

Contents

1	Product Lifecycle Management	1
1.1	Overview	1
1.2	What Is PLM?	2
1.2.1	High-Level Objective of PLM	2
1.2.2	Activities of PLM	2
1.2.3	A Joined-up, Holistic Approach	3
1.2.4	Generic Product Lifecycle Phases	3
1.2.5	PLM, Managing the Product Across the Lifecycle	4
1.2.6	Managing the Product from Dawn to Dusk	4
1.3	PLM—With What Resources?	5
1.3.1	The PLM Grid	5
1.3.2	Managing the Ten Components of the PLM Grid	6
1.4	Why PLM?	12
1.4.1	There Is no Alternative	12
1.4.2	The Complex Environment of Products	13
1.4.3	Horror Story	15
1.4.4	Opportunities	16
1.4.5	Benefits	17
1.5	When PLM?	18
1.5.1	When Did PLM Emerge?	18
1.5.2	When Did Companies Get Started with PLM?	18
1.5.3	When Do Companies Start a PLM Initiative?	19
1.6	Where PLM?	19
1.6.1	Where Is PLM Used, in Which Industries?	19
1.6.2	Where Is PLM Used, in What Size of Company?	20
1.6.3	Where Is PLM Used, for What Type of Products?	20
1.6.4	Where Is PLM Used, in What Type of Company?	20

1.6.5	Where Did Companies Start with PLM?	20
1.6.6	Where Will Companies Continue with PLM?	21
1.7	Who PLM?	21
1.7.1	Top Management Role	21
1.7.2	Everybody in the Company with a Product-Related Activity	22
1.7.3	The PLM Initiative Team	23
1.8	How PLM?	24
1.8.1	The PLM Initiative.	25
1.8.2	Different Approach, Different Result	26
1.8.3	The Feasibility Study	27
1.8.4	Understanding the In-Scope Current Situation	28
1.8.5	Developing the Future PLM Strategy	30
1.8.6	Developing the PLM Implementation Strategy and Plan	31
1.8.7	Documenting the PLM Implementation Plan	34
2	Product Lifecycle Management	37
2.1	Product Lifecycle Management (PLM).	37
2.2	Managing the Product Isn't Easy.	37
2.3	Loss of Control.	38
2.4	Sources of Problems	40
2.5	Opportunities of Globalisation	41
2.6	The Environment Before PLM	42
2.7	PLM Paradigm	43
2.8	PLM Grid	44
2.9	Starting the PLM Initiative.	44
3	Complex and Changing Environment	47
3.1	Changes and Interconnections.	47
3.1.1	Interconnections.	48
3.2	Macroeconomic and Geopolitical Changes	48
3.2.1	Globalisation.	48
3.2.2	Geopolitical Developments	50
3.2.3	New Customer Requirements	51
3.2.4	The Emergence of Global Products	52
3.2.5	Shareholder Value	52
3.2.6	Market Mentality	53
3.2.7	Deregulation	54
3.2.8	Regulation and Compliance.	54
3.2.9	Traceability.	56
3.2.10	Education and Training.	56
3.2.11	Workforce Age Distribution	57
3.2.12	Free Trade	57

3.3	Environmental and Social Changes	58
3.3.1	Social and Health Issues	58
3.3.2	Environmental and Sustainable Development.	59
3.3.3	Role of Women in Business	60
3.4	Corporate Changes	60
3.4.1	Changing Business Models	60
3.4.2	New Company Structures	61
3.4.3	Business Process Reengineering.	64
3.4.4	Corporate Theories.	64
3.4.5	Standards	65
3.4.6	Low-Cost and Lean	65
3.4.7	Intellectual Property Management	66
3.4.8	The Aftermarket	66
3.5	Technological Changes	67
3.5.1	Improved Travel, Transport and Telecommunications.	67
3.5.2	Revolutionary New Technologies.	67
3.5.3	New IS Applications	67
3.5.4	Communities.	70
3.6	Product Changes	70
3.6.1	Products	70
3.6.2	Mechatronic Products	71
3.7	The Result and the Requirements	72
4	Product Pain	73
4.1	Product Environment	73
4.2	Private Life Experience	74
4.2.1	Washing Machine	74
4.2.2	Telephone.	74
4.2.3	Escalator.	75
4.2.4	Train	75
4.2.5	Private/Professional Experience	76
4.3	Professional Experience	76
4.4	Public Experience	77
4.4.1	Electricity	77
4.4.2	Cars	78
4.4.3	Bridges.	79
4.4.4	Aerospace Products	79
4.4.5	Power Plants	80
4.4.6	Financial Products	81
4.4.7	Other Products.	81
4.5	Product Development Is Important	82
4.6	Product Development Is Hard.	83
4.7	Pain in Use	83

