

Contents

1	Introduction	1
1.1	Helicopter Vibration Problem	1
1.2	Passive Control of Vibration.	2
	1.2.1 Vibration Suppression Devices	3
	1.2.2 Aeroelastic Optimization	3
1.3	Active Control of Vibration	4
	1.3.1 Higher Harmonic Control.	5
	1.3.2 Individual Blade Control	6
	1.3.3 Smart Rotors	7
1.4	Actuation of Trailing-Edge Flaps.	10
	1.4.1 Piezo-Bimorph Actuators	10
	1.4.2 Piezoelectric Stack Actuators	12
1.5	Induced Shear Strain Actuation.	14
1.6	Optimal Placement of Actuators in Active Structures.	14
1.7	Actuator Hysteresis Models	16
	1.7.1 Static Hysteresis Models	17
	1.7.2 Dynamic Hysteresis Models	18
1.8	Active Twist Rotors	19
	1.8.1 Early Studies	19
	1.8.2 Smart Active Blade Tips (SABT)	21
	1.8.3 Active Fiber Composites (AFC)	23
	1.8.4 NASA/Army/MIT Active Twist Rotor.	24
	1.8.5 Smart Composite Rotor Modeling	25
	1.8.6 Induced Shear Mechanisms	29
1.9	Suppression of Dynamic Stall-Induced Vibration.	30
1.10	Organization of the Book	32
	References.	33

2	Mathematical Modeling	41
2.1	Piezoelectric Materials	41
2.1.1	Single Crystals	45
2.2	Piezoceramic Actuation	48
2.3	Key Terminologies and Nondimensional Parameters	50
2.3.1	Nondimensionalization	52
2.4	Structural Modeling	53
2.4.1	Hamilton's Principle	53
2.4.2	Smart Structure Expressions	55
2.4.3	Identification of Smart Terms	57
2.4.4	Finite Element—Spatial Discretization	58
2.4.5	Normal Mode Transformation	59
2.4.6	Finite Element—Temporal Discretization	60
2.5	Aerodynamic Models	62
2.5.1	Attached Flow Formulation	62
2.5.2	Reverse Flow	62
2.5.3	Inflow and Rotor Wake Modeling	63
2.5.4	Dynamic Stall Formulation	65
2.6	Blade and Hub Loads	65
2.6.1	Coupled Trim	66
2.7	Organization of Aeroelastic Analysis	68
2.8	Summary	68
	References	69
3	Preliminary Studies with Active Flaps	71
3.1	Trailing-Edge Flap Model	71
3.2	Formulation of Optimization Problem	72
3.3	Numerical Results	73
3.4	Summary	80
	References	80
4	Flap Configuration and Control Law	81
4.1	Flap Inertial Loads	81
4.2	Flap Aerodynamic Loads	83
4.3	Flap Control Algorithm	86
4.4	Differential Versus Uniform Weighting Method	89
4.5	Flap Location Studies Based on Modes	92
4.6	Physics Behind Modal Location of Flaps	95
4.7	Trailing-Edge Flap Actuation Power	97
4.8	Trailing-Edge Flap Hinge Loads	98
4.9	Redundancy in Multiple-Flap Configurations	98
4.10	Summary	100
	References	101

5	Active Flap Controller Evaluation	103
5.1	Performance of Global Controller	103
5.2	Control Law Sensitivity Studies	106
5.2.1	Error in Flap Phasing	106
5.2.2	Error in Flap Control Inputs	106
5.2.3	Sensitivity to Plant Parameters	107
5.3	Noise in Hub Loads Measurements	109
5.4	Summary	111
	References	111
6	Trailing-Edge Flap Placement	113
6.1	Surrogate Models	113
6.2	Optimization Problem	114
6.3	Response Surface Methodology	116
6.4	Numerical Results	118
6.4.1	Response Surface Generation	119
6.4.2	Analysis of Response Surfaces	120
6.4.3	Identification of Best Design Point	122
6.4.4	Performance at Various Forward Speeds	124
6.5	Summary	126
	References	127
7	Piezoceramic Actuator Hysteresis	129
7.1	Classical Preisach Model	129
7.2	Modified Control Algorithm	135
7.3	Performance of Linear and Hysteretic Actuators	137
7.4	Hysteresis Compensation Algorithm	152
7.4.1	Numerical Results	153
7.5	Summary	163
	References	163
8	Active Rotating Beams	165
8.1	Background	165
8.2	Model Details	166
8.3	Bending Actuation	167
8.4	Shear or Torsional Actuation	168
8.5	Shear Actuation with Sinusoidal Loads	171
8.6	Bending Actuation with Sinusoidal Loads	172
8.7	Torsion Actuation with Pretwist	174
8.8	Summary	175
	References	175
9	Box-Beam Active Rotor Blades	177
9.1	Model Details	177
9.2	Piezoceramic Nonlinearity	179
9.3	Open-Loop Control	180

9.4	Closed-Loop Control	182
9.5	Summary	185
	References.	187
10	Airfoil-Section Rotor Blade	189
10.1	Model Details and Structural Properties	190
10.2	Validation Studies	195
10.3	Actuator Placement	196
10.4	Blade Response	198
10.5	Blade Loads	202
10.6	Hub Loads	215
10.7	Aeromechanical Stability	216
10.8	Trim Angles and Rotor Power	216
10.9	Summary	218
	References.	219
11	Dynamic Stall Alleviation Using Active Twist	221
11.1	Single-Crystal Piezoceramics	222
11.2	Rotor Blade Model	222
11.3	Influence of Structural Properties	224
11.4	Importance of Dynamic Stall and Unsteady Flow Separation	227
11.5	Actuator Placement for PZT-5H	228
11.6	Actuator Placement for PZN-8%PT	230
11.7	Robustness of Controller	232
11.8	Vibration Reduction Due to PZT-5H and PZN-8%PT	233
11.9	Variations in Angle of Attack for PZN-8%PT	237
11.10	Actuator Failure and Degradation	241
11.11	Summary	248
	References.	248
	Appendix A: Kinetic and Strain Energy Terms	251
	Appendix B: Section Properties	253
	Appendix C: Shape Functions for Space	255
	Appendix D: Shape Functions for Time	257

Smart Helicopter Rotors

Optimization and Piezoelectric Vibration Control

Ganguli, R.; Thakkar, D.; Viswamurthy, S.R.

2016, XIII, 257 p. 213 illus., Hardcover

ISBN: 978-3-319-24766-3
