

Contents

1	Introduction	1
1.1	Single-File Diffusion	1
1.2	Stochastic Energetics	2
1.3	Thesis Organization	3
	References	4
2	Basics of Single-File Diffusion	7
2.1	Brownian Motion with Hard-Core Interaction	7
2.1.1	“Collisions” of Two Particles	7
2.1.2	Propagator for General N	11
2.1.3	PDF of a Tagged Particle	13
2.2	SFD in Homogeneous System with Constant Density	15
2.2.1	Heuristic Arguments	15
2.2.2	Derivation of Tracer PDF	16
2.3	Comparison with SFD of N Particles	18
2.3.1	Entropic Repulsive Forces	18
2.3.2	Three Dynamical Regimes	20
2.4	Single-File Diffusion Front	21
2.5	Further Reading	23
	References	25
3	SFD in a Semi-Infinite System with Absorbing Boundary	31
3.1	Definition of the Model	31
3.2	Finite Number of Interacting Particles	32
3.2.1	Single Diffusing Particle	32
3.2.2	Mapping on Single-Particle Diffusion in N Dimensions	35
3.2.3	PDF of a Tagged Particle	38
3.2.4	First-Passage Properties	41
3.2.5	Tracer Dynamics with Absorption	46
3.2.6	Tracer Dynamics Conditioned on Nonabsorption	48

3.3	Thermodynamic Limit	49
3.3.1	Evolution of Density Profile	50
3.3.2	PDF of a Tagged Particle	50
3.3.3	First-Passage Properties	51
3.3.4	Tracer Dynamics with Absorption	53
3.3.5	Tracer Dynamics Conditioned on Nonabsorption	54
3.4	Summarizing Remarks	55
	References	56
4	First-Passage Properties of a Tracer in a Finite Interval	59
4.1	Definition of the Model	59
4.2	Both Boundaries Are Absorbing	61
4.2.1	Single Noninteracting Particle	61
4.2.2	Fixed Initial Number of Interacting Particles	63
4.2.3	Fixed Initial Density of Interacting Particles	70
4.3	The Left Boundary is Absorbing, the Right Boundary is Reflecting	74
4.3.1	Single Noninteracting Particle	74
4.3.2	Fixed Initial Number of Particles	76
4.3.3	Fixed Initial Density of Particles	77
4.4	Summarizing Remarks	78
	References	79
5	Basics of Stochastic Thermodynamics	81
5.1	Definition of Stochastic Work and Heat	81
5.2	Crooks Fluctuation Theorem and Jarzynski Equality	83
5.3	Further Reading	85
	References	86
6	Work Distribution in Logarithmic-Harmonic Potential	91
6.1	Definition of the Model	91
6.2	Solution of the Fokker-Planck Equation for Arbitrary Protocol	93
6.2.1	Green Function for Logarithmic Potential	93
6.2.2	Joint Green Function for Work and Position	95
6.3	PDF of Particle Position and Its Long-Time Asymptotics	96
6.4	Work Fluctuations	98
6.4.1	Characteristic Functions	98
6.4.2	Simple Example	99
6.5	Summarizing Remarks	104
	References	106
7	Conclusions and Outlook	109

Appendix A: Limit Distribution of the Extreme	111
Appendix B: Asymptotic Expansion of Conditioned PDF	113
Appendix C: Different Driving Protocols	117

Stochastic Dynamics and Energetics of Biomolecular
Systems

Ryabov, A.

2016, XV, 118 p. 10 illus., Hardcover