4.8	Effects	84
4.9	Causes	85
4.9.1	Challenger	86
4.9.2	Columbia	87
4.9.3	SR-111	87
4.9.4	Ariane 5	88
4.9.5	Multiple Causes	88
4.10	Causes and Measures	89
4.11	Pre-Emptive Measures and PLM	90
4.12	Current and Future Nightmare	90
4.12.1	It's a Nightmare	90
4.13	Global Growing Pains	91
4.14	No Silver Bullet	93
5	Emergence of PLM	95
5.1	Product	95
5.2	Lifecycle	95
5.3	Changing Views of Products	98
5.4	Emergence of PLM in the 21st Century	103
5.5	A New Paradigm	103
5.6	Across the Lifecycle	104
5.7	A New Way of Thinking	104
5.7.1	Thinking About Manufacturing	105
5.7.2	Thinking About the Company	105
5.7.3	Thinking About a Function	106
5.7.4	Thinking About an Activity	106
5.7.5	Thinking About the Product Development Activity	106
5.7.6	Thinking About Focus	107
5.7.7	Thinking About Voices	107
5.7.8	Thinking About Time	107
5.7.9	Thinking About Customers	107
5.7.10	Thinking About the Portfolio	108
5.7.11	Thinking About the Product	108
5.7.12	Thinking About the Product Lifecycle Approach	108
5.7.13	Thinking About the Management Role	109
5.7.14	Thinking Profit or Planet	109
5.7.15	Thinking About Processes, Data, Applications	109
6	Opportunities and PLM	111
6.1	Opportunities of a Growing Market	111
6.2	Technology Opportunities	112
6.3	Smart Product Opportunity	113
6.4	Opportunity of Global Products	114

6.5	Social and Environmental Opportunities for Products.	115
6.6	More Opportunities for Products	116
6.6.1	Unsolved Problems	116
6.6.2	Future Changes	116
6.6.3	Balance of Power.	117
6.6.4	Increased Regulation	118
6.6.5	Better Managed Product Companies.	118
6.6.6	Multitude of New Products	119
6.6.7	More Web-Based Product-Related Services.	119
6.6.8	Breakthrough Computer Aided Product Development.	120
6.7	So Much Opportunity	120
6.8	Response to Opportunity	120
6.9	From Opportunities to Detailed Benefits	121
7	Product	123
7.1	Product Importance, Range, Instance	123
7.1.1	Importance	123
7.1.2	Range of Products	123
7.1.3	More than the Product	124
7.1.4	Instance of a Product	124
7.1.5	Number of Products	124
7.1.6	Commonality.	125
7.2	Parts, Ingredients, Components, Assemblies	125
7.2.1	Range of Parts.	125
7.2.2	Number of Parts	125
7.2.3	Part and Product	126
7.3	Identifier	126
7.3.1	Need for an Identifier.	126
7.3.2	Name, Number	126
7.3.3	Internal, and Other, Names/Numbers	127
7.3.4	Serial Numbers	127
7.3.5	Significant Numbers.	127
7.3.6	Product Key	128
7.3.7	Naming Languages	128
7.3.8	Some Product and Part Identifiers	129
7.3.9	Product Name and Part Name	129
7.3.10	Trade Mark.	130
7.4	Requirements	130
7.4.1	Customer Requirements	130
7.4.2	Requirements for Global Products	131
7.5	From Customer Requirement to Product Specification	131

