

Contents

1	Geographic Framework	1
1.1	Regional Settings	1
1.2	Geographical Regionalization and Administrative Division	2
	References	3
2	Methodology and Research Techniques	5
2.1	In Situ Identification of the GCPs (Ground Control Points) of Different Orders and Their Distribution in the Catchment	5
2.2	Utilisation of Old and New Maps (Austrian Maps, Historical Army Maps).	6
2.2.1	Methodological Staging	6
2.2.2	Database Integration in GIS	8
	References	8
3	Geological Characterisation	9
3.1	Petrography and Structural–Tectonic Aspects	9
	Reference	10
4	Relief	11
4.1	Morphographic and Morphometric Characterisation	11
4.2	Genetic Types of Relief (Structural, Sculptural, of Accumulation)	13
4.2.1	Structural Relief	13
4.2.2	Sculptural Relief	14
4.2.3	Accumulation Relief	14
4.3	Location of Archaeological Sites Based on Morphology and Morphometry	15
	References	17
5	Hydrography	19
5.1	Hydrogeological Characteristics.	19
5.2	Lake Basins Morpho-Hydrographical Evolution.	20

5.3	Hydrological Risks (Floods)	24
5.4	Location of Archaeological Sites Based on Water Resources	26
	References	28
6	Climate	31
6.1	General View of the Climate	31
6.2	Temperatures	31
6.3	Precipitations	32
6.4	The Effects of Topoclimatic and Climate Changes on Archaeological Sites	33
	References	33
7	Flora and Fauna	35
7.1	The Spread of Forests (Past and Present)	36
7.2	The Spread of Archaeological Sites According to Vegetation	38
	References	38
8	Soils.	39
8.1	Soil Classes and Types Distribution.	39
8.2	The Role of Soils in the Placement of Archaeological Sites	41
	References	43
9	Geoarchaeology or Archaeogeomorphology?—Border Sciences	45
9.1	Definitions	47
9.2	Evolution	49
	References	51
10	Archaeological Inventory	55
10.1	Precucuteni Culture	57
10.2	Cucuteni Culture	57
10.3	The Theory of Island Biogeography.	61
	References	63
11	Archaeological Sites Affected by Hydrogeomorphological Processes	65
11.1	Archaeological Sites Affected by Gully Erosion (Case Study).	70
11.2	Archaeological Sites Affected by Landslides (Case Study).	74
11.3	Archaeological Sites Affected by Alluvial/Warping and Back Water Processes (Case Study).	76
	References	82
	Conclusions	85

Hydrogeomorphic Risk Analysis Affecting Chalcolithic
Archaeological Sites from Valea Oii (Bahlui) Watershed,
Northeastern Romania

An Interdisciplinary Approach

Nicu, I.C.

2016, XII, 87 p. 34 illus. in color., Softcover

ISBN: 978-3-319-25707-5
