

# Contents

<b>1</b>	<b><i>Leymus racemosus</i>: A Potential Species of Gene Pool Enrichment for Wheat Improvement</b> . . . . .	<b>1</b>
	Yasir Serag Alnor Gorafi and Hisashi Tsujimoto	
<b>2</b>	<b><i>Arachis</i> Gene Pools and Genetic Improvement in Groundnut</b> . . . . .	<b>17</b>
	Anurudh K. Singh and S.N. Nigam	
<b>3</b>	<b>Genetic Resources of Chickpea (<i>Cicer arietinum</i> L.) and Their Utilization</b> . . . . .	<b>77</b>
	Deepak Ohri	
<b>4</b>	<b>Genetic Improvement of Cotton</b> . . . . .	<b>105</b>
	S. Manickam and A.H. Prakash	
<b>5</b>	<b>Genetic Diversity and Germplasm Patterns in <i>Brassica juncea</i></b> . . . . .	<b>163</b>
	S.S. Banga and Shashi Banga	
<b>6</b>	<b>Potato Diversity and Its Genetic Enhancement</b> . . . . .	<b>187</b>
	Avinash Srivastava, Vinay Bhardwaj, BP Singh and SM Paul Khurana	
<b>7</b>	<b>Genome Plasticity in Buckwheat</b> . . . . .	<b>227</b>
	Nikhil K. Chrungoo, Lashaihun Dohtdong and Upasna Chettry	
<b>8</b>	<b>Origin of Genetic Variability and Improvement of Quinoa (<i>Chenopodium quinoa</i> Willd.)</b> . . . . .	<b>241</b>
	Atul Bhargava and Deepak Ohri	
<b>9</b>	<b>Emerging Invaders from the Cultivated Croplands: An Invasion Perspective</b> . . . . .	<b>271</b>
	Neha Goyal and Gyan Prakash Sharma	
<b>10</b>	<b>Chromosome Engineering for High Precision Crop Improvement</b> . . . . .	<b>291</b>
	Harinder Kumar Chaudhary, Vineeta Kaila, Shoukat Ahmad Rather, Navdeep Singh Jamwal and Anila Badiyal	

<b>11 Overview of Progress and Potentials of Improving Commonly Used <i>Allium</i> species in India . . . . .</b>	<b>325</b>
R.N. Gohil and Veenu Kaul	
<b>12 Utilization of Germplasm for the Genetic Improvement of Mung bean [<i>Vigna radiata</i> (L.) Wilczek]: The Constraints and the Opportunities . . . . .</b>	<b>367</b>
Ruchi Vir, Suman Lakhanpaul, Sonal Malik, Sooraj Umdale and Kangila Venkataramana Bhat	
<b>13 Genetic Improvement in the Genus <i>Eleusine</i> . . . . .</b>	<b>393</b>
Renuka Agrawal and Ankur Maheshwari	
<b>14 An Ancient Medicinal Plant at the Crossroads of Modern Horticulture and Genetics: Genetic Resources and Biotechnology of Sea Buckthorn (<i>Hippophae</i> L., Elaeagnaceae) . . . . .</b>	<b>415</b>
Igor V. Bartish	
<b>15 Unlocking the Potential of Genetic Resources for Improvement of Sesame (<i>Sesamum indicum</i> L.): The Current Scenario . . . . .</b>	<b>447</b>
Vibhuti Singh, Sachin Kumar, Amrita Singh, Niti Pathak Bhaduri, Kangila Venkataramana Bhat and Suman Lakhanpaul	
<b>Index . . . . .</b>	<b>481</b>

Gene Pool Diversity and Crop Improvement

Volume 1

Rajpal, V.R.; Rao, S.R.; Raina, S.N. (Eds.)

2016, XI, 484 p. 50 illus., 34 illus. in color., Hardcover

ISBN: 978-3-319-27094-4