7.6	Identification Standards	132
7.6.1	Global Trade Item Number	132
7.6.2	International Standard Book Number	133
7.6.3	International Mobile Equipment Identity	133
7.6.4	International Standard Music Number.	133
7.6.5	CAS Registry Numbers	133
7.7	Unique Identifier, Unique Key	134
7.8	Traceability	134
7.9	Communication of Identifier.	134
7.9.1	Type of Communication	134
7.9.2	UPC Barcode	135
7.9.3	EAN-13	135
7.9.4	Two-Dimensional Barcodes.	135
7.10	Product Classification	135
7.10.1	Classification.	135
7.10.2	Advantages of Classification	136
7.10.3	Classification Systems	136
7.11	Versions, Variants, Options	136
7.11.1	Lifecycle State.	136
7.11.2	Version, Iteration	137
7.11.3	Variant, Option	137
7.12	Product Ownership	137
7.12.1	Rights	137
7.12.2	Intellectual Property	138
7.13	Product Structure and Architecture	138
7.13.1	Structures	138
7.13.2	Bill of Materials	139
7.13.3	Product Architecture.	141
7.13.4	Product Portfolio	141
7.13.5	Product Model.	142
7.14	Description, Definition and Representation	142
7.15	From Customer Requirement to Performance	143
7.16	No Product Is an Island	143
7.17	The Challenges.	144
7.18	The Way Forward.	144
8	Product Data	145
8.1	Product and Product Data.	145
8.2	Product Data Examples	146
8.3	Product Data Issues.	146
8.3.1	Access to Product Data.	147
8.3.2	Applications	147
8.3.3	Archiving of Data	148
8.3.4	Availability of Data	148

8.3.5	Change	148
8.3.6	Copies of Data	149
8.3.7	Confidentiality of Data	149
8.3.8	Configuration	149
8.3.9	Definition of Data	149
8.3.10	Duplicate and Redundant Data.	150
8.3.11	Exchange of Data	151
8.3.12	File-Based Data	151
8.3.13	Formal Description.	152
8.3.14	History	152
8.3.15	Identification and Classification Systems.	152
8.3.16	Inconsistent Data	152
8.3.17	Incorrect Data	153
8.3.18	Informally Annotated Documents.	153
8.3.19	Informal Communication of Data.	153
8.3.20	Input of Data.	153
8.3.21	Interoperability	154
8.3.22	Languages.	154
8.3.23	Level of Detail	154
8.3.24	Library of Data	154
8.3.25	Location of Data	155
8.3.26	Long-Life Data	155
8.3.27	Manuals	156
8.3.28	Media.	156
8.3.29	Meaning of Data	157
8.3.30	Missing Data.	157
8.3.31	Navigation to Data.	157
8.3.32	Ownership of Data.	157
8.3.33	Processing of Data.	158
8.3.34	Project Data	158
8.3.35	Re-invention of Existing Data	158
8.3.36	Relationships Between Data	159
8.3.37	Representations of Data	160
8.3.38	Rules Deficit.	161
8.3.39	Searching for Data.	162
8.3.40	Security of Data.	162
8.3.41	Sources of Data.	163
8.3.42	Software	163
8.3.43	Standards for Data	163
8.3.44	States of Data	164
8.3.45	Structure of Data	164
8.3.46	Tabulated Documents.	164
8.3.47	Traceability of Data	165
8.3.48	Training Deficit	165

8.3.49	Type and Format of Data	165
8.3.50	Update Frequency of Data	166
8.3.51	Users of Data	166
8.3.52	Uses of Data	166
8.3.53	Value of Data Unknown	167
8.3.54	Variants and Options	167
8.3.55	Versions of Data	167
8.3.56	Versions of Applications	168
8.3.57	Views of Data	168
8.3.58	Vocabulary	169
8.3.59	Volume of Data	169
8.3.60	Workflow	170
8.3.61	Consequence	170
8.4	Metadata	171
8.4.1	Data Fields in Paper Documents	171
8.4.2	Data About Data	171
8.4.3	Examples of Metadata	171
8.5	Models	172
8.5.1	Need for Models	172
8.5.2	Sub-models	173
8.5.3	Different Models	173
8.5.4	Different Levels of a Model	173
8.5.5	Iterative Approach	173
8.5.6	Involvement in Modelling	174
8.5.7	Modelling Tools	174
8.5.8	Modelling Techniques	174
8.5.9	Characteristics of Models	175
8.6	Product Data Models	175
8.6.1	Data Flow	175
8.6.2	Entity-Relationship Model	176
8.6.3	Class Diagram	177
8.6.4	State Diagram	179
8.7	Product Data Is not an Island	179
8.8	The Challenges	180
8.9	The Way Forward	180
9	Process	181
9.1	Introduction and Definition	181
9.1.1	Action Across the Lifecycle	181
9.1.2	Organising the Action	181
9.1.3	Processes for PLM	183
9.2	Defining Characteristics	184
9.3	Unwanted Characteristics	185
9.3.1	Unclear Names	185

