

# Contents

<b>Effects of Age and Hearing Loss on the Processing of Auditory Temporal Fine Structure .....</b>	<b>1</b>
Brian C. J. Moore	
<b>Aging Effects on Behavioural Estimates of Suppression with Short Suppressors .....</b>	<b>9</b>
Erica L. Hegland and Elizabeth A. Strickland	
<b>Contributions of Coding Efficiency of Temporal-Structure and Level Information to Lateralization Performance in Young and Early-Elderly Listeners .....</b>	<b>19</b>
Atsushi Ochi, Tatsuya Yamasoba and Shigeto Furukawa	
<b>Investigating the Role of Working Memory in Speech-in-noise Identification for Listeners with Normal Hearing .....</b>	<b>29</b>
Christian Füllgrabe and Stuart Rosen	
<b>The Contribution of Auditory and Cognitive Factors to Intelligibility of Words and Sentences in Noise .....</b>	<b>37</b>
Antje Heinrich and Sarah Knight	
<b>Do Hearing Aids Improve Affect Perception? .....</b>	<b>47</b>
Juliane Schmidt, Diana Herzog, Odette Scharenborg and Esther Janse	
<b>Suitability of the Binaural Interaction Component for Interaural Electrode Pairing of Bilateral Cochlear Implants .....</b>	<b>57</b>
Hongmei Hu, Birger Kollmeier and Mathias Dietz	
<b>Binaural Loudness Constancy .....</b>	<b>65</b>
John F. Culling and Helen Dare	

<b>Intelligibility for Binaural Speech with Discarded Low-SNR Speech Components .....</b>	<b>73</b>
Esther Schoenmaker and Steven van de Par	
<b>On the Contribution of Target Audibility to Performance in Spatialized Speech Mixtures .....</b>	<b>83</b>
Virginia Best, Christine R. Mason, Jayaganesh Swaminathan, Gerald Kidd, Kasey M. Jakien, Sean D. Kampel, Frederick J. Gallun, Jörg M. Buchholz and Helen Glyde	
<b>Optimization of a Spectral Contrast Enhancement Algorithm for Cochlear Implants Based on a Vowel Identification Model .....</b>	<b>93</b>
Waldo Nogueira, Thilo Rode and Andreas Büchner	
<b>Roles of the Contralateral Efferent Reflex in Hearing Demonstrated with Cochlear Implants .....</b>	<b>105</b>
Enrique A. Lopez-Poveda, Almudena Eustaquio-Martín, Joshua S. Stohl, Robert D. Wolford, Reinhold Schatzer and Blake S. Wilson	
<b>Deactivating Cochlear Implant Electrodes Based on Pitch Information for Users of the ACE Strategy .....</b>	<b>115</b>
Deborah Vickers, Aneeka Degun, Angela Canas, Thomas Stainsby and Filiep Vanpoucke	
<b>Speech Masking in Normal and Impaired Hearing: Interactions Between Frequency Selectivity and Inherent Temporal Fluctuations in Noise .....</b>	<b>125</b>
Andrew J. Oxenham and Heather A. Kreft	
<b>Effects of Pulse Shape and Polarity on Sensitivity to Cochlear Implant Stimulation: A Chronic Study in Guinea Pigs .....</b>	<b>133</b>
Olivier Macherey and Yves Cazals	
<b>Assessing the Firing Properties of the Electrically Stimulated Auditory Nerve Using a Convolution Model .....</b>	<b>143</b>
Stefan B. Strahl, Dyan Ramekers, Marjolijn M. B. Nagelkerke, Konrad E. Schwarz, Philipp Spitzer, Sjaak F. L. Klis, Wilko Grolman and Huib Versnel	
<b>Modeling the Individual Variability of Loudness Perception with a Multi-Category Psychometric Function .....</b>	<b>155</b>
Andrea C. Trevino, Walt Jesteadt and Stephen T. Neely	

<b>Auditory fMRI of Sound Intensity and Loudness for Unilateral Stimulation</b> .....	165
Oliver Behler and Stefan Uppenkamp	
<b>Tinnitus- and Task-Related Differences in Resting-State Networks</b> .....	175
Cris Lanting, Aron Woźniak, Pim van Dijk and Dave R. M. Langers	
<b>The Role of Conduction Delay in Creating Sensitivity to Interaural Time Differences</b> .....	189
Catherine Carr, Go Ashida, Hermann Wagner, Thomas McColgan and Richard Kempster	
<b>Objective Measures of Neural Processing of Interaural Time Differences</b> .....	197
David McAlpine, Nicholas Haywood, Jaime Undurraga and Torsten Marquardt	
<b>Minimum Audible Angles Measured with Simulated Normally-Sized and Oversized Pinnae for Normal-Hearing and Hearing-Impaired Test Subjects</b> .....	207
Filip M. Rønne, Søren Laugesen, Niels S. Jensen and Julie H. Pedersen	
<b>Moving Objects in the Barn Owl's Auditory World</b> .....	219
Ulrike Langemann, Bianca Krumm, Katharina Liebner, Rainer Beutelmann and Georg M. Klump	
<b>Change Detection in Auditory Textures</b> .....	229
Yves Boubenec, Jennifer Lawlor, Shihab Shamma and Bernhard Englitz	
<b>The Relative Contributions of Temporal Envelope and Fine Structure to Mandarin Lexical Tone Perception in Auditory Neuropathy Spectrum Disorder</b> .....	241
Shuo Wang, Ruijuan Dong, Dongxin Liu, Luo Zhang and Li Xu	
<b>Interaction of Object Binding Cues in Binaural Masking Pattern Experiments</b> .....	249
Jesko L. Verhey, Björn Lübken and Steven van de Par	
<b>Speech Intelligibility for Target and Masker with Different Spectra</b> .....	257
Thibaud Leclère, David Théry, Mathieu Lavandier and John F. Culling	
<b>Dynamics of Cochlear Nonlinearity</b> .....	267
Nigel P. Cooper and Marcel van der Heijden	
<b>Responses of the Human Inner Ear to Low-Frequency Sound</b> .....	275
Markus Drexler, Eike Krause, Robert Gürkov and Lutz Wiegbe	

