

Contents

Part I General Overview

1	Concepts of Just-in-Time (JIT)	3
1.1	Background (Historical Evolution of JIT).	3
1.2	Definition of Just-in-Time	4
1.3	JIT and Its Origins	7
1.4	Evolution of JIT in History	8
1.5	Importing JIT to the Occident.	9
1.6	JIT as a Lean Manufacturing Tool	11
1.7	JIT and Supply Chain	13
1.8	The Supply Chain as a Whole	14
1.9	Practical Examples of Successful JIT.	15
1.9.1	Toyota.	15
1.9.2	Dell.	16
1.9.3	Harley Davidson.	16
1.10	Why Companies Want to Implement JIT?	17
	References.	17

Part II JIT Elements, Its Benefits, and Causes of Its Slow Implementation

2	Elements of JIT	23
2.1	JIT Elements Associated with Human Resources.	23
2.2	JIT Elements Associated with Production Processes	29
2.3	JIT Elements Associated with the Product	38
	References.	45
3	Benefits of JIT	53
3.1	Benefits Associated with Human Resources	53
3.2	Benefits Associated with Production Processes	56
3.3	JIT Benefits Associated with Engineering	60
3.4	Benefits Associated with Quality.	62

3.5	Benefits Associated with Materials Handling	63
3.6	Economic Benefits Associated with JIT	66
	References.	69
4	Causes of Slow Implementation of JIT.	75
	References.	82

Part III Methodology

5	Research Methodology	89
5.1	Stage 1: Questionnaire Development	89
5.1.1	Section 1: Demographics	89
5.1.2	Section 2: JIT Elements	90
5.1.3	Section 3: JIT Benefits	90
5.1.4	Section 4: Causes of a Slow JIT Implementation.	91
5.2	Measurement Scale	91
5.3	Administration of the Questionnaire	91
5.4	Information Capture and Database Debugging	92
5.4.1	Missing Values.	92
5.4.2	Extreme Values or Outliers	93
5.4.3	Zero Variance.	93
5.4.4	Normality Test	94
5.4.5	Homoscedasticity Test.	94
5.4.6	Multicollinearity Test.	95
5.5	Descriptive Analysis of the Sample and Information	95
5.5.1	The Median as a Measure of Central Tendency.	95
5.5.2	Interquartile Range as a Measure of Dispersion.	96
5.6	Questionnaire Validation	97
5.6.1	Cronbach's Alpha Internal Consistency	97
5.6.2	Average Variance Extracted (AVE), Discriminant Validity.	98
5.6.3	Correlation Coefficient, Predictive Validity.	98
5.6.4	Dillon-Goldstein Rho Index, Composite Reliability	99
5.7	Integrating the Latent Variables (Factor Analysis)	99
5.8	Hypothesis Formulation, Construction of Structural Equations Models	100
5.8.1	Effects Between Variables	101
5.8.2	Model Efficiency Ratios.	104
	References.	106

Part IV Descriptive Analysis

6	Descriptive Analysis of the Sample	115
6.1	The Industrial Sectors Analyzed	115
6.2	The Size of Companies	116
6.3	Analysis of Size and Industrial Sector	117

6.4	Seniority and Position of Respondents	118
6.5	Gender of Respondents	118
6.6	Chapter Summary	119
7	Descriptive Analysis of the Elements of JIT	121
7.1	JIT Elements Associated with Human Resources.	122
7.2	Elements of JIT Associated with the Production Process	125
7.3	Elements Associated with the Product	131
7.4	Chapter Conclusions	135
	References.	136
8	Descriptive Analysis of JIT Benefits.	145
8.1	Benefits Associated with Human Resources	146
8.2	Benefits Associated with Production Process	148
8.3	Benefits Associated with Engineering	152
8.4	Benefits Associated with Quality.	153
8.5	Benefits Associated with Material Handling	155
8.6	Economic Benefits	158
8.7	Conclusions	160
	References.	162
9	Descriptive Analysis of the Causes of Slow JIT Implementation	169
9.1	Descriptive Analysis	169
9.2	Conclusions	176
	References.	176

Part V Structural Equation Models

10	Causal Models of JIT Elements Associated with Human Resources and Obtained Benefits	183
10.1	Factor Analysis of JIT Elements Associated with Human Resources	183
10.2	Model 1 Elements: Human Resources-JIT Benefits: Human Resources and Production Process	184
10.2.1	Hypotheses of Proposed Model 1	185
10.2.2	Evaluation of Model 1.	187
10.2.3	Conclusions of Model 1.	191
10.3	Model 2 Elements: Human Resources-JIT Benefits: Quality and Economic Benefits.	192
10.3.1	Hypotheses.	193
10.3.2	Evaluation of Model 2.	196
10.3.3	Conclusions of Model 2.	202

10.4	Model 3 Elements: Human Resources-JIT Benefits:	
	Materials Handling and Engineering Process	202
10.4.1	Hypotheses.	203
10.4.2	Evaluation of Model 3.	205
10.4.3	Conclusions of Model 3.	210
	References.	211
11	Causal Models of JIT Elements Associated with Production	
	Process and the Obtained Benefits.	217
11.1	Factor Analysis of JIT Elements Associated with Production Process.	217
11.2	Model 1. JIT Elements: Lean Techniques and Production Organization and Flow of Materials. Benefits: Production Process and Process Engineering.	219
11.2.1	Hypotheses Proposed of Model 1	220
11.2.2	Results of Model 1	222
11.3	Model 2. Elements: Lean Techniques and Production Organization and Material Flow. Benefits: Human Resources and Quality	229
11.3.1	Hypotheses Proposed of Model 2	230
11.3.2	Results of Model 2	232
11.4	Model 3: JIT Elements: Production Organization and Material Flow and Production Capacity and Inventory Management. Benefits: Material Handling and Economic Performance	238
11.4.1	Proposed Model 3.	239
11.4.2	Results of Model 3	242
	References.	247
12	Causal Models JIT Elements Associated with Product and Obtained Benefits.	255
12.1	Factor Analysis of JIT Elements Associated with the Product	255
12.2	Model 1. JIT Elements: Quality Planning and Quality Management. Benefits: Human Resources, Quality, and Economic Benefits	257
12.2.1	Hypotheses of Model 1	257
12.2.2	Results of Model 1	261
12.2.3	Conclusions of Model 1.	267
12.3	Model 2: JIT Elements: Quality Planning and Quality Management. Benefits: Engineering Process, Production Process, and Material Handling.	268
12.3.1	Hypotheses of Model 2	268
12.3.2	Results of Model 2	272
	References.	280

**13 Causal Models of JIT Elements and Causes of Slow
JIT Implementation 285**

13.1 Factor Analysis. 285

13.2 Model 1: JIT Elements of Human Resources and Causes
of Slow JIT Implementation 287

13.2.1 Proposed Working Hypotheses of Model 1. 287

13.2.2 Evaluation of Model 1. 290

13.3 Model 2: JIT Elements of Production Process and Causes
of Slow JIT Implementation 295

13.3.1 Proposed Working Hypotheses of Model 2. 295

13.3.2 Evaluation of Model 2. 298

13.4 Model 3: Product Characteristics and Causes
of Slow Implementation of JIT 303

13.4.1 Proposed Working Hypotheses of Model 3. 303

13.4.2 Evaluation of Model 3. 305

13.4.3 Sum of Indirect Effects of Model 3. 308
