<b>1</b>	<b>Newton-Like Methods on Generalized Banach Spaces and Fractional Calculus</b>	<b>1</b>
1.1	Introduction	1
1.2	Generalized Banach Spaces	2
1.3	Semilocal Convergence	5
1.4	Special Cases and Applications	8
1.5	Applications to Fractional Calculus	14
	References	20
<b>2</b>	<b>Semilocal Convergence of Newton-Like Methods and Fractional Calculus</b>	<b>23</b>
2.1	Introduction	23
2.2	Generalized Banach Spaces	24
2.3	Semilocal Convergence	26
2.4	Special Cases and Applications	30
2.5	Applications to Fractional Calculus	30
	References	36
<b>3</b>	<b>Convergence of Iterative Methods and Generalized Fractional Calculus</b>	<b>39</b>
3.1	Introduction	39
3.2	Generalized Banach Spaces	40
3.3	Semilocal Convergence	42
3.4	Special Cases and Applications	46
3.5	Applications to Generalized Fractional Calculus	47
	References	56
<b>4</b>	<b>Fixed Point Techniques and Generalized Right Fractional Calculus</b>	<b>57</b>
4.1	Introduction	57
4.2	Generalized Banach Spaces	58
4.3	Semilocal Convergence	60

4.4	Special Cases and Applications . . . . .	64
4.5	Applications to Generalized Right Fractional Calculus . . . . .	65
	References . . . . .	74
<b>5</b>	<b>Approximating Fixed Points and <math>k</math>-Fractional Calculus . . . . .</b>	<b>75</b>
5.1	Introduction . . . . .	75
5.2	Generalized Banach Spaces . . . . .	76
5.3	Semilocal Convergence . . . . .	78
5.4	Special Cases and Applications . . . . .	82
5.5	Applications to $k$ -Fractional Calculus . . . . .	83
	References . . . . .	93
<b>6</b>	<b>Iterative Methods and Generalized <math>g</math>-Fractional Calculus . . . . .</b>	<b>95</b>
6.1	Introduction . . . . .	95
6.2	Generalized Banach Spaces . . . . .	96
6.3	Applications to $g$ -Fractional Calculus . . . . .	98
	References . . . . .	106
<b>7</b>	<b>Unified Convergence Analysis for Iterative Algorithms and Fractional Calculus . . . . .</b>	<b>107</b>
7.1	Introduction . . . . .	107
7.2	Convergence Analysis . . . . .	108
7.3	Applications to Fractional Calculus . . . . .	114
	References . . . . .	124
<b>8</b>	<b>Convergence Analysis for Extended Iterative Algorithms and Fractional and Vector Calculus . . . . .</b>	<b>127</b>
8.1	Introduction . . . . .	127
8.2	Convergence Analysis . . . . .	128
8.3	Applications to Fractional and Vector Calculus . . . . .	134
	References . . . . .	147
<b>9</b>	<b>Convergence Analysis for Extended Iterative Algorithms and Fractional Calculus . . . . .</b>	<b>149</b>
9.1	Introduction . . . . .	149
9.2	Convergence Analysis . . . . .	150
9.3	Applications to Fractional Calculus . . . . .	156
	References . . . . .	161
<b>10</b>	<b>Secant-Like Methods and Fractional Calculus . . . . .</b>	<b>163</b>
10.1	Introduction . . . . .	163
10.2	Convergence Analysis . . . . .	164
10.3	Applications to Right Fractional Calculus . . . . .	169
	References . . . . .	174

