1	Introduction	1
1.1	Definition of an Optimization Problem	1
1.2	Classical Optimization	2
1.3	Evolutionary Computation Methods	5
1.3.1	Structure of an Evolutionary Computation Algorithm	6
	References	8
2	Image Segmentation Based on Differential Evolution Optimization	9
2.1	Introduction	9
2.2	Gaussian Approximation	10
2.3	Differential Evolution Algorithms	11
2.4	Determination of Thresholding Values	13
2.5	Experimental Results	14
2.6	Conclusions	20
	References	21
3	Motion Estimation Based on Artificial Bee Colony (ABC)	23
3.1	Introduction	23
3.2	Artificial Bee Colony (ABC) Algorithm	27
3.2.1	Biological Bee Profile	27
3.2.2	Description of the ABC Algorithm	27
3.2.3	Initializing the Population	28
3.2.4	Send Employed Bees	28
3.2.5	Select the Food Sources by the Onlooker Bees	29
3.2.6	Determine the Scout Bees	29
3.3	Fitness Approximation Method	29
3.3.1	Updating the Individual Database	30
3.3.2	Fitness Calculation Strategy	30
3.3.3	Presented ABC Optimization Method	32

3.4	Motion Estimation and Block Matching	34
3.5	BM Algorithm Based on ABC with the Estimation Strategy . . .	35
3.5.1	Initial Population	36
3.5.2	The ABC-BM Algorithm.	38
3.6	Experimental Results	39
3.6.1	ABC-BM Results	39
3.6.2	Results on H.264	43
3.6.3	Experiments with High Definition Sequences.	46
3.7	Conclusions.	48
	References	49
4	Ellipse Detection on Images Inspired by the Collective	
	Animal Behavior	53
4.1	Introduction.	53
4.2	Collective Animal Behavior Algorithm (CAB).	56
4.2.1	Description of the CAB Algorithm.	56
4.3	Ellipse Detection Using CAB	60
4.3.1	Data Preprocessing	60
4.3.2	Individual Representation	60
4.3.3	Objective Function	62
4.3.4	Implementation of CAB for Ellipse Detection	64
4.4	The Multiple Ellipse Detection Procedure	65
4.5	Experimental Results	66
4.5.1	Ellipse Localization	67
4.5.2	Shape Discrimination Tests	68
4.5.3	Ellipse Approximation: Occluded Ellipse and Ellipsoidal Detection.	69
4.5.4	Performance Comparison.	69
4.6	Conclusions.	75
	References	76
5	Template Matching by Using the States of Matter Algorithm.	79
5.1	Introduction.	79
5.2	States of Matter	81
5.3	States of Matter Search (SMS).	83
5.3.1	Definition of Operators	83
5.3.2	SMS Algorithm	86
5.4	Fitness Approximation Method	90
5.4.1	Updating Individual Database	91
5.4.2	Fitness Calculation Strategy.	91
5.4.3	Presented Optimization SMS Method	94
5.5	Template Matching Process	95
5.6	TM Algorithm Based on SMS with the Estimation Strategy . . .	96
5.6.1	The SMS-TM Algorithm.	97

5.7	Experimental Results	99
5.8	Conclusions.	103
	References	104
6	Estimation of Multiple View Relations Considering Evolutionary Approaches	107
6.1	Introduction.	107
6.2	View Relations from Point Correspondences	110
6.3	Random Sampling Consensus (RANSAC) Algorithm	113
6.4	Clonal Selection Algorithm (CSA)	114
6.4.1	Definitions.	114
6.4.2	CSA Operators.	115
6.4.3	Clonal Proliferation Operator (T_P^C)	115
6.4.4	Affinity Maturation Operator (T_M^A)	116
6.4.5	Clonal Selection Operator (T_S^C)	117
6.5	Method for Geometric Estimation Using CSA	117
6.5.1	Computational Procedure.	119
6.6	Experimental Results	122
6.6.1	Fundamental Matrix Estimation with Synthetic Data	123
6.6.2	Fundamental Matrix Estimation with Real Images	126
6.6.3	Homography Estimation with Synthetic Data	129
6.6.4	Homography Estimation with Real Images	132
6.7	Conclusions.	134
	References	136
7	Circle Detection on Images Based on an Evolutionary Algorithm that Reduces the Number of Function Evaluations.	139
7.1	Introduction.	140
7.2	The Adaptive Population with Reduced Evaluations (APRE) Algorithm	142
7.2.1	Initialization	143
7.2.2	Selecting the Population to Be Evolved.	144
7.2.3	The Number of Elements N_e^k to Be Selected	144
7.2.4	Selection Strategy for Building P^k	146
7.2.5	Exploration Operation.	147
7.2.6	DE Mutation Operator	148
7.2.7	Trigonometric Mutation Operator	148
7.2.8	Fitness Estimation Strategy	150
7.2.9	Memory Updating	153
7.2.10	Exploitation Operation	153
7.2.11	Computational Procedure.	155
7.3	Implementation of APRE-Based Circle Detector.	156
7.3.1	Individual Representation	156
7.3.2	Objective Function	158

