|----------|--|----|
| 1 | Reconstructing Images in Astrophysics, an Inverse Problem | |
| | Point of View | 1 |
| | Céline Theys and Claude Aime | |
| 1.1 | Introduction | 2 |
| 1.2 | Physical Basis of Optical Imaging | 2 |
| 1.2.1 | Basic Relations for Image Formation | 3 |
| 1.2.2 | Image Detection in the Presence of Noises | 5 |
| 1.3 | Inverse Imaging Problem | 7 |
| 1.3.1 | The Raw Inverse Filter and an Improved Version | 7 |
| 1.3.2 | Matrix Formulation | 8 |
| 1.3.3 | Minimum Variance Unbiased Solutions | 10 |
| 1.4 | Adding A Priori: Regularization | 11 |
| 1.5 | Iterative Methods and Non-negativity Constraint | 13 |
| 1.5.1 | Poisson Process, Richardson Lucy Algorithm | 15 |
| 1.5.2 | Gaussian Process, ISRA Algorithm..... | 17 |
| 1.6 | Illustration of RL Algorithm for Observations Made with a Diluted Array of Telescopes | 18 |
| 1.7 | Concluding Remarks..... | 22 |
| | References | 22 |
| 2 | Reconstruction of Solar Subsurfaces by Local Helioseismology | 25 |
| | Alexander G. Kosovichev and Junwei Zhao | |
| 2.1 | Introduction | 25 |
| 2.2 | Time-Distance Helioseismology from SDO | 29 |
| 2.3 | Subsurface Flows and Effects of Solar Activity | 30 |
| 2.4 | Conclusion | 38 |
| | References | 38 |

| | | |
|----------|---|-----------|
| 3 | Imaging Surface Spots from Space-Borne Photometry | 43 |
| | A.F. Lanza | |
| 3.1 | Introduction | 43 |
| 3.2 | Spot Modelling with Discrete Spots | 45 |
| 3.2.1 | Model Geometry | 45 |
| 3.2.2 | Flux Variation Produced by an Active Region | 46 |
| 3.2.3 | Few-Spot Models | 49 |
| 3.2.4 | Multispot Models with Evolution | 52 |
| 3.3 | Models with Continuous Spot Distributions | 52 |
| 3.3.1 | Flux Variation Produced by a Continuous Distribution of Active Regions | 53 |
| 3.3.2 | The Light Curve Inversion Problem and the Regularization | 54 |
| 3.3.3 | Alternative Approaches..... | 59 |
| 3.4 | Spot Occultations During Planetary Transits | 60 |
| 3.5 | Tests of Spot Models..... | 61 |
| 3.6 | Conclusions | 63 |
| | References | 64 |
| 4 | Reconstruction of Thermal and Magnetic Field Structure of the Solar Subsurface Through Helioseismology | 69 |
| | K.M. Hiremath | |
| 4.1 | Introduction | 69 |
| 4.2 | Solar Cycle and Activity Phenomena | 70 |
| 4.2.1 | Sunspots | 71 |
| 4.2.2 | Sunspot 11 Year Cycle | 71 |
| 4.2.3 | Sunspot 22 Year Magnetic Cycle | 72 |
| 4.2.4 | Spherical Harmonic Fourier Analysis of Sun's Magnetic Activity | 73 |
| 4.2.5 | Polar Faculae and Coronal Holes | 74 |
| 4.3 | Solar Thermal Structure as Understood from the Evolutionary Calculations | 75 |
| 4.4 | Helioseismology | 77 |
| 4.4.1 | Inference of Thermal Structure by Comparing the Observed and Computed Frequencies | 79 |
| 4.4.2 | Inference of Thermal Structure: Primary Inversions | 79 |
| 4.4.3 | Inference of Thermal Structure: Secondary Inversions | 81 |
| 4.4.4 | Inference of Magnetic Field Structure: Primary Inversions | 85 |
| 4.4.5 | Inversion of Poloidal Magnetic Field Structure: Secondary Inversions | 86 |
| 4.5 | Concluding Remarks..... | 88 |
| 4.5.1 | Recent Estimation of Chemical Abundances and Incompatible Seismic Models | 89 |

| | | |
|----------|--|------------|
| 4.5.2 | Solar Cycle Changes of Frequencies and the Sound Speed..... | 89 |
| 4.5.3 | Steady Parts of Poloidal and Toroidal Magnetic Field Structure | 89 |
| 4.5.4 | Origin and Consequences of Near Surface Rotation Profile and Toroidal Magnetic Field Structure | 90 |
| 4.5.5 | Origin of 22 yr Cycle and Future Helioseismic Inferences ... | 91 |
| | References | 92 |
| 5 | Physical Processes Leading to Surface Inhomogeneities: | |
| | The Case of Rotation | 101 |
| | Michel Rieutord | |
| 5.1 | Introduction | 101 |
| 5.2 | The Energy Flux in Radiative Envelopes of Rotating Stars | 102 |
| 5.2.1 | von Zeipel 1924..... | 102 |
| 5.2.2 | The Idea of the ω -Model | 104 |
| 5.2.3 | The Derivation of $f(r, \theta)$ | 106 |
| 5.2.4 | Two Interesting Latitudes | 109 |
| 5.2.5 | The Final Solution of the ω -Model | 110 |
| 5.2.6 | Comparison with 2D Models: A Test of the β - and ω -Models | 111 |
| 5.3 | The Case of Convective Envelopes..... | 115 |
| 5.3.1 | Lucy's Problem | 115 |
| 5.3.2 | A New Derivation of Lucy's Result..... | 116 |
| 5.3.3 | Can Lucy's Law Represent a Gravity Darkening Effect? | 117 |
| 5.4 | Binary Stars | 119 |
| 5.5 | Conclusions | 122 |
| | References | 124 |
| 6 | Interferometry to Determine Stellar Shapes: | |
| | Application to Achernar..... | 127 |
| | Pierre Kervella | |
| 6.1 | Introduction | 127 |
| 6.2 | VLT/Interferometry Observations of Achernar | 128 |
| 6.3 | Analysis Using LITpro | 129 |
| 6.3.1 | VINCI Data Set Only | 130 |
| 6.3.2 | Full VINCI+PIONIER Data Set..... | 131 |
| 6.3.3 | Discussion | 133 |
| 6.3.4 | Conclusion | 134 |
| | References | 134 |
| 7 | Interferometry to Image Surface Spots..... | 137 |
