

Contents

Part I Reconfiguration Theory

Reconfigurable Chains of Bifurcating Type III Bricard Linkages. . . .	3
Shengnan Lu, Dimiter Zlatanov, Xilun Ding, Matteo Zoppi and Simon D. Guest	

A Novel Reconfigurable 7R Linkage with Multifurcation.	15
Ketao Zhang, Andreas Müller and Jian S. Dai	

Design and Analysis of a New 7R Single-Loop Mechanism with 4R, 6R and 7R Operation Modes	27
Xiuyun He, Xianwen Kong, Guangbo Hao and James Ritchie	

Analysis of the Motion Mode Change of a Metamorphic 8R Linkage	39
A. Müller, K. Zhang and J.S. Dai	

Mobility and Structure Re-Configurability of Compliant Mechanisms	49
Guangbo Hao	

Reconfigurable Compliant Unit Modeling and Compositions	61
Liping Zhang, Xiaoyang Tong, Tian Ji and Guibing Pang	

Part II Topology, Kinematics and Design of Reconfigurable Mechanisms

Enumerating the Topological Configurations of the Reconfigurable Cube Mechanism with Eight Sub-cubes	75
Lin-Chi Wu and Chin-Hsing Kuo	

Topological Graph Descriptions and Structural Automatic Synthesis of Planar Multiple Joint and Geared-Linkage Kinematic Chains	85
Jinkui Chu and Yanhuo Zou	
Origami Carton Folding Analysis Using Flexible Panels	95
Ferdinando Cannella, Mariapaola Dimperio, Carlo Canali, Nahian Rahman, Fei Chen, Daniele Catelani, Darwin G. Caldwell and Jian S. Dai	
Design of Constant-Force Compliant Sarrus Mechanism Considering Stiffness Nonlinearity of Compliant Joints	107
Guimin Chen, Hongye Chang and Geng Li	
Twin-Bennett Linkage and One Type of Its Mobile Assemblies	117
Hongwei Guo, Zhongjie Li, Rongqiang Liu and Zongquan Deng	
Inverse Kinematics and Kineto-Statics of Metamorphic Palm of the KCL/TJU Metamorphic Hand	127
Chunsong Zhang and Jian S. Dai	
Foldability Analysis of Cylindrical Origami Structures	143
Jianguo Cai, Ruijun Ma, Jian Feng, Ya Zhou and Xiaowei Deng	
Workspace Analysis of a Reconfigurable Mechanism Generated from the Network of Bennett Linkages	153
Huijuan Fen, Rongjie Kang and Yan Chen	
Configuration Analysis of Loading Mechanism with Metamorphic Characteristics	165
Lin Zhang, Ganwei Cai, Kaijun Zhu, Xiaochun Wang and Zhijie Li	
Dimension Relationship Between Spherical Four-Bar Mechanisms with Same Couple Curve	175
Sun Jianwei, Liu Wenrui and Chu Jinkui	
Part III Reconfigurable Parallel Mechanisms	
Mobility Analysis of Non-overconstrained Reconfigurable Parallel Manipulators with 3-CPU/3-CRU Kinematics	189
Matteo Palpacelli, Luca Carbonari, Giacomo Palmieri and Massimo Callegari	

Mechanism Analysis of Parallel Lifting Mechanism for Schnable Car Based on Coordinate Transformation	201
Yan-Zhi Zhao, Xiang-Nan Wang, Xiao-Xiao Liu, Jie Zhang, Yang Li and Tie-Shi Zhao	
Reconfiguration and Static Joint Force Variation of a 3rRPS Metamorphic Parallel Mechanism with 3R and 1T2R Motion	213
Dongming Gan, Jian S. Dai, Jorge Dias and Lakmal Seneviratne	
Topology and Mobility Variations of a Novel Redundant Reconfigurable Parallel Mechanism	223
Haibo Qu and Sheng Guo	
Reconfiguration Analysis of a 2-DOF 3-4R Parallel Manipulator with Orthogonal Base and Platform	235
Xianwen Kong	
QrPara: A New Reconfigurable Parallel Manipulator with 5-Axis Capability	247
Yan Jin, Binbin Lian, Mark Price, Tao Sun and Yimin Song	
Quaternion Method for the Kinematics Analysis of Parallel Metamorphic Mechanisms	259
Zhonghai Zhang, Jian Sun, Zhenhua Wang, Gongjing Yu, Duanling Li and Jinguo Liu	
Kinematics Analysis of n-4R Reconfigurable Parallel Mechanisms . . .	275
Yu Jingjun, Duan Zhixiang and Xie Yan	
A Family of 2R1T Parallel Manipulators with Intersecting Rotational Axes	287
Bo Hu and Zhen Huang	
A Novel Parallel Mechanism Design Based on Tripod Components	297
Guanyu Huang, Dan Zhang, Sheng Guo and Dian Li	
Motion Decoupling Analysis of a Kind of 2R Parallel Mechanism with Two Continuous Rotational Axes	307
Yundou Xu, Liangliang Chen, Wennan Yan, Jiantao Yao and Yongsheng Zhao	

