

Contents

1	Global Energy Perspective	1
1.1	Introductory Remarks.	1
1.2	Energy and Matter.	2
1.3	Global Energy Situation.	4
1.3.1	Global Energy Demand and Distribution	8
1.3.2	Bio-fuel Development	15
1.4	The African Energy Perspective	18
1.4.1	Introduction	18
1.5	African Energy Facts at a Glance	24
1.6	African Energy Management Issues.	28
1.7	Conclusion Remarks	29
	References	31
2	Energy Resources in East Africa	33
2.1	Introductory Remarks.	33
2.2	Background Facts of East Africa	35
2.2.1	Energy Mix Perspectives	41
2.2.2	Household Energy Application and Management	48
2.2.3	Commercial Energy Management	51
2.2.4	Energy Choice Factors.	57
2.2.5	Policy Framework.	63
2.3	Energy Sources	64
2.3.1	Solar and Wind Energies	65
2.3.2	Hydropower.	70
2.3.3	Geothermal	79
2.3.4	Coal	81
2.3.5	Natural Gas	81
2.3.6	Oil	82
2.3.7	Thermal Generators.	83

2.3.8	Co-generation	85
2.3.9	Portable Generators	88
2.3.10	Biomass Energy	89
2.4	Biomass Energy in Uganda: An East African Model	93
2.4.1	Uganda's Biomass Energy Policy	93
2.4.2	Overall National Energy Policy	95
2.4.3	Forestry Policy and the National Forest Plan	97
2.4.4	Availability of Woody Biomass	97
2.4.5	Agriculture	98
2.4.6	Agricultural Residues (Food and Cash Crops)	98
2.4.7	Livestock	98
2.4.8	Total Biomass Production and Use	99
2.5	Some Biomass Energy Challenges	100
2.5.1	Information Deficiency	101
2.5.2	Technology	101
2.5.3	Institutions	102
2.5.4	Objectives of Biomass Energy Development Strategy	102
2.5.5	Institutional Arrangements	103
2.5.6	Human Resource Development	104
2.5.7	Mobilizing Financial Resources	106
2.5.8	Dissemination and Awareness	107
2.5.9	Quality Control	108
2.5.10	Research	108
2.6	Energy Contributions by Source	109
2.7	Energy Planning and Provision Challenges	111
2.8	Energy Reforms: The Immediate Challenge	115
2.8.1	Effects of Electricity Reforms in Kenya	117
2.8.2	Effects of Electricity Reforms in Uganda	119
2.9	The Status of Renewable Energies in East Africa	121
2.9.1	Renewable Energy Research and Development	126
2.10	Impact of Energy Use on the Environment	128
2.10.1	Energy Contribution to CO ₂ Emission in Kenya	129
2.10.2	Measures and Options	133
2.11	Concluding Remarks	134
	References	136
3	Energy Resources in Southern Africa	139
3.1	Introductory Remarks	139
3.2	Socio-Economic and Profiles of Southern African Countries	144
3.3	Conventional Energy Resources	146
3.3.1	Coal Formation	146
3.3.2	Coal Resources in Southern Africa	149
3.3.3	Coal Production and Use in Southern Africa	149
3.3.4	Oil and Natural Gas Formation	151

3.3.5	Oil Resources in Southern Africa	153
3.3.6	Natural Gas Resources in Southern Africa	155
3.4	Nuclear	156
	References	162
4	Energy Resources in Western and Central Africa	165
4.1	Introductory Remarks.	165
4.2	The Federal Republic of Nigeria	167
4.2.1	West African Gas Pipeline	170
4.2.2	Trans-Saharan Gas Pipeline Plan.	170
4.2.3	General Energy Consumption	170
4.2.4	Electricity	171
4.2.5	Policy Summary	173
4.2.6	Facts on Energy Sector Management.	174
4.3	Ghana	175
4.4	Ivory Coast (Cote D'Ivoire)	177
4.5	Burkina Faso, Togo and Benin	179
4.5.1	Burkina Faso	179
4.5.2	Togo and Benin (Formerly Known as Dahomey)	179
4.6	Senegal, Guinea, Mauritania, Mali and Niger	180
4.6.1	Senegal	180
4.6.2	Guinea	181
4.6.3	Mauritania	182
4.6.4	Mali	183
4.6.5	Niger.	184
4.7	Cameroon, DRC, Chad, Gabon, Equatorial Guinea and CAR	185
4.7.1	Democratic Republic of Congo (DRC)	186
4.7.2	Chad	188
4.7.3	Gabon	188
4.7.4	Equatorial Guinea	189
4.7.5	Central African Republic (CAR).	189
4.8	Concluding Remarks	190
	References	191
5	Energy Resources in Northern Africa	193
5.1	Introductory Remarks.	193
5.2	Conventional Energy Resources in North Africa	194
5.2.1	Oil	194
5.2.2	Natural Gas	195
5.2.3	Coal	197
5.3	Non-conventional Hydrocarbon Reserves	197
5.4	Renewable Energy Resources	199
5.4.1	Solar Energy Potential	199
5.4.2	Wind Energy Resources.	203

5.4.3	Geothermal Energy Resources	205
5.4.4	Biomass Energy Potential	206
5.5	Planned Energy Developments and Targets.	208
5.6	Energy Supportive Policies	211
5.7	Focus on Individual North African Countries	213
5.7.1	Morocco	213
5.7.2	Egypt	213
5.7.3	Algeria	215
5.7.4	Libya	215
5.7.5	Tunisia	217
5.7.6	Sudan	218
5.8	Eritrea	219
5.9	Ethiopia	219
	References	221
6	Renewable Energy Conversion Principles	223
6.1	Introductory Remarks.	223
6.2	Solar Energy Technologies	224
6.2.1	Low Grade Solar Heat Applications	225
6.2.2	High Temperature Solar Heat Applications.	230
6.2.3	Solar Electricity	233
6.2.4	The Development of Photovoltaic Energy	234
6.2.5	Cost Reduction Trends of Photovoltaic Devices	235
6.2.6	Properties of Solar Cell Materials	237
6.2.7	Solar Cell Characteristics	239
6.2.8	Recombination of Electrons and Holes	241
6.2.9	Solar Cell Efficiency	242
6.2.10	Solar Cell Production Method	245
6.3	Wind Energy	248
6.3.1	Wind Energy Technology	248
6.4	Small Hydropower Systems	258
6.5	Biomass Technologies	264
6.5.1	The Traditional Use of Biomass	265
6.5.2	Charcoal Production from Biomass	276
6.5.3	Briquette Production from Biomass.	279
6.5.4	Industrial Application of Biomass	281
6.6	Biogas	283
6.6.1	Gasification of Biomass	286
6.7	Concluding Remarks	289
	References	290
7	Options and Challenges	291
7.1	Introductory Remarks.	291
7.2	Human Resource Development	295
7.3	Biomass: The Challenges	299

7.4	Solar Energy Applications: The Constraints	304
7.5	Wind Energy Challenges	309
7.6	Small Hydropower Systems	311
7.7	Municipal Waste	313
7.8	Policy Issues	313
7.9	Concluding Remarks	320
8	The Way Forward	321
8.1	Situation Analysis	321
8.2	Some Guidelines	327
8.3	Concluding Remarks	335
	References	336
	Energy Units and Conversion Factors	337
	Index	339

Energy Resources in Africa
Distribution, Opportunities and Challenges
Othieno, H.; Awange, J.
2016, XV, 344 p., Hardcover
ISBN: 978-3-319-25185-1
