6.2.1	Pulse Amplification and Absorption Under Saturation .....	272	107
6.3	Optical Interactions with Semiconductors .....	275	108
6.3.1	Electronic States in Semiconductors .....	275	109
6.3.2	Optical Transitions in Semiconductors .....	283	110
6.3.3	Optical Gain Condition .....	287	111
6.3.4	Quantum Wells, -Wires, and -Dots .....	288	112
6.3.5	Carrier Induced Refractive Index Change .....	293	113
6.4	Summary .....	294	114
6.5	Problems .....	295	115
	References and Suggested Reading .....	295	116
<b>7</b>	<b>Optical Oscillators .....</b>	<b>297</b>	<b>117</b>
7.1	Stationary Performance .....	297	118
7.1.1	Rate Equations, Four-Level System .....	297	119
7.1.2	Laser Output Characteristic .....	300	120
7.1.3	Three-Level Laser .....	304	121

7.2	Frequency and Time Behavior of Lasers .....	305	122
7.2.1	Multi-Line vs. Single Line Operation .....	305	123
7.2.2	Mode Selection .....	307	124
7.2.3	Laser Line Width .....	309	125
7.2.4	Relaxation Oscillations and Gain Modulation .....	309	126
7.3	Pulsed Lasers .....	313	127
7.3.1	Q-Switching .....	314	128
7.3.2	Mode Locking .....	318	129
7.3.3	Carrier Envelope Phase, CEP .....	322	130
7.4	Atomic and Molecular Lasers .....	323	131
7.4.1	Atomic Solid State Lasers .....	325	132
7.4.2	Gas Lasers .....	328	133
7.5	Semiconductor Lasers .....	331	134
7.5.1	Heterostructure Lasers .....	334	135
7.6	Free Electron Lasers* .....	340	136
7.6.1	“Spontaneous” Emission .....	342	137
7.6.2	Light-Electron Coupling and Amplification .....	344	138
7.7	Summary .....	348	139
7.8	Problems .....	349	140
	References and Suggested Reading .....	349	141
<b>8</b>	<b>Nonlinear Optics and Acousto-Optics .....</b>	<b>351</b>	<b>142</b>
8.1	Nonlinear Susceptibility .....	351	143
8.1.1	Frequency Mixing .....	353	144
8.1.2	Anharmonic Oscillator .....	358	145
8.2	Second Order Processes .....	360	146
8.2.1	Second Harmonic Generation .....	360	147
8.2.2	Optical Parametric Amplification .....	370	148
8.2.3	Parametric Frequency Conversion* .....	376	149
8.2.4	Second Order Autocorrelation .....	377	150
8.3	Third Order Processes .....	379	151
8.3.1	Third Harmonic Generation .....	379	152
8.3.2	Optical Kerr Effect .....	380	153
8.3.3	Third Order Parametric Amplification .....	384	154
8.3.4	Two-Photon Absorption .....	387	155
8.3.5	Raman Amplification .....	388	156
8.3.6	Brillouin Amplification .....	392	157
8.3.7	Phase Conjugation* .....	395	158
8.4	Electro-Optic Effects .....	400	159
8.4.1	Linear Electro-Optic Effect .....	400	160
8.4.2	Quadratic Electro-Optic Effect .....	403	161
8.4.3	Field Induced Second Harmonic Generation* .....	404	162
8.5	Acousto-Optics .....	404	163
8.5.1	Acousto-Optic Modulators .....	409	164