9.3.2	Other Unwanted Characteristics	186
9.3.3	Process Waste	187
9.4	Application Workflow, Product Workflow	187
9.4.1	Application Workflow	187
9.4.2	Product Workflow	187
9.5	Product Workflow and Information Flow	190
9.6	Process Mapping and Modelling	191
9.7	Hierarchical Process Structure	191
9.8	Activity Flow	192
9.9	Data Model, Process Map	194
9.10	Use Case Description	194
9.11	Use Case Diagram	195
9.12	No Process Is an Island	197
9.13	The Challenges	197
9.14	The Way Forward	197
10	PLM Applications	199
10.1	Introduction	199
10.2	Applications Overview	199
10.2.1	BOM Applications	200
10.2.2	Compliance Management	200
10.2.3	CSM Applications	201
10.2.4	CAD Applications	201
10.2.5	CAE Applications	202
10.2.6	CAID Applications	202
10.2.7	CAM Applications	202
10.2.8	CAPE Applications	202
10.2.9	CAPP Applications	202
10.2.10	CASE Applications	203
10.2.11	CIM	203
10.2.12	Data Exchange Applications	203
10.2.13	DECM Applications	203
10.2.14	Digital Manufacturing Applications	204
10.2.15	DMU Applications	204
10.2.16	EDI Applications	204
10.2.17	EDA Applications	204
10.2.18	ECM Applications	204
10.2.19	EDM Applications	204
10.2.20	FEA Applications	205
10.2.21	Geometric Modelling Applications	205
10.2.22	Haptic Applications	205
10.2.23	IM Applications	205
10.2.24	IPM Applications	205
10.2.25	KBS	205

10.2.26	LCA Applications	206
10.2.27	MRP 2 Applications.	206
10.2.28	NC Applications	207
10.2.29	Parts Catalogue Applications	207
10.2.30	Parts Libraries	207
10.2.31	Phase-Gate Applications	207
10.2.32	Portfolio Management Applications	207
10.2.33	PDM Systems	208
10.2.34	PM Applications	208
10.2.35	RP Applications.	208
10.2.36	Requirements Management Applications.	209
10.2.37	Reliability Management Applications	209
10.2.38	Simulation Applications	209
10.2.39	SCM Applications	210
10.2.40	TDM Applications	210
10.2.41	Technical Publication Applications.	210
10.2.42	Translation Management Applications	210
10.2.43	VR Applications	210
10.2.44	VE Applications	210
10.2.45	Virtual Prototyping Applications	211
10.2.46	Visualisation and Viewing Applications	211
10.2.47	3D Printing Applications.	211
10.2.48	3D Scanning Applications.	211
10.3	Issues of Applications	211
10.3.1	Ambiguous Name and Unclear Scope.	212
10.3.2	Islands of Automation	212
10.3.3	Departmental Islands, Supplier Islands	213
10.3.4	Interface and Integration Need.	213
10.3.5	Overlapping Data Management Functionality.	213
10.3.6	Different User Interfaces.	214
10.3.7	Organisational Match	214
10.3.8	Limited Operating Environment.	214
10.3.9	Versions	214
10.3.10	Legacy Applications.	215
10.3.11	Neglected Functionality	215
10.4	Grouping the Applications	215
10.4.1	First Grouping.	215
10.5	Generic and Specific PLM Applications.	216
10.6	Generic PLM Applications	217
10.6.1	Data Management/Document Management	217
10.6.2	Part Management/Product Management/ Configuration Management	217
10.6.3	Process Management/Workflow Management	217
10.6.4	Program Management/Project Management	218