Type Synthesis of a Family of 3-DOF Spherical Parallel Mechanisms Using Upper-Lower Combination and Axis Movement Theorem. 315
Rongfu Lin, Weizhong Guo and Feng Gao

Structural Synthesis Based on POC Set for Lower-Mobility Non-overconstrained Parallel Mechanisms 327
Xiaorong Zhu, Xin Yao, Huiping Shen, Chen Sun and Tingli Yang

Dynamic Identification of a 3-PRS Parallel Robot with Scissor-Type Prismatic Joint: A Cloud-Based Approach 339
Jian Yang, Xin Wang and Xue Feng Chen

Force Balance of Mechanisms and Parallel Robots Through Reconfiguration Method. 351
Dan Zhang and Bin Wei

Fault Diagnosis and Reconfiguration of Pre-stressed Fault-Tolerant Six-Axis Force Sensor 363
Jiantao Yao, Hongyu Zhang, Jialong Zhu, Yundou Xu and Yongsheng Zhao

Structural Characteristics of Force/Moment Polytopes of Cable Driven Parallel Mechanisms 375
Xiaowei Dai, Yuru Zhang, Dangxiao Wang and Jian Song

Constraint and Mobility Analysis of the SNU 3-UPU Parallel Mechanism in Mixed Mode 385
Ziming Chen, Yang Zhang, Kun Huang and Zhen Huang

The Elliptical Trajectory with Modified Sine Motion Profile for Delta Robot 395
Ruining Huang, Yunqiang Zhang and Yunjiang Lou

A Precise Rotary Actuator Based on Small Perimeter Difference Using Parallel Compliant Mechanism 405
Chengwu Li, Gang Ma, Xu Pei and Bilu Fang

Kinematic Modelling of a Panel Enclosed Hexapod 419
Aaron Yu, Fengfeng (Jeff) Xi and Daniel Finistauri

Conceptual Design and Kinematic Analysis of a Novel Parallel Manipulator with an Articulated Gripping Platform 433
Yimin Song, Yang Qi and Tao Sun

Conceptual Design and Workspace Analysis of an Exechon-Inspired Parallel Kinematic Machine	445
Tang Tengfei, Zhao Yanqin, Zhang Jun and Jin Yan	
Type Synthesis and Analysis of Two-Axis Swaying Platform with Virtual Rotation Axis	455
Erwei Li, Tieshi Zhao, Chang Wang, Yanzhi Zhao, Hui Bian and Yuhang Chen	
Kinematic and Dynamic Analysis of a 3PUS-S(P) Parallel Metamorphic Mechanism Used for Bionic Joint	471
Boyan Chang and Guoguang Jin	
Part IV Bio-reconfiguration Techniques and Biomedical Devices	
A Bio-inspired Reconfigurable Robot	483
Ning Tan, Rajesh Elara Mohan and Karthikeyan Elangovan	
Modeling and Design on Trailing Edge of Morphing Wing	495
Gang Li and Bing Li	
Suboptimal Anatomy of Metamorphic Manipulators Based on the High Rotational Dexterity	509
Vassilis C. Moulitanitis, Nikos A. Aspragathos and Charalampos Valsamos	
The Flexible Neck Mechanism Design and Control of a Turtle Robot for Performance at Digital Stage	521
Wenfu Xu, Hongtao Wang, Zhonghua Hu and Guowei Liang	
Modular Bionic Foot Design Inspired by Blue Sheep	533
Xilun Ding, Linhong Kang, Qun Zhang and Kun Xu	
Design and Kinematic Analysis of a Novel Metamorphic Mechanism for Lower Limb Rehabilitation	545
Wuxiang Zhang, Shaodan Zhang, Marco Ceccarelli and Di Shi	
A Cable-Pulley Transmission for Ankle Joint Actuation in Artificial Leg	559
Huaxin Liu, Marco Ceccarelli, Qiang Huang, Xinran Guo, Haotian She and Weimin Zhang	

