

Contents

1	Introduction	1
1.1	Motivation and Scope of Action	1
1.2	Research Objectives and Work Structure	4
	References	6
2	Grinding, Modelling and Eco-efficiency	9
2.1	Grinding as a Production Process	9
2.1.1	Chip Formation	12
2.1.2	Grinding Process	13
2.1.3	Grinding System	19
2.1.4	Energy, Resource and Information Flows of the Grinding Process and System	22
2.2	Modelling of the Grinding Process and System	24
2.2.1	Models and Modelling Approaches	25
2.2.2	Spatial and Temporal Dimensions in Modelling	28
2.2.3	Modelling of Environmental, Economic and Technological Indicators	29
2.3	Eco-efficiency	36
2.3.1	Origin of Eco-efficiency	36
2.3.2	Definition of the Term Eco-efficiency	37
2.3.3	Eco-Efficiency Assessment Approaches	39
2.4	Preliminary Conclusion	41
	References	42
3	State of Research	49
3.1	Review of Research Approaches	49
3.1.1	Process Level	51
3.1.2	System Level	57
3.1.3	Process and System Level	60

3.2	Comparative Evaluation of Current Research Approaches	67
3.2.1	Deduction of Comparison Criteria	67
3.2.2	Comparative Overview	71
3.2.3	Derivation of Research Demand	74
	References	76
4	Concept Development.	81
4.1	Concept Requirements and Characteristics	81
4.1.1	Concept Requirements	81
4.1.2	Concept Characteristics	82
4.2	Concept Structure	85
4.3	Process and System Description.	87
4.4	Technological, Economic and Environmental Modelling	92
4.4.1	Indicators of the Technological, Economic and Environmental Modelling	92
4.4.2	Technological Modelling of the Grinding Process	94
4.4.3	Economic Modelling	140
4.4.4	Environmental Modelling	145
4.5	Evaluation	157
4.5.1	Single Technological, Economic or Environmental Evaluation	157
4.5.2	Integrated Evaluation	159
4.6	Improvement.	162
4.6.1	Improvement Planning	162
4.6.2	Improvement Procedure	164
4.7	Application Cycle	166
4.7.1	Application Cycle and Software Environment	166
4.7.2	Steps of the Application Cycle	169
	References	177
5	Concept Application.	181
5.1	Planning of a New Grinding Process and System.	181
5.1.1	Initial Situation	181
5.1.2	Concept Application	182
5.2	Improvement of an Existing Grinding Process	193
5.2.1	Initial Situation	193
5.2.2	Concept Application	193

6 Concept Evaluation and Outlook 203

6.1 Concept Evaluation 203

6.2 Outlook 205

Reference 207

7 Summary 209

Appendix 213

Eco-efficiency of Grinding Processes and Systems

Winter, M.

2016, XXVII, 227 p. 92 illus., 86 illus. in color., Hardcover

ISBN: 978-3-319-25203-2
