

Contents

1	Research Objectives	1
1.1	Context	1
1.2	The Concept of a Symbiotic Neighbourhood	3
1.3	State of the Art	4
1.4	Objectives of the Research	6
	References	8
2	Methodology	11
2.1	Energy Mapping	11
2.2	Scenarios	12
2.3	Flow Analyses	13
2.4	Urban Form	15
2.5	Optimisation	15
	References	16
3	Case Study	17
3.1	Presentation of the Site	17
3.1.1	An Urban Settlement Influenced by the Vicinity of the Lake	18
3.1.2	Early Industrialization: Physical and Functional Dissociation	19
3.1.3	Towards Urban Reconciliation?	20
3.2	Demographic Projections	20
3.3	Localised Gare-Lac Master Plan	21
	References	24
4	Results	25
4.1	Local Resources	25
4.1.1	Thermal Waste	26
4.1.2	Geothermal Energy	27
4.1.3	Biomass	28
4.1.4	Solar Energy	28

4.1.5	Wind Power	28
4.1.6	Lake of Neuchâtel	28
4.2	Performances of the Scenarios	29
4.2.1	Current Situation	29
4.2.2	Technological Scenario	29
4.2.3	Behavioural Scenario	32
4.2.4	Symbiotic Scenario	37
4.2.5	Comparison of the Scenarios	39
4.3	Optimisation and Integration	42
4.3.1	Energy Supply	44
4.3.2	Buildings	44
4.3.3	Mobility	44
4.3.4	Infrastructures	45
4.3.5	Food	46
4.3.6	Goods and Services	46
	References	47
5	Conclusions	49

	Appendix	53

Strategies for Symbiotic Urban Neighbourhoods

Towards Local Energy Self-Sufficiency

Lufkin, S.; Rey, E.; Erkman, S.

2016, XIV, 65 p. 35 illus., 2 illus. in color., Softcover

ISBN: 978-3-319-25608-5