10.6.5	Collaboration Management	218
10.6.6	Visualisation	218
10.6.7	Integration	218
10.6.8	Infrastructure Management	218
10.6.9	Idea Management.	219
10.6.10	Product Feedback Management	219
10.7	Task-Specific PLM Applications	219
10.7.1	Product Portfolio Management.	219
10.7.2	Idea Generation Management	219
10.7.3	Requirements and Specifications Management.	220
10.7.4	Collaborative Product Definition Management.	220
10.7.5	Supplier and Sourcing Management	220
10.7.6	Manufacturing Management	220
10.7.7	Maintenance Management.	220
10.7.8	Environment, Health and Safety Management	220
10.7.9	Intellectual Property Management	221
10.8	Applications and Data Management.	221
10.9	File-Based Data Management	221
10.9.1	Problems with Files	222
10.9.2	Files and Fields	222
10.10	Databases and Data Management	223
10.10.1	Database Management Systems	223
10.10.2	DBMS in Commercial Environments	223
10.10.3	Commercial and Product Database Differences	224
10.10.4	A Metadata DBMS	224
10.10.5	Database Vocabulary	225
10.11	Data Models.	226
10.11.1	Hierarchical Data Model.	227
10.11.2	Network Data Model	228
10.11.3	Relational Data Model	228
10.11.4	Object-Oriented Data Model	229
10.12	No PLM Application Is an Island	230
10.13	The Challenges.	230
10.14	The Way Forward.	231
11	The PDM System	233
11.1	Introduction	233
11.2	PDM System Overview	233
11.3	Importance of the PDM System	235
11.4	The Eight Components	236
11.4.1	Information Warehouse.	236
11.4.2	Information Warehouse Manager	237
11.4.3	Infrastructure.	238
11.4.4	System Administration Manager	239

11.4.5	Interface Module	239
11.4.6	Product and Workflow Structure Definition Module	240
11.4.7	Workflow Control Module	241
11.4.8	Information Management Module	242
11.5	Benefits of PDM.	243
11.6	Common Issues	244
11.6.1	Naming, Functionality, Scope	245
11.6.2	Change, Version Management	245
11.6.3	Interfaces	246
11.6.4	Data Model, Workflow	246
11.6.5	Ownership, Funding, Support	247
11.6.6	Fit in IS Architecture	247
11.6.7	Customisation, Installation	247
11.6.8	Everyday Use	248
11.7	Little Data Management Excitement	250
11.8	No PDM System Is an Island	251
11.9	The Challenges	252
11.10	The Way Forward	252
12	People	253
12.1	Introduction	253
12.2	It's a Jungle	253
12.2.1	Different Products	254
12.2.2	Different Companies	254
12.2.3	Different Departments	255
12.2.4	Same Job, Different Title	255
12.2.5	Same Title, Different Job	255
12.2.6	Different Locations	256
12.2.7	Different Background	256
12.2.8	Different Computer Literacy	256
12.2.9	Different Data Need	256
12.2.10	Different HR Policies	256
12.2.11	Different Metrics	257
12.2.12	Different Bonus Systems	257
12.2.13	Different Languages	257
12.2.14	Different Culture	257
12.2.15	Changing Population	257
12.2.16	Different Roles	258
12.2.17	Different Sins	258
12.2.18	Response to PLM	258
12.3	Nobody Is an Island	259
12.4	The Challenges	259
12.5	The Way Forward	260

13	Methods	261
13.1	Introduction	261
13.1.1	The Need	261
13.1.2	Improvement Initiatives	262
13.2	Overview of Methods	263
13.2.1	ABC	263
13.2.2	Alliance Management	263
13.2.3	Benchmarking	263
13.2.4	BPR	264
13.2.5	CWQC	264
13.2.6	Concurrent Engineering	264