<b>Suppression Measured from Chinchilla Auditory-Nerve-Fiber Responses Following Noise-Induced Hearing Loss: Adaptive-Tracking and Systems-Identification Approaches .....</b>	<b>285</b>
Mark Sayles, Michael K. Walls and Michael G. Heinz	
<b>Does Signal Degradation Affect Top–Down Processing of Speech? .....</b>	<b>297</b>
Anita Wagner, Carina Pals, Charlotte M. de Blecourt, Anastasios Sarampalis Deniz Başkent	
<b>The Effect of Peripheral Compression on Syllable Perception Measured with a Hearing Impairment Simulator .....</b>	<b>307</b>
Toshie Matsui, Toshio Irino, Misaki Nagae, Hideki Kawahara and Roy D. Patterson	
<b>Towards Objective Measures of Functional Hearing Abilities .....</b>	<b>315</b>
Hamish Innes-Brown, Renee Tsongas, Jeremy Marozeau and Colette McKay	
<b>Connectivity in Language Areas of the Brain in Cochlear Implant Users as Revealed by fNIRS .....</b>	<b>327</b>
Colette M. McKay, Adnan Shah, Abd-Krim Seghouane, Xin Zhou, William Cross and Ruth Litovsky	
<b>Isolating Neural Indices of Continuous Speech Processing at the Phonetic Level .....</b>	<b>337</b>
Giovanni M. Di Liberto and Edmund C. Lalor	
<b>Entracking as a Brain Stem Code for Pitch: The Butte Hypothesis .....</b>	<b>347</b>
Philip X Joris	
<b>Can Temporal Fine Structure and Temporal Envelope be Considered Independently for Pitch Perception? .....</b>	<b>355</b>
Nicolas Grimault	
<b>Locating Melody Processing Activity in Auditory Cortex with Magnetoencephalography .....</b>	<b>363</b>
Roy D. Patterson, Martin Andermann, Stefan Uppenkamp and André Rupp	
<b>Studying Effects of Transcranial Alternating Current Stimulation on Hearing and Auditory Scene Analysis .....</b>	<b>371</b>
Lars Riecke	
<b>Functional Organization of the Ventral Auditory Pathway .....</b>	<b>381</b>
Yale E. Cohen, Sharath Bennur, Kate Christison-Lagay, Adam Gifford and Joji Tsunada	

<b>Neural Segregation of Concurrent Speech: Effects of Background Noise and Reverberation on Auditory Scene Analysis in the Ventral Cochlear Nucleus.....</b>	389
Mark Sayles, Arkadiusz Stasiak and Ian M. Winter	
<b>Audio Visual Integration with Competing Sources in the Framework of Audio Visual Speech Scene Analysis.....</b>	399
Attigodu Chandrashekara Ganesh, Frédéric Berthommier and Jean-Luc Schwartz	
<b>Relative Pitch Perception and the Detection of Deviant Tone Patterns....</b>	409
Susan L. Denham, Martin Coath, Gábor P. Háden, Fiona Murray and István Winkler	
<b>Do Zwicker Tones Evoke a Musical Pitch?.....</b>	419
Hedwig E. Gockel and Robert P. Carlyon	
<b>Speech Coding in the Midbrain: Effects of Sensorineural Hearing Loss.....</b>	427
Laurel H. Carney, Duck O. Kim and Shigeyuki Kuwada	
<b>Sources of Variability in Consonant Perception and Implications for Speech Perception Modeling.....</b>	437
Johannes Zaar and Torsten Dau	
<b>On Detectable and Meaningful Speech-Intelligibility Benefits.....</b>	447
William M. Whitmer, David McShefferty and Michael A. Akeroyd	
<b>Individual Differences in Behavioural Decision Weights Related to Irregularities in Cochlear Mechanics.....</b>	457
Jungmee Lee, Inseok Heo, An-Chieh Chang, Kristen Bond, Christophe Stoelinga, Robert Lutfi and Glenis Long	
<b>On the Interplay Between Cochlear Gain Loss and Temporal Envelope Coding Deficits.....</b>	467
Sarah Verhulst, Patrycja Piktel, Anoop Jagadeesh and Manfred Mauermann	
<b>Frequency Tuning of the Efferent Effect on Cochlear Gain in Humans.....</b>	477
Vit Drga, Christopher J. Plack and Ifat Yasin	

Physiology, Psychoacoustics and Cognition in Normal  
and Impaired Hearing

van Dijk, P.; Başkent, D.; Gaudrain, E.; de Kleine, E.;  
Wagner, A.; Lanting, C. (Eds.)

2016, XXIX, 485 p. 138 illus., 92 illus. in color.,

Hardcover

ISBN: 978-3-319-25472-2
