| Nesrine Talbi and Khaled Belarbi                                                                                                           |            |
| <b>Neural Network Fitting for Input-Output Manifolds<br/>in Constrained Linear Systems . . . . .</b>                                       | <b>145</b> |
| José M. Araújo and Carlos E.T. Dórea                                                                                                       |            |
| <b>Adaptive Neuro-Fuzzy Controller of Induction Machine Drive<br/>with Nonlinear Friction . . . . .</b>                                    | <b>169</b> |
| Abdesselem Boulkroune, Salim Issaouni and Hachemi Chekireb                                                                                 |            |

**Part III   Robotics Applications**

**Fuzzy Logic Sugeno Controller Type-2 For Quadrotors  
Based on Anfis . . . . . 195**  
Pedro Ponce, Arturo Molina, Israel Cayetano, Jose Gallardo,  
Hugo Salcedo, Jose Rodriguez and Isela Carrera

**Mobile Robot with Movement Detection Controlled  
by a Real-Time Optical Flow Hermite Transform. . . . . 231**  
Ernesto Moya-Albor, Jorge Brieva and Hiram Eredín Ponce Espinosa

**Evolutionary Function Approximation for Gait Generation  
on Legged Robots . . . . . 265**  
Oscar A. Silva and Miguel A. Solis

Nature-Inspired Computing for Control Systems

Ponce, H. (Ed.)

2016, XII, 289 p. 179 illus., 62 illus. in color., Hardcover