13.3	Some Characteristics of Methods	279
13.3.1	Unclear Name	280
13.3.2	Overlap Between Methods	280
13.3.3	Overlap Between Methods and Applications	280
13.3.4	Confusion Between Methods and Processes.	280
13.3.5	Duplication of Existing Activities.	280
13.3.6	Unclear Definition	281
13.3.7	Unclear Metrics	281
13.3.8	Difficult to Implement	281
13.3.9	Method Evolution and Confusion.	281
13.3.10	Market Push	282
13.4	No Method Is an Island	282
13.5	The Challenges.	282
13.6	The Way Forward.	283
14	Facilities and Equipment.	285
14.1	Introduction	285
14.2	Characteristics	286
14.2.1	Range, Specialities	286
14.2.2	Lean, High Throughput	287
14.2.3	Automation	287
14.2.4	Standards	287
14.2.5	Simulation	287
14.2.6	High Capital Cost	288
14.2.7	Know-How, Training	288
14.2.8	Tuning, Feedback	288
14.3	No Facility Is an Island	288
14.4	The Challenges.	289
14.5	The Way Forward.	289

15 Metrics.	291
15.1 Introduction	291
15.2 Characteristics	292
15.2.1 Naming, Definition	292
15.2.2 Business Relevance	293
15.2.3 Current Value	293
15.2.4 Metrics and Targets for PLM	294
15.2.5 Metrics and Targets Example	294
15.2.6 Number and Priority.	295
15.2.7 Balance and Consistency	295
15.2.8 Level	296
15.2.9 Reporting and Action.	296
15.3 Improvement Projects	296
15.4 Project Justification Vocabulary	297
15.5 Time Value of Money	299
15.6 NPV and ROI.	300
15.7 Cost Justification.	302
15.8 Identification of Benefits	303
15.9 Project Calculations.	304
15.10 Benefit Asset Pricing Model.	307
15.11 No Metric Is an Island.	307
15.12 The Challenges.	308
15.13 The Way Forward.	308
16 Organisation.	309
16.1 Introduction	309
16.2 Characteristics	309
16.2.1 Scope.	310
16.2.2 Complexity, Inter-relations	310
16.2.3 Identification	311
16.2.4 Detailing.	312
16.2.5 Documentation	312
16.2.6 Communication	313
16.2.7 Implementation	313
16.2.8 Responsibility	313
16.3 Changing Environment and Organisation	313
16.4 No Organisation Is an Island	315
16.5 The Challenges.	315
16.6 The Way Forward.	316
17 Reasons for Implementing a PDM System	317
17.1 The PDM System in the PLM Environment	317
17.2 Two Classes of Reasons	318
17.3 Information Management	319

17.3.1	Basic Data Control and Management	320
17.3.2	Data Access	321
17.3.3	Advanced Information Control and Management	321
17.4	Re-use of Information	322
17.5	Workflow Management	326
17.6	Engineering Change Management	328
17.7	Overall Business Performance Improvement	331
17.8	Resolution of Business Problems.	332
17.9	Functional Performance Improvement	334
17.10	Better Management of Product Development Activities	336
17.11	Automation of Product Development Activities.	338
17.12	IS Effectiveness Improvement.	340
17.13	Infrastructure for Effective Product Development	343
17.14	Questions About the Future Role of PDM	345
18	Forewarned Is Forearmed.	347
18.1	Reasons and Replies	347
19	FAQs About PDM Implementation and Use.	357
19.1	What PDM Functionality Do We Need?	357
19.2	Who Should We Involve in PDM?	359
19.3	How Do We Cost-Justify PDM?	361
19.4	Does PDM Fit with Concurrent Engineering?	363
19.5	How Should We Introduce PDM?	364
19.6	Should We Buy or Make PDM?	367
19.7	Should We Outsource PDM?	368
20	Barriers to Successful Implementation of PDM	371
20.1	The System Barrier	371
20.2	The People Barrier	372
20.3	The Project Team Barrier.	374
20.4	The Process Barrier.	375
20.5	The Organisational Structure Barrier	377
20.6	The Funding Barrier	379
20.7	The Information Barrier	381
20.8	The Installation Barrier	383
20.9	The Everyday Use Barrier	384
21	Of PLM Vision and Strategy.	387
21.1	Objectives	387
21.1.1	Strategy	387
21.1.2	Mission	388
21.1.3	Vision	388
21.1.4	Plan	388

