

Contents

1	Background and Research Scope	1
1.1	Introduction	1
1.2	Flexible Assembly Systems	2
1.2.1	Robots	2
1.2.2	Peripheral Equipment	4
1.3	Classification of Flexible Assembly Systems	4
1.3.1	Robotic Assembly Line	4
1.3.2	Robotic Assembly Cell	5
1.3.3	Simple Comparison Between RAL and RAC	6
1.4	Scheduling of Robotic Flexible Assembly Cell	7
1.5	Motivation for Research in Scheduling of RFAC	8
1.6	Research Gap and Scope	9
1.7	Concluding Remarks	10
	References	10
2	Literature Review and Research Objectives	13
2.1	Introduction	13
2.2	Scheduling Problems in Manufacturing Systems	14
2.2.1	Types of Scheduling Problems	14
2.2.2	Characteristics of Scheduling Problems	15
2.2.3	Solution Approaches	16
2.3	Review of Literature on Advanced Scheduling Approaches	17
2.3.1	Simulation Approaches	17
2.3.2	Artificial Intelligence Approaches	18
2.3.3	Observations from the Literature Review	19
2.4	Scheduling of RFAC: A Literature Review	20
2.4.1	Traditional Approaches	20
2.4.2	Simulation Approaches	21
2.4.3	Expert System Approaches	22
2.5	Research Limitations	22

2.6	Research Objectives and Thesis Plan	23
2.6.1	Research Objectives.	23
2.6.2	Research Plan and Thesis Structure	25
2.7	Concluding Remarks	28
	References	28
3	Development of an Intelligent Methodology for Scheduling RFAC	31
3.1	Introduction	31
3.2	Application of Fuzzy Logic to Scheduling Problems	31
3.3	Proposed Methodology for Scheduling of RFAC	34
3.3.1	Pre-processing Module.	35
3.3.2	Scheduling Module	39
3.3.3	Linguistic Variables.	42
3.3.4	Membership Functions.	43
3.3.5	Fuzzy Rules	43
3.4	Concluding Remarks	45
	References	46
4	Case Study 1: Application of the Developed Methodology Using Fuzzy Logic and Simulation	49
4.1	Introduction	49
4.2	A Fuzzy Logic Model for Scheduling RFAC	49
4.2.1	Defining the Linguistic Variables.	50
4.2.2	Constructing Membership Functions	50
4.2.3	Constructing Fuzzy Rules.	52
4.3	Implementation of Fuzzy Approach for Scheduling of RFAC	53
4.4	Example Application of Scheduling RFAC	57
4.4.1	RFAC Description.	57
4.4.2	Simulation of Experimental Design	60
4.5	Simulation Results and Discussion.	62
4.6	Concluding Remarks	66
	References	67
5	Simulation Modelling and Analysis of Dynamic Scheduling in RFAC	69
5.1	Introduction	69
5.2	Review of Literature on Dynamic Events	70
5.3	A Framework for Developing an Intelligent Approach to Dynamic Scheduling Problems	72
5.3.1	Preparation	73
5.3.2	Application of Taguchi Method.	74
5.3.3	Simulation Modelling.	74
5.3.4	Statistical Analysis	75
5.4	The Simulation Model	77

5.5	Experimental Design and Results	80
5.5.1	Experimental Setup	80
5.5.2	Taguchi's Orthogonal Array Selection	82
5.5.3	Calculation of the Signal-to-Noise (S/N) Ratio	83
5.6	Analysis of Results and Discussion	83
5.6.1	Analysis of Mean (ANOM)	83
5.6.2	Analysis of Variance (ANOVA)	86
5.7	Concluding Remarks	89
	References	90
6	Development of an Optimization Approach for Dynamic Scheduling Problems in RFAC	93
6.1	Introduction	93
6.2	Multi-criteria Decision-Making	94
6.2.1	MCDM Process	94
6.2.2	In Search of a Powerful Method for Complex Decision Making Problems	95
6.3	A Hybrid Approach for Optimization of Dynamic Scheduling Problems	98
6.3.1	Problem Description	99
6.3.2	Application of Fuzzy MCDM Methods	100
6.3.3	Analysis of the Results	101
6.4	Implementation of Fuzzy Decision Support System	102
6.4.1	Structure of Fuzzy Decision Support System.	102
6.4.2	Design of the Proposed Fuzzy Decision Support System.	105
6.5	Implementation of Fuzzy AHP-Fuzzy TOPSIS	108
6.5.1	Methodology of FAHP.	108
6.5.2	Methodology of FTOPSIS	111
6.6	Concluding Remarks	113
	References	115
7	Case Study 2: Application of Hybrid Fuzzy MCDM Approach to Optimize Dynamic Scheduling in RFAC	121
7.1	Introduction	121
7.2	Case Study	122
7.3	Application Using FDSS	123
7.3.1	Defining Input and Output Variables	124
7.3.2	Specifying Input and Output Membership Functions	124
7.3.3	Constructing Decision Rules and Knowledge Base	125
7.3.4	Determining MPCl by Using Defuzzification	127
7.4	Application Using FAHP-FTOPSIS	129
7.4.1	Application of FAHP in Determining Weights of Criteria.	129
7.4.2	Application of FTOPSIS in Ranking of Alternatives	132

7.5 Analysis of Results and Discussion 134

7.5.1 Comparison of the Results 134

7.5.2 Sensitivity Analysis 135

7.5.3 Effect of Scheduling Factors on MPC I 139

7.5.4 Confirmation Test 139

7.6 Concluding Remarks 140

8 Conclusions and Recommendations for Future Work 143

8.1 Introduction 143

8.2 Summary of the Research 144

8.2.1 Scheduling RFAC in a Multi-product Assembly
Environment 144

8.2.2 Scheduling RFAC in a Dynamic Situation 145

8.2.3 Scheduling RFAC in Multi-objective Optimization
Problems 145

8.3 Conclusions 146

8.4 Recommendations for Future Work 147

8.4.1 Robust Scheduling of RFAC with Interruptions. 147

8.4.2 Virtual Reality for RFAC Simulation 148

8.4.3 Deadlock Prevention and Avoidance in RFAC 149

8.5 Final Word 149
