

Contents

1 Assessment of the Vehicle's Interior Wind Noise Due to Measurement of Exterior Flow Quantities in Early Project Phases	1
Gregor Müller, Gottfried Grabner, Michael Wiesenegger, Joerg Jany and Christoph Fankhauser	
2 Sound Optimization for Downsized Engines.	13
Alois Sontacchi, Matthias Frank, Franz Zotter, Christian Kranzler and Stephan Brandl	
3 Reducing Noise in an Electric Vehicle Powertrain by Means of Numerical Simulation.	29
Barry James, Andreas Hofmann and Rik W. De Doncker	
4 Cylindrical Nearfield Acoustical Holography: Practical Aspects and Possible Improvements.	47
Matteo Kirchner and Eugenius Nijman	
5 Vibro-Acoustic Analysis of Geared Systems—Predicting and Controlling the Whining Noise	63
Alexandre Carbonelli, Emmanuel Rigaud and Joël Perret-Liaudet	
6 Possibilities and Constraints for Lightweight in Exhaust Systems.	81
Dennis Bönnen, Djahanchah Bamdad-Soufi, Hannes Steinkilberg and Kwin Abram	
7 A Patch Transfer Function Approach for Combined Computational-Experimental Analysis of Vibro-Porous-Acoustic Problems	99
Jan Rejlek, Eugenius Nijman, Giorgio Veronesi and Christopher Albert	

Automotive NVH Technology

Fuchs, A.; Nijman, E.; Pribsch, H.-H. (Eds.)

2016, XVIII, 117 p. 87 illus., 38 illus. in color., Softcover