21.1.5	Tactics	389
21.1.6	Policy.	389
21.2	From Vision to Plan	390
21.3	A PLM Vision	391
21.4	Basic Points About the PLM Vision	391
21.5	Position of the PLM Vision	392
21.6	Metrics and the PLM Vision	393
21.7	In the Absence of a PLM Vision.	394
21.8	Reasons for Developing the PLM Vision	395
21.9	Thinking About Visions.	397
21.10	The Danger of Underestimating Vision	399
21.11	Vision Description and Documentation	400
21.12	The PLM Strategy.	402
21.13	An Implementation Strategy	403
21.14	Industrial Experience of Visioning.	404
21.15	Progress Depends on Retentiveness.	406
21.16	Similarities and Differences	407
22	Strategies	409
22.1	Military Strategy.	409
22.2	American Civil War	411
22.3	France	412
22.4	The English Channel.	413
22.5	Russia	414
22.6	The Pacific Ocean.	415
22.7	Lessons Learned	416
22.7.1	History Repeats Itself.	416
22.7.2	Over Time, Strategies Change	416
22.7.3	Offensive or Defensive Strategy.	417
22.7.4	Small Range of Simple Strategies	417
22.7.5	Strategy Depends on Objectives.	418
22.7.6	Hierarchy of Strategies	418
22.7.7	Danger of Change During Implementation	418
22.8	Principles of Military Strategy	418
22.9	Manufacturing Strategy	419
22.10	Company Strategy.	421
22.11	Principles of Business Strategy	423
22.12	Importance of Strategy.	424
22.13	Principles of Strategy.	424
22.13.1	Principles of Military Strategy	424
22.13.2	Company Principles	425
22.13.3	PLM Principles	425

22.14	Implications of Principles	426
22.15	Coherent PLM Vision, Strategy and Plan	427
22.16	Continually Improve	428
23	Getting Executive Support	431
23.1	Getting Started	431
23.2	Not so Easy	432
23.3	Different Span of Activities	433
23.4	Differences Between Industries	433
23.5	Different Reasons for PLM	436
23.5.1	Cost, Quality, Time, Business Process Improvement	436
23.5.2	Innovation.	437
23.5.3	Compliance.	438
23.5.4	Mechatronic Products	438
23.5.5	Collaboration.	438
23.5.6	Intellectual Property Management	439
23.6	Limited Headway	439
23.6.1	Middle Managers	439
23.6.2	Executives	440
23.7	Company Dilemma	440
23.8	Personal Dilemma	441
23.9	Going Nowhere	442
23.10	Examples of the PLM Dilemma	443
23.11	Overcoming the PLM Dilemma in Three Months	446
23.12	The PLM Initiative	447
23.13	PLM Initiatives, from Strategic to Tactical	449
23.14	Understanding the Way Forward	451
23.14.1	First Time Entry	452
23.14.2	PLM Business Case Creation	452
23.14.3	PDM to PLM Expansion	452
23.14.4	Competitive Pressures.	453
23.15	The 10 Step Approach to PLM Launch	453
23.16	Results of Use of the Ten Step Approach.	455
23.16.1	Understanding and Quantifying Options	455
23.16.2	Managing the Post-acquisition Situation	456
23.16.3	From PDM to PLM	456
23.16.4	Getting Started with PLM	457
23.16.5	Engineering Change Management	457
23.16.6	Identification of Benefits and Risks	457
23.16.7	Two Proposed Solutions	457
23.16.8	Common Benefits	457
23.17	Plan for Next Steps	458

24	Developing PLM Vision and PLM Strategy	459
24.1	Deliverables of Vision Development	459
24.1.1	The PLM Vision Report	459
24.1.2	PowerPoint Vision Presentation	459
24.1.3	One-Page PLM Vision Overview	459
24.2	The Visioning Process	461
24.2.1	First Thoughts for the Vision	461
24.2.2	Horses for Courses	462
24.2.3	Executive Input	463
24.2.4	Looking at Competitors	465
24.2.5	With Executive and Competitive Input	466
24.2.6	Review	466
24.3	Haziness of the Vision	466
24.4	Vision Structure. Slicing and Dicing	468
24.5	A Five-Step Process	469
24.6	Step 1: Gathering Information	470
24.7	Step 2: Identifying Strategies	470
24.7.1	Resources	470
24.7.2	Strategy	470
24.7.3	Strategy Elements	472
24.7.4	Implications of Strategy Elements	475
24.8	Step 3: Selecting the Preferred Strategy	476
24.9	Step 4: Communicating the Strategy	478
24.10	Implementation Strategy	479
24.11	The PLM Plan	479
24.12	PLM Vision and Strategy Team	480
24.13	Ramping up PLM Knowledge	482
25	Example of a PLM Vision	485
25.1	Overview	485
25.2	Overview of the PLM Vision	485
25.3	More Detailed Overview	488
25.4	Vision, Strategy, Plan, Metrics	489
25.5	Products	490
25.5.1	Product Focus	490
25.5.2	Product Portfolio	490
25.5.3	Five-Year Strategy and Plan	491
25.5.4	New Technologies	491
25.5.5	Progress with Products	492
25.6	Customers	492
25.6.1	Customer Focus	493
25.6.2	Voice of the Customer	493
25.6.3	Customer Involvement	493
25.6.4	Progress with Customers	494

