

Contents

Introduction	1
Models as Illustrations and Illustrations as Models	3
Three Routes to Modelling	5
Models in Our Minds	6
Models as Caricatures	8
Models in Science.	10
Why Do We Use Models?.	12
History	15
It Started as an Analogy	15
Abstraction	19
Followers	20
Mechanisms.	21
Christopher Polhem—A Modelling Pioneer	23
Structure, Relation and Use	27
The Concept of a Model	27
Model Taxonomy	28
Phenomena, Theories and Models.	32
Grand Theories and Minor Models	32
Theories and Models	33
The Relation Between Phenomena and Models.	36
Creating and Using Models	39
The Art of Model Building.	39
Simulations and Experiments	42
Parameters	44
All Models Are False, but Is Anything at Fault?.	44
The Right Thing or a Right Mess?	47
Generality and Diversity	49
The Dangers of Modelling.	52

Interviews.	55
What Is a Model?	55
Comments	57
How Do You Use Models in Your Research?	57
Comments	59
What Makes One Model Better Than Another?	59
Comments	61
Have You Ever Met People with Ideas Different from Yours When It Comes to Models and Modelling?	61
Comments	63
What Is the Difference Between Theory and a Model?	64
Comments	65
Concluding Remarks.	65
Worked Examples.	67
Langmuir Adsorption	67
Rainfall-Runoff Models	70
A Statistical Model for Time Series	74
The Standard Linear Solid Model of Cell Biomechanics	77
From Weather to Chaos.	81
The Hertzprung–Russell Diagram	84
Mouse Models of Neurofibromatosis.	87
Scale Models in Ship Engineering	89
Epilogue	93
