<b>Dedication .....</b>	<b>ix</b>
<b>Acknowledgements .....</b>	<b>xi</b>
<b>About the Author .....</b>	<b>xiii</b>
<b>Acronyms .....</b>	<b>xv</b>
<b>Preface .....</b>	<b>xix</b>
<b>1   XCOR: A Brief History .....</b>	<b>1</b>
Space Travel 2.0 .....	20
The Suborbital Commercial Space Race .....	21
Midland .....	22
<b>2   Key Players .....</b>	<b>25</b>
Jeff Greason .....	27
Dan DeLong .....	32
Doug Jones .....	33
Aleta Jackson .....	34
The Test Pilots .....	34
NASA astronaut Rick Searfoss .....	34
Commercial astronaut Brian Binnie .....	35
<b>3   Industry .....</b>	<b>39</b>
The Tauri Group .....	40
The Federal Aviation Administration’s Office of Commercial Space Transportation (AST) .....	42
Applying for a Launch License .....	43
Applying for a Re-entry License .....	46
Spaceports .....	48
The International Traffic on Arms Regulations (ITAR) .....	49

<b>4</b>	<b>Next-Generation Spacecraft</b> .....	53
	Lynx Variants .....	54
	Lynx Performance.....	56
	Lynx Mark I .....	57
	Lynx Mark II.....	60
	Lynx Mark III.....	62
	Payloads .....	62
	Payload A.....	62
	Payload B .....	66
	Payload Cowling Port and Cowling Starboard .....	67
	Payload D: Dorsal Pod.....	67
	Building the Lynx .....	67
	Rocket Power.....	72
	The Reaction Control System (RCS).....	73
<b>5</b>	<b>Spaceports</b> .....	75
	Midland Development Corporation .....	75
	Midland International Airport.....	78
	International Spaceports.....	80
	Australia.....	80
	Scotland.....	80
	Curaçao .....	81
<b>6</b>	<b>Missions and Payload Integration</b> .....	83
	Science and Payload Missions .....	84
	Funding Opportunities: A Brief History .....	85
	Project PoSSUM .....	88
	Payload Integration .....	89
	The Payload Integration Process.....	89
	Payload Development .....	91
	Mission Integration .....	91
	Engineering Integration .....	92
	Payload Software .....	92
	Payload Operations .....	93
	Payload Safety Review .....	94
	Export Control .....	94
	Payload Processing .....	94
	Payload Integration Considerations .....	95
	Cabin Characteristics .....	95
	Payload Characteristics .....	96
	Structural Interfaces .....	98
	Environmental Conditions .....	98
	Emergency Decompression.....	99

Electrical Power Interfaces .....	99
Electromagnetic Compatibility .....	99
Overview .....	100
<b>7 Passenger Training and Certification.....</b>	<b>101</b>
Spacesuit .....	104
Altitude Physiology .....	109
High-Altitude Indoctrination (HAI) Training .....	116
Acceleration Physiology .....	121
Space Motion Sickness .....	129
Pharmacotherapy.....	131
Perception .....	131
Radiation.....	133
Parabolic Flight.....	134
<b>8 STEM.....</b>	<b>137</b>
Steve Heck .....	138
STEM.....	138
NASA and STEM .....	139
Arête STEM.....	139
Milford School’s “Right Stuff” .....	140
Citizens in Space.....	144
Suborbital Applications Researchers Group.....	145
<b>9 How to Fly.....</b>	<b>149</b>
XCOR’s Rich and Famous.....	151
Fly a Payload.....	155
Project PoSSUM: A Suborbital Research Program Designed	
Around the Lynx .....	156
Why Study Noctilucent Clouds?.....	158
Origins: The Noctilucent cloud Imagery and Tomography	
Experiment (NITE) .....	160
From NITE to PoSSUM.....	161
Expanding the PoSSUM Story.....	161
The PoSSUM Tomography Experiment .....	163
PoSSUM Educational Programs .....	163
The PoSSUM Scientist-Astronaut Program.....	164
PoSSUM: A Comprehensive Suborbital Research Program .....	169
<b>Appendix I: Statement of Michael Kelly, Before the House</b>	
<b>Transportation Committee.....</b>	<b>171</b>
<b>Appendix II: President, XCOR Aerospace .....</b>	<b>175</b>

**Appendix III: Payload Development Guide ..... 179**

**Appendix IV: The PoSSUM Suborbital Spaceflight Simulator ..... 185**

**Appendix V: Microgravity Experiment Developer’s Kit..... 201**

**Appendix VI: Neurological Assessment for Suborbital Crewmembers..... 205**

**Index..... 211**

XCOR, Developing the Next Generation Spaceplane  
Seedhouse, E.

2016, XXI, 213 p. 128 illus., 11 illus. in color., Softcover
