

Contents

1	Ordered Responsive Materials for Sensing Applications	1
	Qiang Matthew Zhang, Siyuan Guo, Jiaqi Duan and Michael J. Serpe	
1.1	Introduction	1
1.2	One-Dimensional Ordered Materials	2
1.3	Two-Dimensional Ordered Materials	13
1.4	Three-Dimensional Ordered Materials	16
1.5	Other Noteworthy Photonic Materials for Sensing	23
1.6	Summary	28
	References	28
2	Stimulus-Responsive Colored Materials for Sensing and Display Devices	33
	Yukikazu Takeoka	
2.1	Introduction	33
2.2	Stimulus-Responsive Structurally Colored Materials Using Colloidal Crystals	35
2.3	Stimulus-Responsive Structurally Colored Materials Using Colloidal Amorphous Arrays with Short-Range Order	38
2.4	Angle-Independent Colored Materials Using the Christiansen Effect	43
2.5	Conclusions	48
	References	48
3	Colloidal Photonic Crystals for Sensor Applications	51
	Shin-Hyun Kim and Gi-Ra Yi	
3.1	Self-assembled Colloidal Crystals	52
3.1.1	Close-Packed Colloidal Crystals	52
3.1.2	Non-close-Packed Colloidal Crystals	54

3.2	Properties of Colloidal Crystals and Their Derivatives	55
3.2.1	Optical Property	55
3.2.2	Mechanical Property	57
3.3	Stimuli-Responsive Materials	59
3.3.1	Responsive Colloids	59
3.3.2	Responsive Matrix	60
3.4	Formats of Photonic Structures	60
3.4.1	Planar Films	60
3.4.2	Cylindrical Fibers	61
3.4.3	Spherical Granules	62
3.5	Sensor Applications	62
3.5.1	Refractive Index Sensors	62
3.5.2	Strain Sensors	64
3.5.3	Temperature Sensors	65
3.5.4	Ionic Strength and pH Sensors	68
3.5.5	Detection of Specific Ions and Small Molecules	70
3.5.6	Detection of Large Biomolecules	73
3.6	Summary and Outlook	74
	References	75
4	Responsive Photonic Gels Based on Block Copolymers	79
	Youngjong Kang, Jinho Hyon, Chunhee Seo and Chinna Bathula	
4.1	Introduction	79
4.2	Fundamentals of Photonic Crystals	81
4.3	Preparation of Photonic Gels	83
4.3.1	Self-assembly of Block Copolymers	83
4.3.2	Block Copolymer Photonic Gels by Swelling with Diluents	86
4.4	Stimuli Responsive Photonic Gels	89
4.4.1	Chemochromic Photonic Gels	89
4.4.2	Mechano-, Thermochromic Photonic Gels	94
4.4.3	Electrochromic Photonic Gels	96
4.4.4	Photochromic Photonic Gels	97
4.5	Summary and Outlook	97
	References	98
5	Photonic Crystals Fabricated via Facile Methods and Their Applications	101
	Wendong Liu, Xueyao Liu and Bai Yang	
5.1	Introduction	101
5.2	Photonic Crystals Simply Fabricated	103
5.2.1	One-Dimensional Photonic Crystals (1DPC) Prepared by Spin-Coating	103

5.2.2	Two-Dimensional Photonic Crystals (2DPC) Evolved by Colloidal Chemistry	107
5.2.3	Three-Dimensional Photonic Crystals (3DPC) Fabricated via the Assembly of Colloidal Crystal and Other Facile Methods	115
5.3	Applications of Photonic Crystals	121
5.3.1	Photonic Crystals Used in the Field of Display.	121
5.3.2	Photonic Crystals Used for Sensing.	132
5.4	Summary and Perspectives.	144
	References.	146
6	Photonic Crystal Based Anti-Counterfeiting Materials	159
	Siyun Ye and Jianping Ge	
6.1	Introduction	159
6.2	Photonic Printing Based on the Tuning of Photonic Structures.	161
6.3	Photonic Prints with Angular Dependent Structural Colors.	167
6.3.1	Angular Dependent Effect in Photonic Crystal Patterns	167
6.3.2	Orientalional Printing	171
6.4	Invisible Photonic Prints	175
6.4.1	Invisible Photonic Prints Shown by Water	175
6.4.2	Invisible Photonic Prints Shown by Deformation	178
6.4.3	Invisible Photonic Prints Shown by Magnetic Interaction	181
6.5	Photonic Crystal Based Codec	185
	References.	187
7	Photonic Crystals as Robust Label-Free Biosensors	189
	Mark A. Lifson and Benjamin L. Miller	
7.1	Introduction	189
7.2	1D-PhCs in Biosensing	191
7.3	Design, Development, and Optimization of 2D-PhCs.	194
7.4	Biosensing with 2D-PhCs	196
7.5	Enhancing Sensitivity Through Directed Functionalization	200
7.6	Current Challenges and Future Outlook for 2D-PhCs	204
	References.	204
8	Sensing on Single Plasmonics	209
	Chao Jing and Yi-Tao Long	
8.1	Introduction	209
8.2	Morphology and Composition Modulated Sensors.	210
8.3	Inter-particle Coupling.	218
8.4	Plasmon Resonance Energy Transfer	221

