Contents

1 Introduction to Wound Healing 1
1.1 Time Course of Wound Healing and Treatment Goals 1
1.1.1 Stage 1 (Days 1–3): Hemostasis and Inflammation 2
1.1.2 Stage 2: Proliferation 4
1.1.3 Stage 3: Scar Maturation and Remodeling 4

2 Improving Outcomes in Wound Healing 7
2.1 Local Wound Environment 7
2.2 Infection 8
2.3 Age 9
2.4 Local Tissue Hypoxemia 9
2.5 Diabetes 10
2.6 Nutrition 10

3 Treatment of Acute Wounds: The Basics 13
3.1 Evaluation 13
3.2 Prepare the Wound 14
3.2.1 Hemostasis 14
3.2.2 Cleansing 15
3.2.3 Anesthesia 15
3.2.4 Debridement 15
3.2.5 Irrigation 16
3.3 Wound Closure 16
3.3.1 Layered Closure 16
3.3.2 Superficial Closure 17

4 Selecting Materials for Wound Closure 19
4.1 Monofilament Nonabsorbable Suture 19
4.2 Monofilament Absorbable Suture 20
4.3 Braided (Multifilament) Absorbable Suture 21
4.4 Needle Selection 21
4.5 Selecting an Appropriately Sized Suture 21

4.6 Stainless Steel Staples 22
4.7 Wound Closure with Adhesive Strips 22
4.8 Octyl Cyanoacrylate Tissue Adhesive 23

5 Proper Setup 25
5.1 Surgical Tray Setup 25
5.2 Positioning of the Needle 26

6 Suturing Techniques for Wound Closure 27
6.1 Simple Interrupted Closure 27
6.2 Horizontal Mattress Suture Technique 27
6.3 Vertical Mattress Suture Technique 28

7 Specifics of Wound Closure 29
7.1 Scalp 29
7.2 Face 32
7.2.1 Eyebrow 33
7.2.2 Ear 34
7.2.3 Nose 36
7.2.4 Lip 37
7.2.5 Other Facial Regions 39
7.3 Neck and Trunk 41
7.3.1 Repairing Superficial Neck and Trunk Lacerations 41
7.4 Upper Extremity 43
7.4.1 Repair of Lacerations to the Arm 43
7.4.2 Hands and Fingers 44
7.5 Lower Extremity 46
7.5.1 Upper Leg 47
7.5.2 Lower Leg (From the Knee Down) 48
7.5.3 Feet and Toes 50

8 Special Circumstances in Wounds 53
8.1 Skin Tears in the Elderly 53
8.1.1 Risk Factors Associated with Skin Tears 54
8.2 Evidence-Based Approach to Caring for Skin Tears 55
8.2.1 Wound Assessment 55
8.2.2 Skin Cleansing and Wound Preparation 55
8.2.3 Treatment 56
8.3 Bite Wounds 57
8.3.1 Dog and Cat Bite Treatment 57
8.3.2 Human Bite Treatment 58
8.4 Caring for Acute Wounds in Patients with Peripheral Edema 59

9 Abscess Drainage 61
9.1 Simple Abscess 62
9.2 Multiloculated Abscess (Carbuncles) 63
9.3 Paronychia 64

9.4 Infected Sebaceous Cyst 65
9.5 Infection in the Presence of a Foreign Body 66
9.6 Necrotizing Infection 66
9.7 Abscesses of Distinct Pathology and Anatomic Location 67
9.7.1 Pilonidal Cyst Disease and Abscess 67
9.7.2 Bartholin Gland Cyst and Abscess 68
9.7.3 Hidradenitis Suppurativa 69

10 Burns 71
10.1 Classifying a Burn 71
10.2 Assessment of Burn Surface Area (BSA) 72
10.3 Burn Center Admission Criteria 72
10.4 Caring for Burns in the Urgent Care 73

11 Chronic Wounds 75
11.1 Basics of Initial Evaluation and Treatment of Chronic Wounds 75
11.2 Special Types of Wounds 77
11.2.1 Diabetic Foot Ulcers 77
11.2.2 Arterial Occlusive Disease 77
11.2.3 Venous Insufficiency 78
11.2.4 Decubitus (Pressure) Ulcers 78