Mathematical Modeling and Kinematics Analysis for a Novel Ankle Rehabilitation Robot	571
Yang Li and Ligang Yao	
Prototype Design of a Rubik Snake Robot	581
Xin Zhang and Jinguo Liu	
Trajectory Optimization for Robot Crawling on Ceiling Using Dry Elastomer Adhesive.	593
Zhongyuan Wang, Gongxun Sun and Zhendong Dai	
Mechanism Design and Kinematic Performance Research of Snake-Like Robot with Orthogonal Active Wheels	603
Zhiping Weng, Tianlong Liu, Chuncheng Wu and Zhengcai Cao	
Part V Analysis and Design of Reconfigurable Robots	
A Robot Capable of Autonomous Robotic Team Repair: The Hex-DMR II System	619
Joshua D. Davis, Yunuscan Sevimli, M. Kendal Ackerman and Gregory S. Chirikjian	
Inverse Kinematics of Active Rotation Ball Joint Manipulators Using Workspaces Density Functions	633
Hui Dong, Taosha Fan, Zhijiang Du and Gregory S. Chirikjian	
Singularity Analysis of a High-Speed Parallel Robot with Schönflies Motion.	645
Fugui Xie, Xin-Jun Liu and Zubing Min	
Multi-objective Design Optimization of a Parallel Schönflies-Motion Robot	657
Guanglei Wu, Shaoping Bai and Preben Hjørnet	
Mechanism Synthesis and Workspace Analysis of a Spraying Robot for Airfoil	669
Lizhong Zhu, Liping Wang and Jingshan Zhao	
A Novel Docking Mechanism Design and Dynamic Performance Analysis of Self-reconfigurable Modular Robot	681
Xiaofeng Wang, Minglu Zhang and Weimin Ge	

Conceptual Design and Kinematic Analysis of the Diamobot: A Homogeneous Modular Robot	693
Longhai Zhao, Hao Wang, Tianwei Lin, Genliang Chen and Lingyu Kong	
Design and Development on a Reconfigurable Modular Joint of the Robot Arm	705
Jiaming Deng, Pengcheng Wang, Qingmei Meng, Huiping Shen, Jian Chen and Minzhou Luo	
A New Approach to Identify Link Errors and Kinematic Pair Errors of SCARA Robot	715
Zhi Wang, Delun Wang, Huimin Dong and Shudong Yu	
Structural Topology Optimization for a Robot Upper Arm Based on SIMP Method	725
Bai Yunfei, Cong Ming and Li Yongyao	
Intelligent Service Reconfiguration for Home Robots.	735
Tsung-Hsien Yang and Wei-Po Lee	
Design and Simulation of Metamorphic Moving Mechanism of Insulator Inspection Robot.	747
S.J. Li, Q. Yang, M. Geng and H.G. Wang	
Compliance Analysis and Synthesis of a Serial Manipulator with Redundant DOFs Used in Tokamak	757
Jue Yu, Yong Zhao, Hao Wang, Li Wang and Xinmin Lai	
A Modular Liquid Sample Handling Robot for High-Throughput Fourier Transform Infrared Spectroscopy	769
Jichun Li, Volha Shapaval, Achim Kohler, Robert Talintyre, Jürgen Schmitt, Richard Stone, Andrew J. Gallant and Dagou A. Zeze	
Reconfigurable Industrial Robots—An Integrated Approach to Design the Joint and Link Modules and Configure the Robot Manipulator	779
A. Valente	
M² Gripper: Extending the Dexterity of a Simple, Underactuated Gripper.	795
Raymond R. Ma, Adam Spiers and Aaron M. Dollar	

**Design and Analysis of a Circular-Orbit Underconstrained Cable
Parallel Robot** 807
Sen Qian, Bin Zi and Xue Han

**Kinematics and Energy Minimization Approach for Continuum
Robot** 817
Qiang Lu and Bin He

**Parametric Modeling and Experimental Analysis
for Interventional Surgery Robots** 829
Bin He, Ke Liu, Shangqing Wu, Yuanyuan Si, Tingting Yuan,
Luxi He and Yanmin Zhou

