1 Computational Social and Behavioral Science	1
<i>Rosaria Conte</i>	
1.1 Social and Natural Sciences: An Uncertain Alliance	2
1.2 A Bit of History	3
1.3 The Present	4
1.4 Next Future	6
References	7
 Part I New Theories	
 2 Cognitively Rich Architectures for Agent-Based Models of Social Behaviors and Dynamics: A Multi-Scale Perspective	11
<i>Marco Campenni</i>	
2.1 Introduction	11
2.2 Agent-Based Modeling	12
2.2.1 Social Behavior and Communication in Living Organisms	14
2.2.2 Communication, Social Cognition and Theory of Mind (ToM)	15
2.2.3 “Animal Culture” and Imitation	16
2.2.4 Information Exchange	17
2.2.5 Agent-Based Modeling of the Evolution of Communicative Systems	17
2.2.6 Agent-Based Modeling of Social Organization, Structures, and Dynamics in Living Organisms	19
2.3 Why Do We Need Cognitive Agents?	21
2.3.1 Cooperation Theory and ABM	22
2.3.2 Why Agent-based Models and not Other Modeling Approaches?	24
2.4 Social–Ecological Systems	25
2.4.1 Role of Traditional Knowledge in SES	29
2.4.2 The Adaptive Cycle	30

2.4.3	Adaptive Governance and SES	31
2.4.4	Links to Sustainable Development	32
2.5	Earth System Dynamics and the Syndromes Approach	32
2.5.1	Syndromes Concepts	32
2.6	Conclusions	34
	References	34
3	Reciprocity, Punishment, Institutions: The Streets to Social Collaboration—New Theories on How Emerging Social Artifacts Control Our Lives in Society	41
	<i>Giuliana Gerace</i>	
3.1	Introduction	41
3.2	The Emergence of Cooperation	43
3.2.1	Reciprocity Mechanisms	43
3.2.2	Behavioral Patterns: Strong Reciprocity	45
3.2.3	Behavioral Dispositions: Trust	48
3.3	The Emergence of Institutions	50
3.3.1	Perspectives on Social Conditionality	52
3.3.2	Models of Emergence	54
3.4	An Experiment in Social Interaction: The Public Trust Model	56
3.4.1	Model Description	57
3.4.2	Results	58
3.4.3	Discussion of Results	59
3.5	Conclusions	60
	References	61
4	Modelling Extortion Racket Systems:Preliminary Results	65
	<i>Luis G. Nardin, Giulia Andrighetto, Aron Székely and Rosaria Conte</i>	
4.1	Introduction	65
4.2	Palermo Scenario	67
4.3	Experiment	71
4.4	Results	75
4.5	Conclusions	78
	References	79
5	Experimental Economics and Tax Evasion	81
	<i>Juliana Bernhofer</i>	
5.1	Introduction	81
5.2	Classic Modeling of Tax Evasion	83
5.3	Limits of Rational-Choice Theory	84
5.4	The Expected-Utility Approach Under Scrutiny	86
5.5	Institutions, Social Norms and Psychological Factors— New Evidence from the Lab	88
5.5.1	Testing the Classic Microeconomic Predictions	89
5.5.2	Tax Compliance as a Social Norm	90

5.6	From Top Down to Bottom Up—From Experimental Economics to an Experimental Economy	91
5.6.1	Group Conformity and Social Norms	92
5.6.2	The Tax Compliance Simulator (TCS)—Playing with Complexity	94
5.6.3	Experimental Economics—Calibration with Experimental Data	94
5.6.4	A Model of Citizenship	95
5.7	Conclusions	96
	References	97
6	Exploring Reputation-Based Cooperation:	101
	<i>Daniele Vilone, Francesca Giardini and Mario Paolucci</i>	
6.1	Introduction	101
6.2	The Computational Model	103
6.3	Results	104
6.3.1	Effects of the Network Topology	105
6.4	Discussion	112
6.5	Conclusions	113
	References	114
 Part II New Applications		
7	A Novel Interdisciplinary Approach to Socio-Technical Complexity	117
	<i>Chiara Bassetti</i>	
7.1	Introduction	117
7.2	The OZ Project at a Glance	119
7.3	State of the Art and Theoretical Foundations	120
7.3.1	(Multimodal) Social Interaction	121
7.3.2	Large Gatherings (or Crowds)	123
7.4	Empirical Foundations	126
7.5	Atomic Components, Annotation, and Compositional Methods	131
7.6	Conclusions	138
	References	139
8	Trends in Social Science: The Impact of Computational and Simulative Models	145
	<i>Rosaria Conte, Mario Paolucci, Stefano Picascia and Federico Cecconi</i>	
8.1	The Survey: Method and Caveats	145
8.2	Results	146
8.3	Discussion and Some Conclusions	148
	References	151

9 On the Quality of Collective Decisions in Sociotechnical Systems: Transparency, Fairness, and Efficiency	153
<i>Daniele Porello</i>	
9.1 Introduction	153
9.2 Background on Social-Choice Theory and Judgment Aggregation	155
9.3 A Model of Judgment Aggregation	157
9.4 Ontological Analysis of Information in STS	160
9.5 Assessing the Quality of Collective Decisions in Sociotechnical Systems	163
9.6 Conclusions	166
References	166
10 How Crime Spreads Through Imitation in Social Networks: A Simulation Model	169
<i>Valentina Punzo</i>	
10.1 Introduction	169
10.2 Literature Review	170
10.3 The Agent-Based Approach	174
10.4 The Simulation Model	175
10.4.1 Steps of the Simulation	177
10.4.2 Network Topologies	180
10.5 Simulation Results	182
10.6 Discussion	187
References	189
11 NewsMarket 2.0: Analysis of News for Stock Price Forecasting	195
<i>Alessandro Barazzetti and Rosangela Mastronardi</i>	
11.1 Introduction, Motivation, and Related Literature	195
11.2 NewsMarket	197
11.2.1 News Index Map (NIM)	198
11.2.2 Natural Language Processing and NewsVoc	200
11.2.3 Financial Prompter	201
11.3 Data Analysis	201
11.4 Empirical Results	202
11.5 Conclusions	206
References	207
Index	209

New Frontiers in the Study of Social Phenomena

Cognition, Complexity, Adaptation

Cecconi, F. (Ed.)

2016, X, 206 p. 49 illus. in color., Hardcover

ISBN: 978-3-319-23936-1