8.5	Spectroelectrochemistry	224
8.6	Conclusions and Future Prospects	230
	References.	231
9	Whispering Gallery Mode Devices for Sensing and Biosensing . . .	237
	A. François, Y. Zhi and A. Meldrum	
9.1	Introduction	238
9.2	Theory of WGMs in Cylindrical and Spherical Geometries . . .	239
	9.2.1 Two-Layer Structures	244
	9.2.2 Three-Layer Structures	246
9.3	Sensitivity and Detection Limits	248
	9.3.1 Disk or Fiber	250
9.4	Surface Chemistry for Biosensing	253
	9.4.1 Grafting or Covalent Binding	254
	9.4.2 Physisorption	256
9.5	Fluorescent Microspheres, Fibers, and Capillaries	261
9.6	Microdisks and Toroids	267
	9.6.1 Refractive Index Sensing	269
	9.6.2 Displacement Sensors	270
	9.6.3 Gas Sensors	270
	9.6.4 Gamma-Ray Sensors	270
	9.6.5 Surface Curvature Sensors	271
	9.6.6 Biosensors	271
9.7	WGM Sensors: Comparison with Competing Technologies . . .	272
	9.7.1 Mass Spectroscopy	272
	9.7.2 Electrochemical Methods	272
	9.7.3 Optical Methods	273
	9.7.4 Biosensing Technologies for Medical Diagnostics . . .	277
9.8	Outlook	278
	References.	280
10	High Sensitivity Polymer Fibre Bragg Grating	
	Sensors and Devices	289
	Kishore Bhowmik, Gang-Ding Peng, Eliathamby Ambikairajah and Ginu Rajan	
10.1	Introduction	289
10.2	Polymer Optical Fibres	290
10.3	Polymer Fibre Bragg Gratings	291
	10.3.1 POF Grating Fabrication	292
	10.3.2 Polymer Micro-fibre Bragg Gratings	294
	10.3.3 Polymer FBG Arrays.	295

10.4	Characteristic Properties of Polymers Fibre Bragg Grating	297
10.4.1	Etching the POF Gratings	297
10.4.2	Temperature Sensitivity	299
10.4.3	Pressure Sensitivity	300
10.4.4	Strain Sensitivity	303
10.5	Applications of Polymer Fibre Bragg Grating	305
10.5.1	Force and Pressure Sensors	306
10.5.2	Humidity Sensors	307
10.5.3	Biochemical Concentration Sensor	309
10.5.4	Composite Materials with Embedded Polymer FBGs	309
10.6	Conclusions	311
	References.	312
11	Photonic Materials for Holographic Sensing.	315
	Monika Zawadzka, Tatsiana Mikulchyk, Dervil Cody, Suzanne Martin, Ali Kemal Yetisen, Juan Leonardo Martinez-Hurtado, Haider Butt, Emilia Mihaylova, Hussein Awala, Svetlana Mintova, Seok Hyun Yun and Izabela Naydenova	
11.1	Introduction	316
11.1.1	The Need for Rapid Tests for Environmental Sensing and Medical Diagnostics	316
11.1.2	Advantages of Holographic Sensors	316
11.2	Fundamentals of Holographic Sensors	317
11.2.1	Principle of Recording of the Holographic Structures.	317
11.2.2	Types of Holographic Sensors	319
11.2.3	Holographic Recording by Ultra-Short Laser Pulses.	324
11.3	Holographic Sensing Materials	325
11.3.1	Photonic Materials in Sensing Applications	325
11.3.2	Strategies for Materials Functionalization	335
11.3.3	Design of Sensors by Dynamic Simulations of the Properties of a Multilayer Structure	338
11.4	Applications.	340
11.4.1	Sensors for Gas Phase Analyte	340
11.4.2	Temperature Sensors	346
11.4.3	Pressure Sensors	348
11.4.4	Ions Sensors.	350
11.4.5	Glucose Sensors	352

11.5	Future Directions	353
11.6	Conclusions	354
	References.	355
