1	Introduction	1
	References	9
2	Evolution and Breakdown of a Subsonic Round Jet	13
2.1	Experimental Technique	13
2.2	Velocity Characteristics	14
2.3	Interaction of the Primary Vortices with the Longitudinal Disturbances	15
2.4	High-Frequency Instability of the Longitudinal Perturbations.	19
2.5	Jet Dynamics Under Acoustic Excitation	20
2.6	Effect of Flow Velocity on the Jet Evolution.	21
	References	22
3	Instability of Free and Wall Plane Jets	23
3.1	Three-Dimensional Perturbations of the Free Plane Jet	23
3.1.1	Experimental Set-up.	23
3.1.2	Visualization of the Free Plane Jet.	24
3.2	Three-Dimensional Perturbations of the Wall Plane Jet.	26
3.2.1	Methodology	26
3.2.2	Near Field of the Jet in Natural Experimental Conditions	26
3.2.3	Controlled Transverse Modulation of the Jet.	28
3.2.4	Acoustic Effect on the Jet Perturbations	31
	References	34
4	Round Jet Instability Affected by Initial Conditions.	35
4.1	Experimental Technique	35
4.2	Instability of the Laminar Jet.	35
4.2.1	Basic Configuration of the Nozzle	36
4.2.2	The Nozzle Modified by the Extension Pipes	37
4.2.3	Acoustic Influence upon the Modified Jet Flow.	38

4.3	Modeling of the Turbulent Jet	39
	References	42
5	Origination and Evolution of Coherent Structures in Laminar and Turbulent Round Jets	43
5.1	Experimental Set-up.	43
5.2	Velocity Characteristics	44
5.3	Visualization of the Jet Perturbations	45
5.4	Response of the Jets to Acoustic Oscillations	48
	Reference	49
6	Plane Jets Affected by Initial Conditions and Acoustic Perturbations.	51
6.1	Experimental Set-up.	51
6.2	Instability of the Laminar Plane Jet with a Parabolic Mean Velocity Profile	53
6.3	Longitudinal Structures of Perturbations at the Breakdown of a Plane Jet	56
6.4	Dynamics of the Turbulent Plane Jet	60
6.5	Instabilities of Plane and Round Jets: A Comparison	61
	References	63
7	Round Jets in a Cross Shear Flow	65
7.1	Experimental Setup and Measurement Technique.	65
7.2	Results of Measurements and Visualization.	67
7.2.1	Round Jet with a Classical Top-Hat Mean Velocity Profile at the Nozzle Exit	67
7.2.2	Round Jet with a Parabolic Mean Velocity Profile at the Nozzle Exit	70
7.2.3	Modeling Instability of a Round Jet with Parabolic Mean Velocity Profile to a Weak Cross Flow	71
7.2.4	Round Jet in a Cross Shear Flow (in a Boundary Layer)	74
	References	84
8	Subsonic Round and Plane Macro- and Microjet in a Transverse Acoustic Field	87
8.1	Round Macro- and Microjets.	87
8.2	Plane Macro- and Microjets	94
	References	103

9	Stability of Subsonic Macro- and Microjets and Combustion	105
9.1	Diffusion Combustion of a Gaseous Fuel (Propane) in a Round Macrojet	105
9.1.1	Laminar and Turbulent Round Macrojets with a Top-Hat Mean Velocity Profile at the Nozzle Exit	105
9.1.2	Laminar and Turbulent Round Macrojets with a Parabolic Mean Velocity Profile at the Nozzle Exit	108
9.2	Diffusion Combustion of a Gaseous Fuel (Propane) in a Round Microjet with Acoustic Forcing.	108
9.2.1	Round Microjet in a Transverse Acoustic Field (Flame Flattening).	108
9.2.2	Round Microjet in a Transverse Acoustic Field (Bifurcation of the Jet).	115
9.3	Diffusion (Propane) and Premixed (Propane/Air) Combustion in a Plane Microjet in a Transverse Acoustic Field.	117
9.3.1	Diffusion Combustion of a Propane Plane Microjet in a Transverse Acoustic Field (Jet and Flame Bifurcation)	117
9.3.2	Plane Microjet in a Transverse Acoustic Field at Propane Diffusion Combustion (Bifurcation of the Jet and Flame).	120
9.3.3	Plane Microjet in a Transverse Acoustic Field at Combustion of a Premixed Propane/Air Mixture (Bifurcation of the Jet).	120
9.3.4	Analysis of One Possible Reason for the Mechanism of the Flame Bifurcation During Diffusion Combustion of a Propane Round Jet	124
