## Part I What Is Science?

<b>1</b>	<b>The Evolution of Science</b> . . . . .	3
1.1	Greece: The Dawn of Science . . . . .	3
1.2	The Medieval Worldview . . . . .	10
1.3	The Scientific Revolution . . . . .	12
1.4	Theory of Science and Philosophy of Science . . . . .	16
1.5	Summary . . . . .	16
	Further Reading . . . . .	17
<b>2</b>	<b>Knowledge</b> . . . . .	19
2.1	Introduction . . . . .	19
2.2	Knowing That, Knowing How and Acquaintance . . . . .	19
2.3	The Definition of Propositional Knowledge . . . . .	21
2.3.1	P Is True . . . . .	22
2.3.2	Good Reasons for P . . . . .	27
2.3.3	What Does It Mean to Believe That P? . . . . .	28
2.4	Can One Know Without Knowing that One Knows? . . . . .	30
2.5	Reliabilism . . . . .	30
2.6	Data, Information, Knowledge . . . . .	31
2.7	The Philosopher's Versus the Sociologist's Concept of Knowledge . . . . .	34
2.8	The Expression 'It Is True for Me that. . . ' . . . . .	35
2.9	Knowledge of Religious Beliefs . . . . .	38
2.10	Summary . . . . .	38
	Further Reading . . . . .	40
<b>3</b>	<b>Hypotheses and Hypothesis Testing</b> . . . . .	41
3.1	Introduction . . . . .	41
3.2	Unity of Science? . . . . .	42
3.3	Hypothetical-Deductive Method . . . . .	43

3.4	Hypothesis Testing in the Social Sciences . . . . .	48
3.5	Hypothesis Testing in History: The Wallenberg Affair . . . . .	49
3.6	Statistical Testing of Hypotheses . . . . .	53
3.6.1	Bayesianism . . . . .	53
3.6.2	Statistical Inference -Neyman-Pearson's Method . . . . .	54
3.7	Unacceptable Auxiliary Assumptions: Ad Hoc-Hypotheses . . . . .	56
3.8	Summary . . . . .	59
	Further Reading . . . . .	61
<b>4</b>	<b>On Scientific Data . . . . .</b>	<b>63</b>
4.1	Measurement and Scales . . . . .	63
4.2	Statistical Relations . . . . .	65
4.3	Data, Observation, Observational Statement . . . . .	69
4.4	On the Theory-Dependence of Observational Statements . . . . .	72
4.5	Observations and History: On Source Criticism . . . . .	77
4.6	Summary . . . . .	79
	Further Reading . . . . .	80
<b>5</b>	<b>Qualitative Data and Methods . . . . .</b>	<b>81</b>
5.1	Introduction . . . . .	81
5.2	Intentionality and Meaning . . . . .	82
5.3	Hermeneutics . . . . .	86
5.4	Grounded Theory . . . . .	88
5.5	The Intentionality of Observations . . . . .	90
5.6	Are Quantitative Methods Better than Qualitative? . . . . .	93
5.7	Objectivity and the Use of Qualitative Methods . . . . .	94
5.8	Searle on Brute and Social Facts . . . . .	95
5.9	Social Constructions . . . . .	99
5.10	Criteria for Correct Interpretations . . . . .	100
5.11	Summary . . . . .	102
	Further Reading . . . . .	102
<b>6</b>	<b>Theories About the Development of Science . . . . .</b>	<b>103</b>
6.1	Introduction . . . . .	103
6.2	Logical Positivism . . . . .	103
6.3	Falsificationism . . . . .	106
6.4	Normal Science, Scientific Revolutions and Paradigm Shifts . . . . .	109
6.5	Lakatos' Theory of Research Programmes . . . . .	112
6.6	Methodological Anarchism: Anything Goes . . . . .	115
6.7	Summary of the Debate . . . . .	116
6.8	The Rationality of Science: A Model . . . . .	118
	Further Reading . . . . .	121

