

Contents

1	Introduction	1
1.1	Organization of the Monograph	1
1.2	Notation	3
1.3	State of Art	3
1.4	Figures	4
1.5	MATLAB Optimization Toolbox	4
	References	4
2	Operational Risk	7
2.1	Introduction	7
2.2	Operational Risk: A General View	8
2.3	Regulatory Framework	23
2.4	Operational Risk Data: Internal and External	25
2.5	Quantifying Operational Risk	25
	References	28
3	The g-and-h Distribution	29
3.1	Introduction	29
3.2	Definition	33
3.3	Properties of g-and-h Distribution	36
3.4	Fitting g-and-h Distributions to Data	42
3.5	Comments on g-and-h Parameters	43
	References	45
4	Probabilistic View of Operational Risk	47
4.1	Introduction	47
4.2	The g-and-h Distribution for Operational Risk	48
4.3	Value at Risk	49
4.4	Subadditivity of Value at Risk	50
4.5	Subjective Value at Risk	54

4.6	Risk Measures	56
4.7	Deviation Measures	57
4.8	Equivalence of Chance and Value at Risk Constraints.	58
4.9	Advanced Properties of G-and-H Distribution	59
4.9.1	Tail Properties and Regular Variation	59
4.9.2	Second Order Regular Variation.	63
4.10	Applications	67
4.10.1	Subjective Value at Risk Optimization	67
4.10.2	The Regression Problem	69
4.10.3	Stability of Estimation	71
4.11	Decomposition According to Contribution of Risk Factors	72
	References	73
5	Possibility Theory for Operational Risk.	75
5.1	Introduction.	75
5.2	σ -Algebra	77
5.3	Measurable Space and Measurable Set	77
5.4	Measurable Function.	79
5.5	Uncertainty Measure.	81
5.6	Uncertainty Space	83
5.7	Uncertainty Distribution	85
5.8	Uncertainty Set	88
5.9	Possibilistic Risk Analysis.	103
	References	111
6	Possibilistic View of Operational Risk	113
6.1	Introduction.	113
6.2	Fuzzy g-and-h Distribution	115
6.3	Fuzzy Value at Risk.	118
6.4	Subadditivity of Fuzzy Value at Risk	120
6.5	Fuzzy Subjective Value at Risk	121
6.6	Fuzzy Risk Measures	123
6.7	Fuzzy Deviation Measures.	125
6.8	Application: Fuzzy Subjective Value at Risk Optimization	128
	References	129
7	Simulation Results	131
7.1	Introduction.	131
7.2	Risk Control Estimates	132
7.2.1	Value at Risk.	135
7.2.2	Fuzzy Value at Risk	135
7.3	Linear Regression Hedging	136
7.3.1	Value at Risk Deviation	138
7.3.2	Subjective Value at Risk Deviation.	138
7.3.3	Mean Absolute Deviation	139
7.3.4	Standard Deviation	139

7.4	Example: Equivalence of Chance and Value at Risk Constraints	139
7.5	Portfolio Rebalancing Strategies: Risk Versus Deviation	141
	References	144
8	A Case Study: Iron Ore Mining in India.	147
8.1	Introduction.	147
8.2	Dataset and Computational Framework	148
8.3	Risk Calculation with Fuzzy Subjective Value at Risk Constraints	161
8.4	Sensitivity Analysis	165
8.5	Comparative Analysis with Other Techniques	166
	References	168
9	Evaluation of the Possibilistic Quantification of Operational Risk	169
9.1	Introduction.	169
9.2	Preparation of Preliminary Life Cycle Assessment Study.	174
9.3	Calculation of Fuzzy Analytic Hierarchy Process Weights	175
9.4	Trapezoidal Fuzzy Numbers for Pairwise Comparison Between the Criteria	176
9.5	Pairwise Comparison Matrices and Normalized Fuzzy Weights for Each Criterion	176
9.6	Determination of Ranks of Operational Risks with Trapezoidal Fuzzy Number.	179
9.7	Integration of Weights	179
9.7.1	Fuzzy Analytic Hierarchy Process	180
9.7.2	Fuzzy Extension of the Technique for Order Preference by Similarity to Ideal Solution	181
9.8	Calculation of Solutions for Risk Aversion Alternatives	181
	References	183
10	Summary and Future Research	185
10.1	Summary	185
10.2	Future Research	187
	References	188
	Index	189

Quantitative Modeling of Operational Risk in Finance
and Banking Using Possibility Theory

Chaudhuri, A.; Ghosh, S.K.

2016, XVI, 190 p., Hardcover

ISBN: 978-3-319-26037-2
