

Contents

1 General Information on Tsunami Waves, Seaquakes, and Other Catastrophic Phenomena in the Ocean	1
1.1 Tsunami: Definition of Concepts	2
1.2 Manifestations of Tsunami Waves on Coasts	5
1.3 Tsunami Magnitude and Intensity	11
1.4 Tsunami Warning Service: Principles and Methods	16
1.5 Tsunami Catalogs and Databases.	20
1.6 Seaquakes: General Ideas.	24
1.7 Hydroacoustic Signals in the Case of Underwater Earthquakes . . .	27
References	30
2 Source of a Tsunami of Seismotectonic Origin	35
2.1 The Main Parameters and Secondary Effects.	36
2.2 Okada Formulae	51
2.3 Rectangular Fault: Relationship Between the Parameters of a Tsunami Source and the Earthquake Moment Magnitude and Depth	55
2.4 Properties of Coseismic Deformations of the Oceanic Bottom According to Data on the Slip Structure at Tsunamigenic Earthquake Sources	67
2.5 Distribution of Tsunami Sources in Space and Time	77
References	84
3 Hydrodynamic Processes at the Source of a Tsunami of Seismotectonic Origin: Incompressible Ocean	89
3.1 Hydrodynamic Description of Tsunami Waves: The Two Principal Approximations	90
3.1.1 General Formulation of the Hydrodynamic Problem	90
3.1.2 The Long-Wave Theory.	92
3.1.3 The Potential Theory	95

3.2	General Solution of the Problem of Excitation of Gravitational Waves in a Layer of Incompressible Liquid by Deformations of the Basin Bottom	98
3.2.1	Cartesian Coordinates	98
3.2.2	Cylindrical Coordinates	101
3.3	Plane Problems of Tsunami Excitation by Deformations of the Basin Bottom	104
3.3.1	Construction of the General Solution	105
3.3.2	Piston and Membrane Displacements	109
3.3.3	Running and Piston-Like Displacements	119
3.3.4	The Oscillating Bottom	126
3.4	Generation of Tsunami Waves and Peculiarities of the Motion of Ocean Bottom at the Source	132
3.5	Calculation of the Initial Elevation at the Tsunami Source	144
3.6	Residual Hydrodynamic Fields that Accompany the Generation of a Tsunami by an Earthquake	156
3.6.1	Definition of Concepts	156
3.6.2	Basic Mathematical Model for a Homogeneous Ocean	157
3.6.3	The Properties of Residual Fields in the Case of a Homogeneous Ocean of Constant Depth: Analysis of Analytical Solutions	159
3.6.4	Features of Residual Fields Due to the Existence of Stable Stratification	164
3.6.5	Methods for Calculation of Residual Potential Fields for Real Events	171
3.6.6	Estimation of Residual Horizontal Displacements of Water Particles Caused by the Tsunamigenic Earthquake of March 11, 2011	172
	References	175
4	Role of the Compressibility of Water and of Nonlinear Effects in the Formation of Tsunami Waves	181
4.1	Excitation of Tsunami Waves with Regard to the Compressibility of Water	182
4.1.1	Preliminary Estimates	182
4.1.2	Hydrodynamic Formulation of the Problem: Analytic Solutions	186
4.1.3	Piston and Membrane Displacements	193
4.1.4	The Running Displacement	198
4.1.5	Peculiarities of Wave Excitation in a Basin of Variable Depth	202
4.2	Observations of Tsunamigenic Earthquakes Using Ocean Bottom Stations	210
4.2.1	Character of the Water Layer Response to Bottom Oscillations in Dependence of Frequency	211

4.2.2	The 2003 Tokachi-Oki Earthquake	216
4.2.3	The 2011 Tohoku-Oki Earthquake.	226
4.3	Nonlinear Mechanism of Tsunami Generation.	240
4.3.1	Base Mathematical Model	240
4.3.2	Nonlinear Mechanism of Tsunami Generation by Bottom Oscillations in an Incompressible Ocean.	244
4.3.3	Nonlinear Tsunami Generation Mechanism with Regard to the Compressibility of Water	252
	References	258
5	The Physics of Tsunami Formation by Sources of Nonseismic Origin.	263
5.1	Tsunami Generation by Landslides	264
5.2	Tsunami Excitation Related to Volcanic Eruptions	276
5.3	Meteotsunamis	283
5.4	Cosmogenic Tsunamis	294
	References	305
6	Propagation of a Tsunami in the Ocean and Its Interaction with the Coast.	311
6.1	Traditional Ideas Concerning the Problem of Tsunami Propagation	312
6.2	Numerical Models of Tsunami Propagation	329
6.3	Tsunami Run-Up on the Coast	345
	References	352
7	Methods of Tsunami Wave Registration	359
7.1	Coastal and Deepwater Measurements of Sea Level.	360
7.2	The Investigation of Coasts After Tsunamis: Tsunami Deposits	366
7.3	Tsunami Detection in the Open Ocean by Satellite Altimetry	373
7.4	Tsunami Wave Manifestations in the Ionosphere.	381