## **Part II Philosophical Reflections on Four Core Concepts in Science: Causes, Explanations, Laws and Models**

<b>7</b>	<b>On Causes and Correlations</b> . . . . .	125
7.1	Causes Are INUS Conditions . . . . .	125
7.2	Cause-Effect and Order in Time . . . . .	129
7.3	Causes and Statistical Correlations . . . . .	129
7.4	Risk Factors and Conditional Probabilities . . . . .	134
7.5	Direct and Indirect Causes . . . . .	136
7.6	Causes as Physical Effects . . . . .	137
7.7	Cause and Effect in History . . . . .	138
7.8	Summary . . . . .	140
	Further Reading . . . . .	141
<b>8</b>	<b>Explanations</b> . . . . .	143
8.1	Explanation and Prediction . . . . .	143
8.2	What Is Explained? . . . . .	144
8.3	The D-N Model . . . . .	146
8.3.1	Problems with the D-N Model . . . . .	147
8.4	Causal Explanations . . . . .	149
8.5	Explanation as Unification . . . . .	150
8.6	Statistical Explanations . . . . .	151
8.7	Action Explanations . . . . .	154
8.8	Pragmatic Explanations . . . . .	156
8.9	Summary . . . . .	158
	Further Reading . . . . .	159
<b>9</b>	<b>Explanation in the Humanities and Social Sciences</b> . . . . .	161
9.1	Methodological Collectivism Versus Methodological Individualism . . . . .	161
9.2	Explanations of Historical Events . . . . .	164
9.3	Explanation of Social Phenomena . . . . .	166
9.4	Functional Explanations . . . . .	168
9.5	Summary . . . . .	170
	Further Reading . . . . .	171
<b>10</b>	<b>Scientific Laws</b> . . . . .	173
10.1	Introduction . . . . .	173
10.2	Empirical Generalizations: Fundamental Laws . . . . .	174
10.3	Deterministic and Statistical Laws . . . . .	175
10.4	The Extension of the Concept of a Natural Law . . . . .	176
10.5	Laws and Accidental Generalisations . . . . .	177
10.6	van Fraassen's Alternative . . . . .	181
10.7	A Proposal: Some Laws Are Implicit Definitions of Quantities . . . . .	182
10.8	Summary . . . . .	187
	Further Reading . . . . .	187

<b>11 Theories, Models and Reality</b> . . . . .	189
11.1 Introduction . . . . .	189
11.2 Structural Similarity as a Mapping of Relations . . . . .	191
11.3 Mathematical Models . . . . .	191
11.4 Wave-Particle Dualism . . . . .	193
11.5 Can One Measure Structural Similarity? . . . . .	195
11.6 Ontology and Structural Similarity . . . . .	195
Further Reading . . . . .	196
 <b>Part III Some Auxiliaries</b>	
<b>12 The Mind-Body Problem</b> . . . . .	199
12.1 Introduction . . . . .	199
12.2 Substance Dualism . . . . .	200
12.3 Property Dualism . . . . .	201
12.4 Monism . . . . .	202
12.5 Monistic Theories . . . . .	203
12.6 Three Important Problems for Reductionists . . . . .	205
12.7 Mental Causes . . . . .	210
12.8 Speculations . . . . .	212
12.9 The Science of Man . . . . .	213
Further Reading . . . . .	216
<b>13 Science and Values</b> . . . . .	217
13.1 Values and Their Role in Science . . . . .	217
13.2 Value-Free and Value-Laden . . . . .	219
13.3 Is Science Valuable? . . . . .	220
13.4 Feminist Critique: Hidden Values in Science . . . . .	222
13.5 Research Ethics . . . . .	224
Further Reading . . . . .	226
<b>14 Some Recent Trends in Science</b> . . . . .	227
14.1 The Impact of University Mass Education . . . . .	227
14.2 Publish or Perish: The Value of a Research Paper . . . . .	228
14.3 Research Funding and Planning . . . . .	229
14.4 Big Science . . . . .	230
14.5 The Scientific Attitude and the Search for Meaning . . . . .	231
 <b>Appendix: Logical Forms</b> . . . . .	233
Introduction . . . . .	233
Logical Form 1: Sentences . . . . .	234
Variables . . . . .	236
Predicates . . . . .	237
Logical Form 2: Argument . . . . .	238
Some Common Valid Argument Forms . . . . .	238
Some Invalid Argument Forms . . . . .	239

The ‘if...then’ Construction . . . . . 241

Necessary and Sufficient Conditions . . . . . 244

Further Reading . . . . . 244

**Definitions of Some Core Concepts . . . . . 245**

**Literature . . . . . 249**

**Index . . . . . 255**

Philosophy of Science for Scientists

Johansson, L.-G.

2016, XV, 257 p. 28 illus. in color., Hardcover

ISBN: 978-3-319-26549-0