<b>11</b>	<b>Secant-Like Methods and Modified <math>g</math>-Fractional Calculus</b>	177
11.1	Introduction	177
11.2	Convergence Analysis	178
11.3	Applications to Modified $g$ -Fractional Calculus	183
	References	196
<b>12</b>	<b>Secant-Like Algorithms and Generalized Fractional Calculus</b>	197
12.1	Introduction	197
12.2	Convergence Analysis	198
12.3	Applications to $g$ -Fractional Calculus	203
	References	214
<b>13</b>	<b>Secant-Like Methods and Generalized <math>g</math>-Fractional Calculus of Canavati-Type</b>	215
13.1	Introduction	215
13.2	Convergence Analysis	216
13.3	Applications to $g$ -Fractional Calculus of Canavati Type	221
	References	230
<b>14</b>	<b>Iterative Algorithms and Left-Right Caputo Fractional Derivatives</b>	231
14.1	Introduction	231
14.2	Convergence Analysis	232
14.3	Applications to Fractional Calculus	239
	References	243
<b>15</b>	<b>Iterative Methods on Banach Spaces with a Convergence Structure and Fractional Calculus</b>	245
15.1	Introduction	245
15.2	Banach Spaces with Convergence Structure	246
15.3	Semilocal Convergence	248
15.4	Special Cases and Examples	252
15.5	Applications to Fractional Calculus	254
	References	262
<b>16</b>	<b>Inexact Gauss-Newton Method for Singular Equations</b>	263
16.1	Introduction	263
16.2	Preliminaries	266
16.3	Local Convergence	270
16.4	Proofs	273
16.4.1	Proof of Theorem 16.9	274
16.4.2	Proof of Theorem 16.12	276
16.4.3	Proof of Theorem 16.14	277
16.5	Numerical Examples	278
16.6	Conclusion	279
	References	279

<b>17</b>	<b>The Asymptotic Mesh Independence Principle . . . . .</b>	<b>283</b>
17.1	Introduction . . . . .	283
17.2	The Mesh Independence Principle . . . . .	284
17.3	Numerical Examples . . . . .	294
	References . . . . .	295
<b>18</b>	<b>Ball Convergence of a Sixth Order Iterative Method . . . . .</b>	<b>297</b>
18.1	Introduction . . . . .	297
18.2	Local Convergence Analysis . . . . .	299
18.3	Numerical Examples . . . . .	306
	References . . . . .	306
<b>19</b>	<b>Broyden's Method with Regularly Continuous Divided Differences . . . . .</b>	<b>309</b>
19.1	Introduction . . . . .	309
19.2	Semilocal Convergence Analysis of Broyden's Method . . . . .	310
	References . . . . .	316
<b>20</b>	<b>Left General Fractional Monotone Approximation . . . . .</b>	<b>317</b>
20.1	Introduction and Preparation . . . . .	317
20.2	Main Result . . . . .	327
20.3	Applications (to Theorem 20.15) . . . . .	334
	References . . . . .	335
<b>21</b>	<b>Right General Fractional Monotone Approximation Theory . . . . .</b>	<b>337</b>
21.1	Introduction and Preparation . . . . .	337
21.2	Main Result . . . . .	344
21.3	Applications (to Theorem 21.14) . . . . .	351
	References . . . . .	351
<b>22</b>	<b>Left Generalized High Order Fractional Monotone Approximation . . . . .</b>	<b>353</b>
22.1	Introduction . . . . .	353
22.2	Main Result . . . . .	362
22.3	Applications (to Theorem 22.16) . . . . .	371
	References . . . . .	371
<b>23</b>	<b>Right Generalized High Order Fractional Monotone Approximation . . . . .</b>	<b>373</b>
23.1	Introduction . . . . .	373
23.2	Main Result . . . . .	380
23.3	Applications (to Theorem 23.15) . . . . .	389
	References . . . . .	389
<b>24</b>	<b>Advanced Fractional Taylor's Formulae . . . . .</b>	<b>391</b>
24.1	Introduction . . . . .	391
24.2	Results . . . . .	392
	References . . . . .	412

Intelligent Numerical Methods: Applications to  
Fractional Calculus

Anastassiou, G.A.; Argyros, I.K.

2016, XVI, 423 p. 2 illus. in color., Hardcover

ISBN: 978-3-319-26720-3