- 25.7 Organisation 494
 - 25.7.1 Product Family Teams 494
 - 25.7.2 PLM Responsibilities 495
 - 25.7.3 Product Development and Support Methodology . . . 496
- 25.8 Management, Control, Visibility 496

28	Describing the Future Situation	537
28.1	Some Questions	537
28.1.1	Scope and Perimeter	538
28.1.2	Project Team	539
28.1.3	Initial Input Collection	540
28.1.4	Future Situation Deliverables	540
28.1.5	Approach	542
28.1.6	Plan	542
28.2	Internal Input	543
28.2.1	Existing Information	543
28.2.2	Current Situation Analysis	543
28.2.3	Requests from Lifecycle Participants	544

28.3	External Input.	544
28.3.1	Smart Products	544
28.4	Product Strategy	545
28.4.1	Managed Complexity and Change OEM.	545
28.4.2	Global Complex Assembly Provider.	546
28.4.3	Low-Cost Commodity Supplier	546
28.4.4	Product Portfolio and Product Architecture	546
28.4.5	Beyond the Product	547
28.5	Common Steps	548
28.5.1	Think Global.	549
28.5.2	Understand the Global Market.	549
28.5.3	Select the Markets	549
28.5.4	Product Strategy	549
28.5.5	Upfront Planning	549
28.5.6	Prescriptive Approach.	549
28.5.7	Clear and Common Terminology.	550
28.5.8	Architectures and Models	550
28.5.9	Digital Product and Digital Manufacturing	550
28.6	Benchmarking	550
28.6.1	Actual Situation.	551
28.6.2	Improvement Objective.	551
28.6.3	Action	551
28.6.4	Results	552
28.6.5	Lessons Learned	553
28.7	Towards the Future Situation	553
28.8	PLM Environment Model.	554
29	PLM Implementation Strategy and Plan	555
29.1	Some Questions	555
29.1.1	Starting Position	556
29.1.2	Scope.	556
29.1.3	Approach	557
29.1.4	Project Team.	560
29.1.5	Deliverables	560
29.1.6	Plan	561
29.2	Influencing Factors	562
29.2.1	Order of Components.	562
29.2.2	Prototype	563
29.2.3	Bite Size.	563
29.2.4	Starting Activities	564
29.2.5	Simple High-Level Message	564
29.2.6	Extending Deployment Capability	565

30	PLM Action	567
30.1	Some Questions	567
30.1.1	Starting Position	567
30.1.2	Recap.	568
30.1.3	Differences Between Companies	568
30.1.4	Roles, Responsibility, Involvement.	568
30.1.5	Project Team and Others.	569
30.1.6	Actions and Reports	570
30.1.7	Reporting Progress	570
30.1.8	Balanced PLM Action	570
30.1.9	Plan	571
30.2	Forewarned Is Forearmed	572
30.2.1	Looming Failure	572
30.3	Recommendations for Project Managers	573
30.3.1	Wait and Think	573
30.3.2	Focus on Benefits	575
30.3.3	Customer Care	575
30.3.4	Do's and Don'ts	576
30.4	Actions	576
30.4.1	Company-Specific Actions	576
30.5	Product Structure	578
30.5.1	Method	578
30.5.2	Tools	578
30.5.3	Different Product Structures	579
30.5.4	As-is Situation	580
30.5.5	Towards to-Be	580
30.5.6	To-Be	581
30.5.7	Benefits	582
30.6	Processes	582
