

Contents

1	Introduction	1
1.1	Technical Background	3
1.1.1	WCET Estimation and Cache Analysis	3
1.1.2	Multiprocessor Real-Time Scheduling	6
1.2	Real-Time Calculus	9
1.3	What's New in This Book	11
1.3.1	Quantitative Cache Analysis for WCET Estimation	11
1.3.2	Real-Time Scheduling for Multi-Cores.....	13
1.3.3	Scalable and Precise Real-Time Calculus	16
 Part I Cache Analysis for WCET Estimation		
2	MRU Cache Analysis for WCET Estimation	21
2.1	Introduction.....	22
2.2	Related Work	24
2.3	Basic Concepts	25
2.3.1	LRU Replacement	27
2.3.2	MRU Replacement	28
2.4	A Review of the Analysis for LRU.....	29
2.5	The New Analysis of MRU	31
2.5.1	New Classification: k -Miss	31
2.5.2	Conditions for k -Miss	33
2.5.3	Efficient k -Miss Determination	37
2.5.4	Generalizing k -Miss for Nested Loops	39
2.5.5	WCET Computation by IPET.....	41
2.6	Experimental Evaluation	42
2.6.1	Experiment Setup.....	43
2.6.2	Results and Discussions	44
2.7	Conclusions.....	51

3	FIFO Cache Analysis for WCET Estimation	53
3.1	Introduction	53
3.1.1	Relation to Previous Work	55
3.2	Preliminaries	55
3.2.1	Basic Concepts	55
3.2.2	LRU and FIFO	56
3.2.3	LRU Cache Analysis	56
3.3	A New Metric: Miss Distance	57
3.4	Quantitative FIFO Analysis	58
3.5	Computation of WCET Bounds	62
3.6	Experimental Evaluation	64
3.7	Discussion and Conclusion	65
	Appendix: The Complete IPET Formulation	66

Part II Real-Time Scheduling on Multicores

4	Analyzing Preemptive Global Scheduling	71
4.1	Introduction	71
4.2	Problem Setting	72
4.3	Previous Work	73
4.3.1	The Basic Single-Processor Case	73
4.3.2	The Basic Multiprocessor Case	74
4.4	Constrained-Deadline Task Sets	75
4.4.1	Busy Period Extension	75
4.4.2	Workload and Interference	77
4.4.3	The RTA Procedure	79
4.5	Performance Evaluation	81
4.6	Conclusions	82
	Appendix: Proof of Lemma 4.3	83
5	Analyzing Non-preemptive Global Scheduling	85
5.1	Introduction	85
5.2	Related Work	87
5.2.1	Preemptive Scheduling	87
5.2.2	Non-preemptive Scheduling	88
5.3	System Model and Notations	89
5.4	The General Schedulability Test	90
5.5	The Improved Schedulability Test for NP-FP	93
5.6	Sustainability	97
5.7	Performance Evaluation	99
5.8	Simulations	100
5.9	Conclusions	103
6	Liu and Layland's Utilization Bound	105
6.1	Introduction	105
6.2	Prior Work	106

6.3	Basic Concepts	107
6.4	The First Algorithm SPA1	107
6.4.1	SPA1: Partitioning and Scheduling	109
6.4.2	Schedulability	110
6.4.3	Utilization Bound	116
6.5	The Second Algorithm SPA2	117
6.5.1	SPA2: Partitioning and Scheduling	118
6.5.2	Properties	122
6.5.3	Schedulability	123
6.5.4	Utilization Bound	127
6.5.5	Task Splitting Overhead	127
6.6	Conclusions and Future Work	127
7	Parametric Utilization Bounds	129
7.1	Introduction	129
7.2	Related Work	131
7.3	Basic Concepts	132
7.4	Parametric Utilization Bounds	133
7.5	The Algorithm for Light Tasks	135
7.5.1	Algorithm Description	136
7.5.2	Utilization Bound	139
7.6	The Algorithm for Any Task Set	143
7.6.1	Algorithm Description	144
7.6.2	Utilization Bound	147
7.7	Conclusions	155
8	Cache-Aware Scheduling	157
8.1	Introduction	158
8.2	Related Work	159
8.3	Preliminaries	160
8.3.1	Cache Space Partitioning	161
8.3.2	Task Model	162
8.4	Cache-Aware Scheduling	163
8.4.1	The Scheduling Algorithm FP_{CA}	163
8.4.2	Problem Window Analysis	164
8.5	The First Test: LP-Based	167
8.5.1	Interference Calculation	168
8.5.2	Schedulability Test as an LP Problem	168
8.6	The Second Test: Closed Form	172
8.7	Performance Evaluation	174
8.8	Extensions	175
8.8.1	Blocking vs. Non-blocking Scheduling	175
8.8.2	Other Scheduling Strategies	176
8.9	Conclusions	177
	Appendix: Improving the Interference Computation	177

Part III Real-Time Calculus

9	Finitary Real-Time Calculus	183
9.1	Introduction	183
9.1.1	Related Work	184
9.2	RTC Basics	185
9.2.1	Arrival and Service Curves	185
9.2.2	Greedy Processing Component	187
9.2.3	Performance Analysis Network	188
9.3	Efficiency Bottleneck of RTC	189
9.4	Overview of Finitary RTC	190
9.5	Analyzing GPC with Finitary Deconvolution	192
9.6	Analysis Network in Finitary RTC	193
9.6.1	Bounding Individual MBS	194
9.6.2	Decision of Curve Upper Limits	195
9.6.3	Complexity	196
9.7	Evaluation	196
9.7.1	Case Study	197
9.7.2	Factors That Affect the Speedup Ratio	198
9.8	Conclusions and Future Work	200
	Appendix 1: Proof of Theorem 9.1	201
	Appendix 2: Proof of Theorem 9.2	201
10	EDF in Real-Time Calculus	209
10.1	Introduction	209
10.2	Preliminaries	210
10.2.1	Resource Model	210
10.2.2	Workload Model	211
10.2.3	EDF Scheduling and Worst-Case Response Time	212
10.2.4	Review of Spuri's RTA for EDF	212
10.3	Over-Approximate RTA	213
10.3.1	Special Case Where S_i^* Is Exact	215
10.3.2	Algorithmic Implementation and Complexity	216
10.4	Exact RTA	217
10.4.1	Algorithmic Implementation and Complexity	219
10.5	Evaluation	220
10.5.1	Efficiency Improvement	220
10.5.2	Comparing the Two Proposed Methods	221
10.6	Analysis of EDF Component in RTC	222
10.7	Conclusions	225
	References	227

Techniques for Building Timing-Predictable Embedded
Systems
