

Contents

Is ‘Fuzzy Theory’ an Appropriate Tool for Large Size Problems?	1
1 Introduction	1
2 Two Hidden Facts About Fuzzy Set Theory (and, About Any Soft Computing Set Theory)	3
2.1 Understanding the ‘Discovery of CIFS’ by an Example	3
3 Cognitive Intuitionistic Fuzzy System (CIFS)	5
3.1 Atanassov Trio Functions and Atanassov Constraint	5
3.2 Atanassov Initialization	6
3.3 Impossible Types of Initialization	7
3.4 Atanassov Trio Bags	7
3.5 Atanassov Processing Time (APT)	8
3.6 ‘Atanassov Speed of Convergence’ (ASC) for an Element x	13
3.7 Categorizing the ‘Quality’ of a Decision Maker	14
3.8 Speed of Evaluation (Trio Speeds)	15
3.9 Decision Trajectory Curve and Atanassov Point of Convergence	17
3.10 Atanassov Absolute Triangle	19
3.11 ‘Decision Line-Segments’ and ‘Atanassov Line-Segment’ for an Element x	19
3.12 ‘Atanassov Triangle’ for the Element x	21
3.13 ‘General IF Case’ and ‘Five Special IF Cases’ in Theory of CIFS	22
4 Is ‘Fuzzy Theory’ an Appropriate Tool for Large Size Problems?	28
5 Ordering (or Ranking) of Elements in an IFS on the Basis of Their Amount of Belongingness	30
5.1 An Example Showing Application Potential of ‘Ordering (or Ranking) of Elements’	30

6	An Application Domain to Understand the Potential of Intuitionistic Fuzzy Theory Over Fuzzy Theory	32
6.1	Object Recognition: An Impossible Task Without CIFS	32
6.2	Explaining the Method by an Instance	36
7	An Example of Application Domain to Understand the Potential of Fuzzy Theory Over Intuitionistic Fuzzy Theory in Some Cases	37
7.1	Penalty Shootout	38
7.2	CESFM	39
7.3	“Fuzzy Pocket Machine” M for the Referee	45
7.4	Three Algorithms Algo-1, Algo-2 and Algo-3 for De-Fuzzification	47
7.5	CS Values of Other Parameters in CESFM	48
7.6	‘CS Score’ of a Team	50
7.7	A Hypothetical Example of a Football Game	51
7.8	Comparing CESFM with Obsolete FIFA Rules	54
8	Conclusion	54
8.1	Theory of CIFS	54
8.2	Pattern Recognition or Object Recognition: An Impossible Task Without CIFS	58
8.3	Unique Application of Fuzzy Theory in Sports	58
9	Future Research Directions	59
	References	60
	Abbreviations and Their Significance	63

Is 'Fuzzy Theory' an Appropriate Tool for Large Size Problems?

Biswas, R.

2016, VIII, 64 p. 17 illus. in color., Softcover

ISBN: 978-3-319-26717-3
