

Contents

1	Formation of Bacterial Lineages in <i>Salmonella enterica</i> by Epigenetic Mechanisms	1
	Ignacio Cota and Josep Casadesús	
2	Noncoding RNAs and Chromatin Modifications in the Developmental Control of Imprinted Genes	19
	Robert Feil	
3	Lymphocyte Identity and Genomic Switches	41
	Yuka Kanno, Steven Witte, and John J. O'Shea	
4	Epigenetic Imprinting of Immunological Memory	53
	Jun Dong, Hyun-Dong Chang, and Andreas Radbruch	
5	Short Biologically Active Peptides as Epigenetic Modulators of Gene Activity	69
	B.F. Vanyushin and V. Kh. Khavinson	
6	Epigenetic Alterations of Viral and Cellular Genomes in EBV-Infected Cells	91
	Ingemar Ernberg, Hans Helmut Niller, and Janos Minarovits	
7	Epigenetic Alterations upon the Insertion of Foreign DNA into Mammalian Genomes: Oncogenesis and Evolution	123
	Stefanie Weber, Andrea Hofmann, Anja Naumann, Per Hoffmann, and Walter Doerfler	
8	What Mechanisms Induce Methylation of <i>FMRI</i> Gene Full Mutation? A Still Unanswered Question	145
	Elisabetta Tabolacci and Giovanni Neri	

9	Silencing of Human Cytomegalovirus Gene Expression Mediated by Components of PML Nuclear Bodies	175
	Myriam Scherer, Nadine Wagenknecht, Nina Reuter, and Thomas Stamminger	
10	Azanucleoside DNA Methyltransferase Inhibitor Drugs: Update on Clinical Applications in Myelodysplastic Syndromes and Acute Myeloid Leukemia	197
	Michael Lübbert, Michael Daskalakis, Philipp N. Sander, and Andrea Kündgen	
11	Oxidative Stress and Cancer Epigenomics	223
	Michelle Hussong and Michal R. Schweiger	
	Glossary of Terms	245

Epigenetics - A Different Way of Looking at Genetics

Doerfler, W.; Böhm, P. (Eds.)

2016, XVI, 254 p. 41 illus., 9 illus. in color., Hardcover

ISBN: 978-3-319-27184-2