7.3.3	The Multiple Circle Detection Procedure	158
7.4	Results on Multi-circle Detection	159
7.5	Conclusions.	165
	References	166
8	Otsu and Kapur Segmentation Based on Harmony Search	
	Optimization	169
8.1	Introduction.	169
8.2	Harmony Search Algorithm	171
8.2.1	The Harmony Search Algorithm.	171
8.3	Image Multilevel Thresholding (MT)	174
8.3.1	Between—Class Variance (Otsu’s Method)	175
8.3.2	Entropy Criterion Method (Kapur’s Method)	177
8.4	Multilevel Thresholding Using Harmony Search Algorithm (HSMA)	179
8.4.1	Harmony Representation	179
8.4.2	HMA Implementation	179
8.4.3	Parameter Setting	181
8.5	Experimental Results	182
8.5.1	Otsu’s Results	184
8.5.2	Kapur’s Results	184
8.5.3	Comparisons	190
8.6	Conclusions.	198
	References	201
9	Leukocyte Detection by Using Electromagnetism-like	
	Optimization	203
9.1	Introduction.	204
9.2	Electromagnetism-like Optimization Algorithm (EMO)	206
9.3	Circle Detection Using EMO	209
9.3.1	Data Preprocessing	209
9.3.2	Particle Representation	209
9.3.3	Objective Function	210
9.3.4	EMO Implementation	211
9.4	The White Blood Cell Detector	213
9.4.1	Image Preprocessing	214
9.4.2	The Modified EMO-Based Circle Detector	215
9.4.3	Numerical Example	217
9.5	Experimental Results	219
9.6	Comparisons to Other Methods	220
9.6.1	Detection Comparison	220
9.6.2	Robustness Comparison	221
9.6.3	Stability Comparison	222
9.7	Conclusions.	225
	References	226

10 Automatic Segmentation by Using an Algorithm Based on the Behavior of Locust Swarms	229
10.1 Introduction	229
10.2 Biological Fundamentals and Mathematical Models	232
10.2.1 Solitary Phase	233
10.2.2 Social Phase	235
10.3 The Locust Search (LS) Algorithm	235
10.3.1 Solitary Operation (A)	237
10.3.2 Social Operation (B)	239
10.3.3 Complete LS Algorithm	241
10.3.4 Discussion About the LS Algorithm	242
10.4 Numerical Experiments over Benchmark Functions	243
10.4.1 Uni-modal Test Functions	244
10.4.2 Multimodal Test Functions	246
10.5 Gaussian Mixture Modelling	247
10.6 Segmentation Algorithm Based on LS	248
10.6.1 New Objective Function J^{new}	249
10.6.2 Complete Segmentation Algorithm	251
10.7 Segmentation Results	253
10.7.1 Performance of LS Algorithm in Image Segmentation	253
10.7.2 Histogram Approximation Comparisons	256
10.7.3 Performance Evaluation of the Segmentation Results	263
10.8 Conclusions	266
References	267
Appendix A: RANSAC Algorithm	271
Appendix B: List of Benchmark Functions	273

Applications of Evolutionary Computation in Image
Processing and Pattern Recognition
