairs	57
8	Incrementation: Part One	61
8.1	Example 5: Relative Deformation Gradient	63
9	Incrementation: Part Two	67
9.1	Example 6: Incremental Strain	70
10	Incrementation: Part Three	73
10.1	Example 7: Incremental Polar Decomposition	74
11	Incrementation: Part Four	77
11.1	Example 8: Incremental Analysis	79
12	Objectivity	85
12.1	Example 9: Objectivity	86
13	Finite Viscoelasticity	93
14	Finite Element Implementation	103

15 Model Parameters from Test Data	109
15.1 Rubber	110
15.1.1 Uniaxial Tension Test	110
15.1.2 Biaxial Tension Test	110
15.1.3 Volumetric Compression Test	111
15.2 Polymers	111
15.3 Foams	112
Exercises	117
Appendix A: Tensor Derivatives	123
Appendix B: Second Elasticity Tensor Derivation	131
Appendix C: Derivative Expressions	139
Appendix D: Derivation of Recursive Formula	145
Appendix E: Lubliner Finite Viscoelasticity Formulation	147
Appendix F: Computer Program Listing	153
Glossary	163
References	167
Index	169

Hyperelasticity Primer

Hackett, R.M.

2016, XVI, 170 p. 4 illus., 3 illus. in color., Hardcover

ISBN: 978-3-319-23272-0
