

Contents

Part I Foundations and Issues

1	Connections: Environmental Planning, Oceans and Coasts	3
1.1	The Planning Connection	5
1.2	The Management Connection	7
1.3	Planning and Management for Coasts and Oceans	8
1.4	People, Oceans and Coasts	13
1.5	The Role of the Planner	15
1.6	Special Concerns for Oceans and Coasts	15
1.7	Summary	16
	References	17
2	Definitions and Fundamental Concepts	19
2.1	Why? Special Challenges	20
2.2	Where? Location, Location, Location	21
2.3	When? Historical Developments	27
2.4	Who? Institutions and Legal Considerations	29
2.4.1	Regulatory Principles	31
2.4.2	International Bodies	32
2.4.3	National Entities	34
2.4.4	Sub-federal Agencies	35
2.4.5	Other Groups: Private and Nonprofit	36
2.5	Summary	37
	References	38
3	Policy, Law and Mapping: Foundations of Mankind's Relationship to the Sea	41
3.1	Our Understanding of the Sea	42
3.2	A Geological Perspective	44
3.3	A Meteorological Perspective	47
3.4	Living Resources	49

3.5	Improved Mapping for Understanding the Sea	50
3.6	A Legal Perspective	53
3.7	An Environmental Perspective	55
3.8	Summary	56
	References	57

Part II Methodological Approaches

4	Principles of Integration for Oceans and Coasts	61
4.1	What Is Integration?	62
4.2	The History of Integration	64
4.3	Integration for Coastal Planning	66
4.4	Integration for Marine Planning	69
4.5	Shoreward: Integrated Water Management	73
4.6	Summary	75
	References	75
5	Pollution Prevention for Oceans and Coasts	79
5.1	A Short History of Influential Events	80
5.2	Pollution Prevention and International Governance	83
5.3	Implementing Marine Pollution Prevention	85
5.4	Two Non-point Source Marine Pollutants	86
5.4.1	Oil and Other Pollutants from Ships: The IMO and MARPOL	86
5.4.2	Marine Litter	88
5.5	Place-Based Efforts at Pollution Prevention	92
5.6	Summary	93
	References	94
6	Marine Spatial Planning	97
6.1	MSP Defined	98
6.2	A Brief History	100
6.3	Step-by-Step MSP	100
6.4	Ecosystem-Based Management and MSP	102
6.5	Case Studies	104
6.5.1	The United States	104
6.5.2	Portugal	106
6.5.3	Germany	110
6.6	Summary	112
	References	113
7	Ecosystem Services for Oceans and Coasts	117
7.1	Types of Ecosystem Services	118
7.2	General Historical Background of ES	120
7.3	ES for the Marine and Coastal Environment	123
7.3.1	Provisional Services	124
7.3.2	Regulating Services	124
7.3.3	Cultural Services	126
7.3.4	Supporting Services	126

7.4	Crossing the Terrestrial-Marine Divide	127
7.5	Decision Making Based on Coastal and Marine ESA	128
7.6	Evolving Concepts and Controversy: A Critical Note	130
7.7	Summary	134
	References	134

Part III Tools and Technologies

8	Marine (and Coastal) Protected Areas	141
8.1	Conservation Paradigm Shifts and Protected Areas	142
8.2	What Constitutes an MPA?	145
8.3	MPAs Work	147
8.4	The Planning and Design of MPAs	148
8.5	Transboundary MPAs	151
8.6	Summary	154
	References	155
9	Communicating About Oceans and Coasts	159
9.1	Communicating About Data	160
9.2	Communicating with the Public	161
9.3	Communicating with Policy Makers	164
9.4	Tools	166
9.4.1	Narration	166
9.4.2	Visualization	169
9.4.3	Advanced Visualization Tools	174
9.5	Summary	176
	References	177
10	Decision Support Tools for Coastal and Ocean Planning and Management	179
10.1	DSTs for Systematic Conservation Planning	180
10.2	Beyond Scoring: Two DSTs for Conservation Planning: Marxan and Zonation	182
10.2.1	Marxan	183
10.2.2	Zonation	184
10.3	DST for Other Marine Issues	186
10.4	Decision Support for Marine Spatial Planning	187
10.5	Limitations of Decision Support Tools	188
10.6	Summary	189
	References	189
11	Current Issues: Coastal Adaptation to Climate Change	191
11.1	The “Snowball” That Is Climate Change	192
11.1.1	Sea Level Rise and Flooding	193
11.1.2	Warming Oceans	195
11.1.3	Ocean Acidification	196

11.2	Climate Change and Coastal Hazards	197
11.3	Mitigation vs. Adaptation	199
11.4	Planning for Adaptation	201
11.5	Vulnerability Assessment	203
11.6	Measures and Technologies for Adaptation	205
11.7	Summary	208
	References	208
12	Conclusions: Can Environmental Planning Save the Oceans?	211
12.1	A New Horizon for Planning	213
12.2	Progress in Methods, Tools and Technologies	214
12.3	Methods for Marine and Coastal Protection	215
12.4	Tools for Marine and Coastal Protection	216
12.5	Technologies for Analysis and Communication	218
12.6	The Promise and Peril of MSP	220
12.7	Summary Conclusions	221
	References	221
	Index	225

Environmental Planning for Oceans and Coasts

Methods, Tools, and Technologies

Portman, M.E.

2016, XVIII, 237 p. 48 illus., 40 illus. in color., Hardcover

ISBN: 978-3-319-26969-6