Application and Research of the Clip Type Manipulator 841
Jin Hui, Yun Chao, Wang Wei and Li Dongjing

Part VI Control of Reconfigurable Robots

**Reconfiguration of Mobile Intelligent Robotic Platform
(MIRP) with Emotional Control.** 855
Alberto Rovetta

Self-assembly Planning of a Shape by Regular Modular Robots. 867
Haiyuan Li, Tianmiao Wang and Gregory S. Chirikjian

**Evaluation of Contactless Power Transmission at Rotary
Joint for Dynamic Load.** 879
Zhipan Wang, Hao Gu and Peide Sun

Bio-control of a Modular Design Robot—NOROS. 891
Fan Yang, Xilun Ding and Saijin Peng

**Efficient Motion Simulation and Collision Detection Algorithm
Suitable for Serial Industrial Robot** 901
Jiangang Li, Yang Lu and Yangpeng Song

**A Constrained Guess-Check Approach for Resource Allocation
in the Robot Control System Design.** 913
Xingyun He, Cezary Zielinski, Steven Davy and Lei Shi

**Towards Predictable Precision Manipulation of Unknown
Objects with Underactuated Fingers.** 927
Raymond R. Ma, Nicolas Rojas and Aaron M. Dollar

Task-Based Control Strategies and the Implementation for a Six-Legged Multi-tasked Robot	939
Yuan Tian, Feng Gao, Yang Pan and Yilin Xu	
Gait and Experiment Research for the Human-Carrying Quadruped Walking Chair Robot with Parallel Leg Mechanism	951
Lingfeng Sang, Hongbo Wang, Shuaishuai Wang and Hongmin Shi	
Workspace Analysis and Dynamic Object Tracking with a Delta Parallel Robot	965
Guoying Zhang, Guanfeng Liu, Weinan Chen, Xieyuan Lin and Yisheng Guan	
Load Sharing Characteristics of RV Transmission Mechanism in Robot	977
Mo Shuai, Zhang Yidu and Wu Qiong	
Part VII Deployable Mechanisms and Applications of Reconfigurable Mechanisms	
Design and Experiment on a Lock/Release Mechanism Based on Shape Memory Alloy for SAR Antenna	991
Liu Rongqiang, Wang Yan, Cong Qiang and Liu Dong	
Design of a Six-Wheeled Planetary Surface Locomotion System with Single Motor Driving Folded-Deployed Suspension. . . .	1009
Yue Wu, Shurong Hu, Jianguo Tao, Jiajun Li and Chen Lin	
A Method for Constructing Reconfigurable Deployable Polyhedral Mechanism.	1023
Ruiming Li, Yan'an Yao and Xianwen Kong	
Modeling and Design on Modular Deployable Antenna	1037
Bing Li, Weiguo Kong and Xiaozhi Qi	
Mobility Analysis for Deployable Assemblies of Mechanisms Based on Nullspace	1049
Yi Yang, Xilun Ding and Wuxiang Zhang	
Reconfigurability of Engines: A Kinematic Approach to Variable Compression Ratio Engines	1061
Thiago Hoeltgebaum, Roberto Simoni and Daniel Martins	

Reconfigurability and Flexibility in a Robotic Fixture for Automotive Assembly Welding	1073
Zeshan Ahmad, Shengnan Lu, Matteo Zoppi, Dimiter Zlatanov and Rezia Molfino	
Module Partition Method for Product Requirement Change Based on Improved Differential Evolution Algorithm	1083
Wei Wei, He Liang, Ang Liu and Shaopeng Xu	
Synthesis of a Spatial 3-dof Deployable Mechanism to Grasp Stacked Non-Rigid Materials	1095
David Corinaldi, Massimo Callegari, Matteo-Claudio Palpacelli and Giacomo Palmieri	
A Novel Linear Telescopic Mechanism: Configuration and Position Precision Analysis	1107
Leiyu Zhang and Yang Yang	
Erratum to: Workspace Analysis of a Reconfigurable Mechanism Generated from the Network of Bennett Linkages.	E1
Huijuan Feng, Rongjie Kang and Yan Chen	

Advances in Reconfigurable Mechanisms and Robots II

Ding, X.; Kong, X.; Dai, J.S. (Eds.)

2016, XVIII, 1117 p., Hardcover

ISBN: 978-3-319-23326-0
